Dictionary of Abbreviations in Medical Sciences Rolf Heister, 2011-12-10 Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

The Unity of Science in the Arabic Tradition Shahid Rahman, Tony Street, Hassan Tahiri, 2008-07-15 the demise of the logical positivism programme. The answers given to these questions have deepened the already existing gap between philosophy and the history and practice of science. While the positivists argued for a spontaneous, steady and continuous growth of scientific knowledge the post-positivists make a strong case for a fundamental discontinuity in the

development of science which can only be explained by extrascientific factors. The political, social and cultural environment, the argument goes on, determine both the questions and the terms in which they should be answered. Accordingly, the sociological and historical interpretation - volves in fact two kinds of discontinuity which are closely related: the discontinuity of science as such and the discontinuity of the more inclusive political and social context of its development. More precisely it explains the discontinuity of the former by the discontinuity of the latter subordinating in effect the history of science to the wider political and social history. The underlying idea is that each historical and - cial context generates scientific and philosophical questions of its own. From this point of view the question surrounding the nature of knowledge and its development are entirely new topics typical of the twentieth-century social context reflecting both the level and the scale of the development of science.

Enforcement of Arbitration Agreements and International Arbitral Awards Emmanuel Gaillard,Domenico Di Pietro,Nanou Leleu-Knobil,2008 Enforcement of Arbitration Agreements and International Arbitral Awards provides the most exhaustive commentary on the fundamental aspects of the New York Convention. The significant legal developments and associated practice over the

last 50 years have been put under the microscope by distinguished academics and practitioners in the area. Each of the 31 chapters provides focused analysis of individual issues with the emphasis on the relevant case law from various Contracting States without ever straying from a global outlook.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Travels Through Lower Canada and the United States of North America in the Years 1806, 1807 and 1808 John Lambert,1810

Indian Philosophy Daya Krishna,1991 Most writings on Indian Philosophy assume that its central concern is with moksa, that the Vedas along with the Upanisadic texts are at the root of it and that it consists of six orthodox systems known as Mimamasa, Vedanta, Nyaya, Vaisesika, Samkhya and

Yoga, on the one hand and three unorthodox systems: Buddhism, Jainism and Carvaka, on the other. Besides these, they accept generally the theory of Karma and the theory of Purusartha as parts of what the Indian tradition thinks about human action. The essays in this volume question these assumptions and show that there is little ground for accepting them. A new counter-perspective is thus prepared for the articulation of the Indian philosophical tradition which breaks the traditional frame in which it has usually been presented.

Procedural Law in International Arbitration Georgios Petrochilos, 2004 International arbitration has become the preferred method for the resolution of international commercial disputes, yet the question still remains: What is the procedural law of international commercial arbitral proceedings and what is its relevance? This book comprehensively analyses the relevant legislative practice of all major arbitration venues in the world, as well as the arbitral practice of a number of arbitral institutions. Practitioners will welcome the book's examination of the fate of awards annulled in their state of origin, 'stateless' awards, the procedural regime of arbitrations involving sovereign states, and the human rights considerations in international arbitration.
