KRINK New York City Craig Costello, 2020-04-07 Craig Costello, aka KR, grew up in Queens, New York, where graffiti was part of the landscape and a symbol of the city. While living in San Francisco, he quickly garnered attention when his signature KR tag popped up throughout the city. As he became one of the more prominent figures on the streets of NYC and San Francisco, he began to hone his craft by creating better tools launching his own line of homemade markers and mops, combining his moniker KR with the word INK. In *KRINK: GRAFFITI, ART, AND INVENTION*, Costello has compiled a visual memoir: from his early days of the '80s and '90s and launch with the hip New York City retailer Alife, which put his brand on the map, to his evolution as an artist and high-fashion collaborator. The book showcases Costello's seminal style and his extensive body of work, including site specific installations around the world. It also chronicles his myriad collaborations with Alife, Nike, Coach, Moncler, Modernica, Marc Jacobs, Levi Strauss & Co., Mini (BMW), Casio, Smith Optics, Carhartt, Kidrobot, Medicom Toy, agnès b., and Colette, among many others. Today, Costello's reach and influence goes far beyond urban street culture. Krink has grown exponentially into a global artist materials brand with expanding collections of apparel, tools, and accessories, while Costello's unique aesthetic can be seen on objects from sneakers to luxury goods to cars. *KRINK* is both stylish and informative, capturing the ethos of punk and hip-hop culture, and is sure to appeal to the fans of high/low cultural crossovers, as well as die-hard fans of street art and fashion.

Storm Rising Chris Hauty, 2022-05-03 This instant national bestseller leads a young intelligence operative into the depths of a dangerous white supremacy conspiracy that threatens to tear the country apart in a “high adrenaline adventure” (Booklist). Intelligence operative Hayley Chill is

pursing the truth about her father's mysterious fate, which government officials seem determined to hide from her. But when she stumbles upon a ciphered document under the floorboards of her father's house, it becomes impossible to ignore the questions about his death. Was it suicide, or was it murder, designed to protect a deeper secret? She fears what she's discovered may be connected to current rumors of a dark conspiracy, one that no one will substantiate. Hayley's been loyal to Washington; has it been as loyal to her? With permission from her handler to probe deeper, Hayley is led into a terrifying subculture of white supremacy within the United States military. As her investigation intensifies, she uncovers an expansive conspiracy to bring about the secession of several states from the country. It's up to Hayley to stop a second Civil War before it starts while also confronting the ultimate truth about her father's harrowing deeds in this "timely and terrifying read" (Nick Petrie, author of *The Runaway*).

An Assessment of the Prospects for Inertial Fusion Energy National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Board on Physics and Astronomy, Committee on the Prospects for Inertial Confinement Fusion Energy Systems, 2013-07-05 The potential for using fusion energy to produce commercial electric power was first explored in the 1950s. Harnessing fusion energy offers the prospect of a nearly carbon-free energy source with a virtually unlimited supply of fuel. Unlike nuclear fission plants, appropriately designed fusion power plants would not produce the large amounts of high-level nuclear waste that requires long-term disposal. Due to these prospects, many nations have initiated research and development (R&D) programs aimed at developing fusion as an energy source. Two R&D approaches are being explored: magnetic fusion energy (MFE) and inertial fusion energy (IFE). An Assessment of the Prospects for Inertial Fusion Energy describes and assesses the current status of IFE research in the United States; compares the various technical approaches to IFE; and identifies the scientific and engineering challenges associated with developing inertial confinement fusion (ICF) in particular as an energy source. It also provides guidance on an R&D roadmap at the conceptual level for a national program focusing on the design and construction of an inertial fusion energy demonstration plant.

The Araki Effect Filippo Maggia, 2019-10-08 Araki's career in full, from the portraits of the early 1960s to city scenes and tender tributes to his wife Araki is known the world over for his controversial erotic portraits of Japanese women, often bound using the kinbaku (Japanese bondage) technique. A unique figure in contemporary photography, he has always found creative inspiration in his daily existence, without making any distinction between his personal life and public and professional practice. The Araki Effect offers a broad overview of his career: from the first series

from 1963-65, Satchin and His Brother Mabo, to Subway of Love, a large collection of images taken in the Tokyo subway between 1963 and 1972, the year he also made Autumn in Tokyo, which recounts the autumn he spent wandering through the city in the twilight hours. These are followed by Sentimental Night in Kyoto, less known than the famous Sentimental Journey, both tributes to his wife, Yoko; Balcony of Love, Death Reality, Tokyo Diary from 2017, and one of his latest collections, Araki's Paradise from 2019. Born in Tokyo in 1940, Nobuyoshi Araki worked at an advertising agency in the 1960s, where he met his future wife, Yoko Araki, the subject of his now classic volume Sentimental Journey. Araki's oeuvre spans erotic portraits of women, still lifes, images of plants, scenes of everyday life and architectural photography. He has published around 400 books, shown in many international exhibitions and his work is part of important collections worldwide. Araki lives and works in Tokyo.

G-SHOCK Ariel Adams, 2023-09-26 Celebrating the story of G-SHOCK, a truly unique watch whose pioneering innovation, function, and versatile design has made it a cult-collectible worn by devoted fans across the globe as well as by cultural icons in the worlds of fashion, sports, music, and popular culture for the past forty years. Born at a time when watches were generally considered fragile instruments, G-SHOCK began as a dream of a young engineer, Kikuo Ibe, who wanted to create “a watch that doesn’t break even when dropped.” In 1981, Project Team Tough was formed to build it, and over two years and 200 prototypes later, the indestructible, shock-resistant G-SHOCK watch was crafted. This revealing volume takes readers through the journey, spirit, and evolution of this distinctive timepiece, whose form and function combined with constant innovation over the past four decades have cemented the watch as a symbol of strength and endurance. Worn by everyone

from pro-athletes and military personnel, to skateboarders, surfers, musicians, and entertainers, this stylish and multipurpose watch has permeated the spheres of sports, design, music, and popular culture. Chapters include a history of the technological innovation, behind-the-scenes imagery from the brand's headquarters in Japan, interviews with some of the brand's diehard collectors, and advertisements and collaborations with sports figures, fashion designers, musicians, and artists including pro-surfer Kanoa Igarashi, musician Kid Cudi, designers Takashi Murakami and Nigo, and fashion brands like BAPE, Kith, Stüssy, Maison Margiela, and Supreme. Embodying the spirit of "Absolute Toughness," G-SHOCK's visceral connection to its collaborators and collectors make this book a must-have for watch connoisseurs and design aficionados.

IRON MAKING AND STEELMAKING AHINDRA GHOSH, AMIT CHATTERJEE, 2008-02-29 This authoritative account covers the entire spectrum from iron ore to finished steel. It begins by tracing the history of iron and steel production, right from the earlier days to today's world of oxygen steelmaking, electric steelmaking, secondary steelmaking and continuous casting. The physicochemical fundamental concepts of chemical equilibrium, activity-composition relationships, and structure-properties of molten metals are introduced before going into details of transport phenomena, i.e. kinetics, mixing and mass transfer in ironmaking and steelmaking processes. Particular emphasis is laid on the understanding of the fundamental principles of the processes and their application to the optimisation of actual processes. Modern developments in blast furnaces, including modelling and process control are discussed along with an introduction to the alternative

methods of ironmaking. In the area of steelmaking, BOF plant practice including pre-treatment of hot metal, metallurgical features of oxygen steelmaking processes, and their control form part of the book. It also covers basic open hearth, electric arc furnace and stainless steelmaking, before discussing the area of casting of liquid steel—ingot casting, continuous casting and near net shape casting. The book concludes with a chapter on the status of the ironmaking and steelmaking in India. In line with the application of theoretical principles, several worked-out examples dealing with fundamental principles as applied to actual plant situations are presented. The book is primarily intended for undergraduate and postgraduate students of metallurgical engineering. It would also be immensely useful to researchers in the area of iron and steel.
