**Decentralization** Andrew N. Parker,1995 June 1995 Although decentralization initiatives have a long history, much more needs to be understood about various components of decentralization before sound advice can be given to policymakers. Special strategies are needed to address the widespread incidence of rural poverty in developing countries, but initiatives aimed at improving the rural standard of living have not consistently reduced poverty. Parker examines the rationale for a specific rural focus in poverty reduction programs and reviews recent attempts to encourage rural development. He discusses the role decentralization could play in rural development programs and analyzes recent efforts to implement decentralized rural development programs. Parker concludes that although decentralization initiatives have a long history, much more needs to be understood about various components of decentralization before sound advice can be given to policymakers. He suggests a conceptual model--based on a soufflé theory of decentralization--that incorporates the essential elements of political, fiscal, and institutional decentralization as they relate to rural development outcomes. Like a soufflé that requires just the right combination of milk, eggs, and heat to rise, a successful program of decentralization must include just the right combination of political, fiscal, and institutional elements to improve rural development outcomes. This paper--a product of the Sector Policy and Water Resources Division, Agriculture and Natural Resources Department--is part of a larger effort in the department to develop a new strategy for rural development. The study was partly funded by the Bank's Research Support Budget under the research project Decentralization, Fiscal Systems, and Rural Development (RPO 679-68).

**The European Landscape Convention** Michael Jones,Marie Stenseke,2011-02-09 This important and insightful book provides, for the first time, a broad presentation of ongoing research into public participation in landscape conservation, management and planning, following the 2000 European Landscape Convention which came into force in 2004. The book examines both the theory of participation and what lessons can be learnt from specific European examples. It explores in what manner and to what extent the provisions for participation in the European Landscape Convention have been followed up and implemented. It also presents and compares different experiences of participation in selected countries from northern, southern, eastern and western Europe, and provides a critical examination of public participation in practice. However, while the book's focus is necessarily on Europe, many of the conclusions drawn are of global relevance. The book provides a valuable reference for researchers and advanced students in landscape policies and management, as well as for professionals and others interested in land-use planning and environmental management.

**Globalization, Growth and Marginalization** A.S. Bhalla,1998-09-12 Globalization is defined in economic terms to mean freer flows of trade, foreign direct investment and finance, and liberalization of trade and investment policies. Impacts of globalization and information technology are examined in terms of growth and productivity, poverty and income distribution, and employment. Experiences of Africa, East and Southeast Asia, South Asia, and Latin America in the era of globalization are discussed. It is argued that benefits of freer trade and capital flows need to be managed carefully in order to minimise the costs and maximise gains.

**The Balanced Scorecard** Robert S. Kaplan,David P. Norton,1996-08-02 The Balanced Scorecard translates a company's vision and strategy into a coherent set of performance measures. The four perspectives of the scorecard--financial measures, customer knowledge, internal business processes, and learning and growth--offer a balance between short-term and long-term objectives, between outcomes desired and performance drivers of those outcomes, and between

hard objective measures and softer, more subjective measures. In the first part, Kaplan and Norton provide the theoretical foundations for the Balanced Scorecard; in the second part, they describe the steps organizations must take to build their own Scorecards; and, finally, they discuss how the Balanced Scorecard can be used as a driver of change.

**Island of the Blue Dolphins** Scott O'Dell, 1960 Far off the coast of California looms a harsh rock known as the island of San Nicholas. Dolphins flash in the blue waters around it, sea otter play in the vast kelp beds, and sea elephants loll on the stony beaches. Here, in the early 1800s, according to history, an Indian girl spent eighteen years alone, and this beautifully written novel is her story. It is a romantic adventure filled with drama and heartache, for not only was mere subsistence on so desolate a spot a near miracle, but Karana had to contend with the ferocious pack of wild dogs that had killed her younger brother, constantly guard against the Aleutian sea otter hunters, and maintain a precarious food supply. More than this, it is an adventure of the spirit that will haunt the reader long after the book has been put down. Karana's quiet courage, her Indian self-reliance and acceptance of fate, transform what to many would have been a devastating ordeal into an uplifting experience. From loneliness and terror come strength and serenity in this Newbery Medal-winning classic.

*Terra 2008* Leslie Rainer, Angelyn Bass Rivera, David Gandreau, 2011-06-14 Earthen architecture constitutes one of the most diverse forms of cultural heritage and one of the most challenging to preserve. It dates from all periods and is found on all continents but is particularly prevalent in Africa, where it has been a building tradition for centuries. Sites range from ancestral cities in Mali to the palaces of Abomey in Benin, from monuments and mosques in Iran and Buddhist temples on the Silk Road to Spanish missions in California. This volume's sixty-four papers address such themes as earthen architecture in Mali, the conservation of living sites, local knowledge systems and intangible aspects, seismic and other natural forces, the conservation and management of archaeological sites, research advances, and training.

**Organisational Capital** Ahmed Bounfour, 2008-12-04 There is much debate as to how companies carry out their activities in the context of new information and communication technologies influencing organizations to decentralize and develop new managerial practises including outsourcing and networking. Recent theories have emphasized the importance of organization as a key component for building corporate competitive advantage and scholars have looked at this from a range of perspectives including in relation to intangible assets, human capital, work training and the process dimension. Yet the concept of

organisational capital as such – in spite of its indubitable relevance and attractiveness- is still to be clarified until now. In this book the subject is approached in four ways. Firstly from an analytical perspective: what is the status of organisational capital as a concept and how is it defined; secondly from an ontological perspective: what type of (implicit) orders can be designed and implemented around organisations; thirdly from the measurement perspective: what kind of frameworks and what type of metrics can be prototyped; and finally the implementation perspective: how should organizations integrate the organisational capital perspective in the definition and implementation of their strategies for resources' allocation. The book provides the first multifaceted and international effort from a broad perspective, aiming at clarifying the concept of organisational capital and determining its analytical and operational implications.

**The Theory of the Growth of the Firm** Edith Tilton Penrose, 2013-12 2013 Reprint of 1959 American Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. This edition reprints the text from the 1959 First Edition originally published by Wiley. Why do some firms perform better than others? What enables a firm to grow and take advantage of its opportunities? Currently much discussion of these questions pivots around the ideas of competencies and capabilities, and the concept of the learning organization or knowledge-creating company. The Theory of the Growth of the Firm is a rich and pioneering work that addresses these questions and laid the foundation for this approach often referred to as the resource based view of the firm. Edith Penrose analyzes managerial activities and decisions, organizational routines, and knowledge creation within the company and argues that they are critical to the ability of a firm to grow. This work has become a classic business book and remains relevant to this day.

**The Discipline of Market Leaders** Michael Treacy, Fred Wiersema, 2007-03-20 Why is it that Casio can sell a calculator more cheaply than Kellogg's can sell a box of corn flakes? Why can FedEx "absolutely, positively" deliver your package overnight but airlines have trouble keeping track of your bags? What does your company do better than anyone else? What unique value do you provide to your customers? How will you increase that value next year? As customers' demands for the highest quality products, best services, and lowest prices increase daily, the rules for market leadership are changing. Once powerful companies that haven't gotten the message are faltering, while others, new and old, are thriving. In disarmingly simple and provocative terms, Treacy and Wiersema show what it takes to become a leader in your market, and stay there, in an ever more sophisticated and demanding world.

**Towards Knowledge Societies** Unesco, 2005 Urges governments to expand quality education for all, increase community access to information and communication technology, and improve cross-border scientific knowledge-sharing, in an effort to narrow the digital and knowledge divides between the North and South and move towards a smart form of sustainable human development.

**Marketing Moves** Philip Kotler, Dipak Jain, Suvit Maesincee, 2002 The Internet, globalization, and hypercompetition are dramatically reshaping markets and changing the way business is done. The problem, says internationally renowned marketer Philip Kotler and his coauthors Dipak C. Jain and Suvit Maesincee, is that marketing has not kept pace with the markets. In today's world, customers are scarce-not products-and classic marketing needs to be deconstructed, redefined, and broadened to reflect this new reality. Marketing Moves describes the next transformational imperative for marketing-and for any organization

competing in our customer-ruled, technology-driven marketplace. It calls for a fundamental rethinking of corporate strategy to enable the ongoing creation and delivery of superior value for customers in both the marketplace and the marketspace. And it appoints marketing as the lead driver in shaping and implementing this new strategy. The means for accomplishing this lies in a radically new marketing paradigm the authors call holistic marketing -a dynamic concept derived from the electronic connectivity and interactivity among companies, customers, and collaborators. This new paradigm combines the best of traditional marketing with new digital capabilities to build long-term, mutually satisfying relationships and co-prosperity among all key stakeholders. Outlining a framework for implementing holistic marketing that calls for integrating customer demand management, internal and external resource allocation, and network collaboration-the authors show how holistic marketing can enable companies to: - Identify new value opportunities for renewing their markets - Efficiently create the most promising new value offerings - Deliver products, services, and experiences that more precisely match individual customer requirements - Consistently operate at the highest level of product quality, service, and speed Thought-provoking and practical, *Marketing Moves* shows how to build a complete marketing platform primed for the challenges and opportunities of a customer-centric world. **AUTHOR BIO:** Philip Kotler is the S.C. Johnson Son Distinguished Professor of International Marketing at the Kellogg Graduate School of Management at Northwestern University in Chicago. Dipak C. Jain is Dean of the Kellogg Graduate School of Management. Suvit Maesincee is a Professor of Marketing at the Sasin Graduate Institute of Business Administration at Chulalongkorn University in Bangkok, Thailand.

Coopetition Strategy Giovanni B. Dagnino, Elena Rocco, 2009-09-10 The book examines the theories of co-opetition and follows this up with empirically based case studies as well as experimental evidence from the laboratory and will be of interest to those involved with strategic management.
