Why Evolution is True Jerry A. Coyne,2010-01-14 For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. Why Evolution is True weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

O mio babbino caro. Dall'opera Gianni Schicchi. Ediz. a spirale Giacomo Puccini, 2021

A Tuscan in the Kitchen Pino Luongo, Barbara Raives, Angela Hederman, 1988 This exuberant, delightfully unconventional cookbook is a warm, personal collection of recipes and reminiscences of the author's native Tuscany and a guide to a spontaneous way of cooking based on good taste and common sense rather than rigid rules. In *A Tuscan in the Kitchen*, Pino Luongo, the creator of New York's successful *Il Cantinori* restaurant, presents 140 of his favorite recipes, from soups and antipasti to salads and desserts. The recipes include such tempting dishes as trout with balsamic vinegar, peasant-style risotto made with sausage and peas, roasted quail with tarragon, spaghetti with sea bass sauce, radicchio and orange salad, and baked peaches stuffed with walnuts and chocolate. Interspersed throughout in a spirited narrative are tales of his adventures as well as stories of family celebrations and the local traditions of the people who live in Tuscany's dries, hill towns, and fishing ports. Mr. Luongo shows us how to cook the Tuscan way, using a small repertoire of ingredients and a few basic techniques to create dishes that taste delicious and can be endlessly varied. The ingredients in each recipe are broken down into a three-part list: pantry staples, like olive oil, pasta, and canned plum tomatoes; cold storage items such as eggs, butter, and cheese; and a handful of market foods that need to be purchased fresh. In the recipes, he gives basic instructions and guidelines for making each dish but does not give exact quantities. For instance, a recipe for tagliatelle with fresh garden vegetables suggests a variety of vegetables and herbs; the cook decides how many and how much of each to use, according to taste. Mr. Luongo teaches us the kind of flexibility good cooks have always practiced and encourages us to create our own personal style of cooking -- and have a wonderful time in the kitchen, too. Filled with warmth and an irrepressible enthusiasm for life's pleasures, *A Tuscan in the Kitchen* is an original and inspiring cookbook.

The Future of Natural History Museums Eric Dorfman, 2017-10-12 Natural history museums are changing, both because of their own internal development and in response to changes in context. Historically, the aim of collecting from nature was to develop encyclopedic assemblages to satisfy human curiosity and build a basis for taxonomic information. Today, with global biodiversity in rapid decline, there are new reasons to build and maintain collections, while audiences are more diverse, numerous, and technically savvy. Institutions must learn to embrace new technology while retaining the authenticity of their stories and the value placed on their objects. *The Future of Natural History Museums* begins to develop a cohesive discourse that balances the disparate issues that our institutions will face over the next decades. It disassembles the topic into various key elements and, through commentary and synthesis, explores a cohesive picture of the trajectory of the natural history museum sector. This book contributes to the study of collections, teaching and learning, ethics, and running non-profit businesses and will be of interest to museum and heritage professionals and academics and senior students in Biological Sciences and Museum Studies.
