2020 Development Effectiveness Review Asian Development Bank,2021-04-01 This publication outlines the performance of the Asian Development Bank (ADB) in achieving the goals of Strategy 2030, the institution's long-term strategic framework. It is the 14th in the series of annual reports that tracks development progress in Asia and the Pacific, assesses ADB's development effectiveness, and identifies areas where the institution's performance needs to be strengthened.

The Limitless City Oliver Gillham,2002-03 One of the great debates of our time concerns the predominant form of land use in America today -- the all too familiar pattern of commercial and residential development known as sprawl. But what do we really know about sprawl? Do we know what it is? Where did it come from? Is it really so bad? If so, what are the alternatives? Can anything be done to make it better? The Limitless City offers an accessible examination of those and related questions. Oliver Gillham, an architect and planner with more than twenty-five years of experience in the field, considers the history and development of sprawl and examines current debates about the issue. The book: offers a comprehensive definition of sprawl in America traces the roots of sprawl and considers the factors that led to its preeminence as an urban and suburban form reviews both its negative impacts (loss of open space, increased pollution, gridlock) as well as its positive aspects (economic development, personal freedom, privacy)

considers responses to sprawl including smart growth, urban growth boundaries, regional planning, and the New Urbanism looks at what can be done to improve and counterbalance sprawl The author argues that whether we like it or not, sprawl is here to stay, and only by understanding where it came from and why it developed will we be able to successfully address the problems it has created and is likely to create in the future. The Limitless City is the first book to provide a realistic look at sprawl, with a frank recognition of its status as the predominant urban form in America, now and into the near future. Rather than railing against it, Gillham charts its probable future course while describing critical efforts that can be undertaken to improve the future of sprawl and our existing urban core areas.

World Economic Outlook, October 2015

International Monetary Fund. Research Dept.,2015-10-06

This issue discusses a number of factors affecting global growth, as well as growth prospects across the world's main countries and regions. It assesses the ongoing recovery from the global financial crisis in advanced and emerging market economies and evaluates risks, both upside and downside, including those associated with commodity prices, currency fluctuations, and financial market volatility. A special feature examines in detail causes and implications of the recent commodity price downturn; analytical chapters look at the effects of commodity windfalls on potential output and of exchange rate movements on trade.

Tough on Criminal Wealth Barbara Vettori,2007-09-21

Based on the expertise of thirty leading experts on confiscation in the EU, this is the first book to analyse the practice of proceeds from crime confiscation in the original fifteen EU Member States. It examines the implementation of confiscation provisions in all three (investigative, judicial

and disposal) phases of confiscation proceedings. It quantifies the enforcement of confiscation provisions in the EU, using an innovative and unique methodology and thereby furnishes understanding of obstacles and best practices. The conclusion of the book is that the 'tough on criminal wealth' philosophy is largely alien to the everyday practice of law enforcement agencies. Putting criminals behind bars is still the main aim of the system, and most of the scarce resources available are devoted to achieving this. This title is of interest to academics and students in the fields of criminology, sociology, and law, as well as to law enforcement officers, public prosecutors, and policymakers.

A Journey to the End of the Millennium A.B.

Yehoshua, 2012-07-05 The year is 999 A.D. Christians in Europe are preparing themselves for the arrival of the Messiah at the millennium and religious fervour is in the air. Sailing from the North African port of Tangier to a small, distant town called Paris are a Jewish merchant, Ben Attar, his two beloved wives and his Arab partner, Abu Lutfi. They have come for a meeting with their third partner the widower, Raphael Abulafia who has been forced to turn his back on their previous trading partnership because of his new wife's distrust of the dual marriage of Ben Attar. The latter turns this annual trading voyage into a personal quest to legitimise his second wife, restore his honour and, equally important, to show others the richness and humanity in his way of life. A confrontation ensues between people of different cultures whose ways of living and loving are so different, and yet who are of the same religion, believe in the same God and in the same morality. Thus we enter a profound human drama whose moral conflicts of fidelity and desire resonate deeply with our times. A. B. Yehoshua has imaginatively recreated a medieval world with its merchant trade in great depth and sensuous detail.

His evocation of one man's love is lyrical, erotic even, and *A Journey to the End of the Millennium* will rank with the best of Yehoshua's work.

Marriage Alliance in Late Medieval Florence Anthony Molho,1994 Molho (European history, Brown U.) shows that the propertied families of late-medieval and early-modern Florence maintained their power and influence through arranged marriage and the dowry. While elsewhere in Europe the elite were toppling under the onslaught of commerce and personal freedom, in Florence they married carefully within a narrow and well-defined class, used dowries as both speculation and instruments of manipulation, and remembered every detail for a long time. Essentials of Marketing Communications Jim

Blythe,2006 *Essentials of Marketing Communications* 3rd edition gives students a concise overview of the strategic and tactical decision-making processes involved in marketing communications. It also links the current theories of marketing communications to consumer behaviour issues as well as explaining how marketing communications works in the real world. The text is ideal for those studying marketing communications for the first time.

Macroeconomic Imbalances European Commission.

Directorate-General for Economic and Financial Affairs,2012 On 14 February 2012, the European Commission presented its first Alert Mechanism Report (AMR), prepared in accordance with Article 3 of Regulation (EU) No 1176/2011 on the prevention and correction of macroeconomic imbalances. The AMR serves as an initial screening device, helping to identify Member States that warrant further in-depth analysis to determine whether imbalances exist or

risk emerging. According to Article 5 of Regulation No. 1176/2011, these country-specific in-depth reviews should examine the nature, origin and severity of macroeconomic developments in the Member State concerned which constitute, or could lead to, imbalances. On the basis of this analysis, the Commission will establish whether it considers that an imbalance exists and what type of policy follow-up it will recommend to the Council. For Slovenia, the AMR noted that two indicators in the scoreboard exceeded their thresholds in 2010 and suggested the need to assess the development and drivers of potential imbalances. The AMR explained that in the years before the crisis, Slovenia enjoyed strong growth and domestic demand conditions, coupled with some losses in price competitiveness and a gradual widening of the current account deficit. It identified signs that overheating occurred, particularly as regards private sector credit growth, construction value added and property prices. The Slovenian economy was hit hard by the global crisis and the AMR noted that this has brought some, perhaps temporary, adjustment in the external balance but this is still at an early stage. Against this background, Section 2 examines the external and internal dimensions of imbalances including developments in competitiveness, private sector indebtedness and in asset markets. This is followed by a closer look at the implications of indebtedness of non-financial corporations for the banking sector in Section 3. Section 4 presents possible policy considerations.

The Chicago Plan Revisited Mr.Jaromir Benes,Mr.Michael Kumhof,2012-08-01 At the height of the Great Depression a number of leading U.S. economists advanced a proposal for monetary reform that became known as the Chicago Plan. It envisaged the separation of the monetary and credit functions of the banking system, by requiring 100% reserve

backing for deposits. Irving Fisher (1936) claimed the following advantages for this plan: (1) Much better control of a major source of business cycle fluctuations, sudden increases and contractions of bank credit and of the supply of bank-created money. (2) Complete elimination of bank runs. (3) Dramatic reduction of the (net) public debt. (4) Dramatic reduction of private debt, as money creation no longer requires simultaneous debt creation. We study these claims by embedding a comprehensive and carefully calibrated model of the banking system in a DSGE model of the U.S. economy. We find support for all four of Fisher's claims. Furthermore, output gains approach 10 percent, and steady state inflation can drop to zero without posing problems for the conduct of monetary policy.

Improving the Sustainable Development Goals Lars Niklasson, 2019-04-12 *Improving the Sustainable Development Goals* evaluates the Global Goals (Agenda 2030) by looking at their design and how they relate to theories of economic development. Adopted unanimously by the member states of the United Nations (UN) in 2015, the goals are remarkable for the global commitment on a set of targets to reach by 2030, but also for the lack of a strategy of implementation. The choice of appropriate action is handed over to individual governments, some of which are limited by their lack of resources. This book explores how implementation of the sustainable development goals (SDGs) can be developed, especially in developing countries. The content, strengths and weaknesses of the SDGs are critically examined, alongside their relationship to ongoing academic research. The authors also investigate the actions of governments over the past three years by looking at the national strategies they have presented at annual meetings of the UN High-Level Political Forum. *Improving the Sustainable*

Development Goals takes a critical but constructive approach, pointing out risks as well as possible remedies. The SDGs are seen as an opportunity for a global conversation on what works in solving some fundamental problems relating to poverty and environmental degradation. With the inclusion of a chapter by Tobias Ogweno, former member of the Kenya's UN mission, this book will appeal to all those who are interested in policy analysis with a focus on development issues.

The Multinational Enterprise and Legal Control

Cynthia Day Wallace, 2002-04-02 This long-awaited new book from Cynthia Day Wallace picks up the thread of her best-selling *Legal Control of the Multinational Enterprise: National Regulatory Techniques and the Prospects for International Controls*. In the present work she applies herself to legal and pragmatic aspects of control surrounding MNE operations. The primary focus is on legal and administrative techniques and measures practised by host states to control - transparently or less so - foreign MNE activity within their territories, or even extraterritorially when effects are felt within national boundaries. The primary geographic focus is the six most investment-intensive industrialized states (namely, Canada, France, Germany, Japan, the United States and the United Kingdom). At the same time an important message of the present study is precisely the implication for the developing countries as well as for the emerging market economies of central and eastern Europe - and even Asian nations besides Japan, because it is the sharing of this very 'experience of years' that can best serve to facilitate a fuller participation on the part of the up-and-coming economies in the same global market place.

Supply-Side Sustainability Timothy F. H. Allen, Joseph A. Tainter, Thomas W. Hoekstra, 2003-02-19 While

environmentalists insist that lower rates of consumption of natural resources are essential for a sustainable future, many economists dismiss the notion that resource limits act to constrain modern, creative societies. The conflict between these views tinges political debate at all levels and hinders our ability to plan for the future. Supply-Side Sustainability offers a fresh approach to this dilemma by integrating ecological and social science approaches in an interdisciplinary treatment of sustainability. Written by two ecologists and an anthropologist, this book discusses organisms, landscapes, populations, communities, biomes, the biosphere, ecosystems and energy flows, as well as patterns of sustainability and collapse in human societies, from hunter-gatherer groups to empires to today's industrial world. These diverse topics are integrated within a new framework that translates the authors' advances in hierarchy and complexity theory into a form useful to professionals in science, government, and business. The result is a much-needed blueprint for a cost-effective management regime, one that makes problem-solving efforts themselves sustainable over time. The authors demonstrate that long-term, cost-effective resource management can be achieved by managing the contexts of productive systems, rather than by managing the commodities that natural systems produce.

The Marriage Bargain Marion A. Kaplan, 1985 This eye-opening book covers over a thousand years of Western history and exposes the controls that noble, bourgeois, and propertied peasant families exerted over daughters (and sons) to ensure the continuity of existing social relations. It details the broader economic and social structures within which young women married and the degree to which the institution of the dowry--the marriage bargain--structured courtship and marriage. This provocative volume addresses

important issues of women's status and their roles in the family, the family economy, and the economy at large.

Taxing Energy Use 2019 Using Taxes for Climate Action OECD,2019-10-15 Taxing Energy Use (TEU) 2019 presents a snapshot of where countries stand in deploying energy and carbon taxes, tracks progress made, and makes actionable recommendations on how governments could do better. The report contains new and original data on energy and carbon taxes in OECD and G20 countries, and in international aviation and maritime transport.

The Yearbook of Consumer Law 2007 Geraint Howells,Annette Nordhausen,Deborah Parry,Christian Twigg-Flesner,2018-12-18 First published in 2007, The Yearbook of Consumer Law provides a valuable guide to developments in the consumer law field with a domestic, regional and international dimension. The volume presents a range of peer-reviewed scholarly articles, analytical in approach and focusing on specific areas of consumer law such as sales, credit and safety, as well as more general issues, such as consumer law theory. The book also includes a section dedicated to significant developments during the period covered, such as key legislative developments or important court decisions. The book provides an essential resource for all those, academic and practitioner, working in the areas of consumer law and policy.

Innovation in Urban and Regional Planning Daniele La Rosa,Riccardo Privitera,2021-05-10 This book gathers the latest advances, innovations, and applications in urban and regional planning processes and science, as presented by international researchers at the 11th International Conference on Innovation in Urban and Regional Planning (INPUT), held in Catania, Italy, on September 8-10, 2021. The overarching theme of the conference INPUT 2021 was

“Integrating Nature-Based Solutions in Planning Science and Practice”, with contributes focusing on functionality of urban ecosystems toward more healthier and resilient cities, planning solutions for socio-ecological systems, technologies and hybrid models for spatial planning, geodesign, urban metabolism, computational planning, ecosystems services, green infrastructure, climate change adaptation and mitigation, rural landscapes, cultural heritage, and accessibility for urban planning. The conference brought together international scholars in the field of planning, civil engineering and architecture, ecology and social science, to build and consolidate the knowledge and evidence on NBS in urban and regional planning.

Bank Recovery and Resolution Matthias Haentjens, B. Wessels, 2014 While some may claim that the European debt crisis is over, many European legislative instruments directed at crisis management in the banking sector, including Banking Union legislation, are still pending enactment. These legislative instruments, once enacted, will bring about an unprecedented harmonization of European bank insolvency law. Also, a multitude of legal disputes following the nationalization of SNS Reaal, the fourth largest bank in the Netherlands, in February 2013, are still unresolved. On 23 May 2013, the Hazelhoff Centre for Financial Law at Leiden Law School and the Netherlands Association for Comparative and International Insolvency Law (NACIIL) organized a conference on the highly topical theme of recovery and resolution of credit institutions and investment firms. The key question to which answers were sought during this conference was: 'Which rules should govern banks in difficulties?' This question has also been the Hazelhoff Centre for Financial Law's research theme for the past two years. The Hazelhoff Financial Law Series intends to deepen and further the debate on topical issues

of financial law. It represents key results of the work of the Hazelhoff Centre for Financial Law at Leiden Law School. We understand financial law to encompass, inter alia, the legal aspects of financial supervision, the organization, functioning and regulation of financial markets, securities and finance transactions, market abuse, payments and payment systems, duties of care in the banking sector and bank insolvency. Another key characteristic of the work of the Hazelhoff Centre for Financial Law is our focus on the international dimension of financial law. Should you share our enthusiasm in any of these areas of the law, we are confident that you will find much of interest in the present volume.--
