**Power, Protection and Magic in Thailand** Craig J. Reynolds, 2019-10-22 This biographical study of an unusual southern policeman explores the relationship between religion and power in Thailand during the early twentieth century when parts of the country were remote and banditry was rife. Khun Phan (1898–2006), known as Lion Lawman, sometimes used rather too much lethal force in carrying out his orders. He was the most famous graduate of a monastic academy in the mid-south, whose senior teachers imparted occult knowledge favoured by fighters on both sides of the law. Khun Phan imbibed this knowledge to confront the risks and uncertainty that lay ahead and bolster his confidence and self-reliance for his struggle with adversaries. Against the background of national events, the story is rooted in the mid-south where the policeman was born and died. Based on a wide range of works in Thai language, on field trips to the region and on interviews with local and regional scholars as well as the policeman's descendants, this generously illustrated book, accompanied by short video clips, brings to life the distinctive environment of the lakes district on the Malay Peninsula.

Nong's Thai Kitchen Nongkran Daks, Alexandra Greeley, 2015-06-09 Only one chef has proved her mastery over celebrity chef Bobby Flay in the Food Network's Pad Thai Throwdown challenge: Nongkran Daks. Now, the master chef and owner of Virginia's renowned Thai Basil restaurant shares her secrets for creating Thai cuisine's most beloved dishes at home—using ingredients that can be found in most grocery stores. In Nong's Thai Kitchen, Daks teams up with veteran food writer Alexandra Greeley to show readers how to prepare classic Thai recipes such as: Chicken with Thai Basil Shrimp Soup in Coconut Milk Spicy Beef Salad with Mint Leaves Roasted Duck Curry Thai food is famous for its balance of sweet, sour, salty and hot flavors. This unique symphony of tastes and sensations is why Thai restaurants and cookbooks have entered the mainstream. What most people don't realize is that once elusive Thai ingredients such as fish sauce, lemongrass, coconut milk, cilantro, basil and shallots are now easily found, making it easy to prepare mouthwatering Thai dishes at home for far less money than they would cost in a restaurant. All the recipes in this essential Thai cookbook are healthy, easy to make and inexpensive, so step into Nong's Thai Kitchen and begin a culinary journey to the tropical heart of Asia!

Owners of the Map Claudio Sopranzetti, 2018 On May 19, 2010, the Royal Thai Army deployed tanks, snipers, and war weapons to disperse the thousands of Red Shirts protesters who had taken over the commercial center of Bangkok to demand democratic elections and an end to inequality. Key to this mobilization were motorcycle taxi drivers, who slowed down, filtered, and severed mobility in the area, claiming a prominent role in national politics and ownership over the city and challenging state hegemony. Four years later, on May 20, 2014, the same army general who directed the dispersal staged a military coup, unopposed by protesters. How could state power have been so fragile and open to challenge in 2010 and yet so seemingly sturdy only four years later? How could protesters who had once fearlessly resisted military attacks now remain silent? Owners of the Map provides answers to these questions—central to contemporary political mobilizations around the globe—through an ethnographic study of motorcycle taxi drivers in Bangkok. Claudio Sopranzetti explores the unresolved tensions in the drivers' everyday lives, their migration trajectories, consumer desires, and political demands amidst the restructuring of Thai capitalism after the 1997 economic crisis. Reconstructing the entanglements between their everyday mobility and political mobilization, Sopranzetti reveals mobility not just as a strength of contemporary capitalism but also as one of its fragile spots, always prone to disruption by the people who sustain its channels but remain excluded from their benefits. In so doing, Owners of the Map advances an analysis of power that focuses not on the sturdiness of hegemony or the ubiquity of everyday resistance but on its potential fragility as well as the work needed for its maintenance.

*Social Transformations in India, Myanmar, and Thailand: Volume I* Chosein Yamahata, Donald M. Seekins, Makiko Takeda, 2021-01-02 "This book focuses on the different challenges and opportunities for social transformation in India, Myanmar and Thailand, by centering communities and individuals as the main drivers of change. In doing so, it includes discussions on a wide array of issues including women's empowerment and political participation, ethno-religious tensions, plurilingualism, education reform, community-based healthcare, climate change, disaster management, ecological systems, and vulnerability reduction. Two core foundations are introduced for ensuring broader transformations. The first is the academic diplomacy project – a framework for an engaged academic enquiry focusing on causative, curative, transformative, and promotive factors. The second is a community driven collective struggle that serves as a grassroots possibility to facilitate positive social transformation by using locally available resources and enabling the participation of the resident population. As a whole, the book conveys the importance of a diversification of engagement at the grassroots level to strengthen the capacity of individuals as decisive stakeholders, where the process of social transformation makes communities more interconnected, interdependent, multicultural and vital in building an inclusive society."

**A Good Life** Mary Edmunds, 2013-05-01 This book is a story. It's a story about ordinary people in very different parts of the world dealing with rapid change in the late twentieth and early twenty-first centuries. It's about times of turbulent and violent social upheaval and rupture with the past. It's about modern times. It's also about being human; what it is to be human in a modernising and globalising world; how, in responding to the circumstances of their times, different groups define, redefine, and attempt to put into practice their understandings of the good and of what constitutes a good life. And it's about how human rights have come to be not abstract universal principles but a practical source of consciousness and practice for real people.

**Human Insecurity in East Asia** Michio Umegaki, Lynn Thiesmeyer, Atsushi Watabe, 2009 Threats to human security do not necessarily take cataclysmic forms such as war or natural disaster, nor does human insecurity exist solely within a suspended living environment like refugee camps. This publication explores less obvious threats to human security and how people and communities face them.--Publisher's description.

**Area Handbook for Thailand** Harvey Henry Smith, 1968

**Thai Agriculture** Lindsay Falvey, 2000 The history, science, and social aspects of today's Thai agriculture is traced from hunters and gatherers through agro-cities through State-religious Empires and immigrating Tai to produce a sustainable agriculture. The wet glutinous rice culture determined administrative structures in a pragmatic society which regularly produced a saleable surplus. Continuing today, these systems consolidated the importance of rice agriculture to national security and economic well-being, as Chinese and European influence benefited agribusiness and initiated the demand which would expand agriculture through population increase until accessible land was expended. As agriculture declined in relative financial importance, it continued to provide the benefits of employment, crisis resilience, self-sufficiency, rural social support, and cultural custody. Agricultural institutions evolved from a taxation and dispute resolution base to provide research, education, and technology transfer at levels below potential as they supported commercial agriculture funded by credit. Agribusiness expanded from the 1960s and small-holders were partly viewed as a past relic

which agribusiness could modernise. Unique elements of Thai agriculture include: irrigation technologies; administrative structures based on water control; global leadership in many agricultural commodities; multinational agribusiness; negotiating approaches; potential for further increases from known technologies, and an open culture which has embraced new ideas. One of the world's few major agricultural exporters, Thailand leads the world in rice, rubber, canned pineapple, and black tiger prawn production and export, the region in chicken meat export and several other commodities, and feeds more the four times its own population from less intensive agriculture than its neighbours. Poised to benefit from expansion in livestock demand, poverty reduction, and improved education, research, and legal and social systems, evident in the recent Asian financial crisis, will be considered with popular concern for socially sensitive alternatives for small-holder farmers to co-exist with commercial agriculture. Thailand will likely remain one of the world's major agricultural countries in social, environmental and economic terms for the foreseeable future, as it addresses the continuing rural issues of poverty and inequity.

Algal Biorefinery: An Integrated Approach Debabrata Das,2015-11-30 This book critically discusses different aspects of algal production systems and several of the drawbacks related to microalgal biomass production, namely, low biomass yield, and energy-consuming harvesting, dewatering, drying and extraction processes. These provide a background to the state-of-the-art technologies for algal cultivation, CO<sub>2</sub> sequestration, and large-scale application of these systems. In order to tap the commercial potential of algae, a biorefinery concept has been proposed that could help to extract maximum benefits from algal biomass. This refinery concept promotes the harvesting of multiple products from the feedstock so as to make the process economically attractive. For the last few decades, algal biomass has been explored for use in various products such as fuel, agricultural crops, pigments and pharmaceuticals, as well as in bioremediation. To meet the huge demand, there has been a focus on large-scale production of algal biomass in closed or open photobioreactors. Different nutritional conditions for algal growth have been explored, such as photoautotrophic, heterotrophic, mixotrophic and oleaginous. This book is aimed at a wide audience, including undergraduates, postgraduates, academics, energy researchers, scientists in industry, energy specialists, policy makers and others who wish to understand algal biorefineries and also keep abreast of the latest developments.

**Being a Buddhist Nun** Kim Gutschow,2009-07-01 They may shave their heads, don simple robes, and renounce materialism and worldly desires. But the women seeking enlightenment in a Buddhist nunnery high in the folds of Himalayan Kashmir invariably find themselves subject to the tyrannies of subsistence, subordination, and sexuality. Ultimately, Buddhist monasticism reflects the very world it is supposed to renounce. Butter and barley prove to be as critical to monastic life as merit and meditation. Kim Gutschow lived for more than three years among these women, collecting their stories, observing their ways, studying their lives. Her book offers the first ethnography of Tibetan Buddhist society from the perspective of its nuns. Gutschow depicts a gender hierarchy where nuns serve and monks direct, where monks bless the fields and kitchens while nuns toil in them. Monasteries may retain historical endowments and significant political and social power, yet global flows of capitalism, tourism, and feminism have begun to erode the balance of power between monks and nuns. Despite the obstacles of being considered impure and inferior, nuns engage in everyday forms of resistance to pursue their ascetic and personal goals. A richly textured picture of the little known culture of a Buddhist nunnery, the book offers moving narratives of nuns struggling with the Buddhist discipline of detachment. Its analysis of the way in which gender and sexuality construct ritual and social power provides valuable insight into the relationship between women and religion in South Asia today.

**Modern Thai House** Robert Powell,2012-10-10 With rich photography and insightful commentary, this Thai architecture and interior design book showcases some of the finest modern masterpieces in Southeast Asia. A tremendous body of sophisticated and sensitively designed architectural work

has been produced in Thailand in the first decade of the 21st century. The 25 houses in *The Modern Thai House* illustrate the radical new ideas coming from a dynamic younger generation of architects who are producing work comparable with and sometimes even surpassing the very best architecture in the world. Most of these architects were trained in the U.S. or U.K. and reflect not only American and European sensibilities but also affinities with their contemporaries in Asia—including Japan, China, Singapore, and Bali—all hotbeds for innovation in modern design. The houses in this book are readily accessible from Bangkok, Phuket, and Chiangmai. They reflect a wide variety of concerns and solutions, such as: sustainability; responses to climate; strategies for cooling with minimal electricity; openness versus security in a large metropolis such as Bangkok; cultural sensitivity and responsiveness, as evidenced in a three-generation house, built for a society in which the extended family is still prevalent; and cultural memory, as in the use of elements such as pilings, verandahs, and steeply pitched roofs with large overhangs that echo traditional Thai designs. Nurtured by an increasingly knowledgeable and wealthy clientele, modern architecture in Thailand is emerging with a variety of innovative architectural expressions.

Treatment of Human Parasitosis in Traditional Chinese Medicine Heinz Mehlhorn, Zhongdao Wu, Bin Ye, 2013-09-30 This book intensively examines the efficacy of plant-derived products that have been used for over a thousand years by practitioners of so-called Traditional Chinese Medicine in the light of recent chemotherapeutics. The chapters were written by renowned Chinese medical researchers and are supplemented by results obtained in German antiparasitic research projects. Parasites and emerging diseases are a major threat of our time, which is characterized by an enormous increase in the size of the human population and by an unbelievably rapid globalization that has led to the daily transport of millions of humans and containers with goods from one end of the earth to the other. Furthermore the slow but constant global warming offers new opportunities for many agents of diseases to become established in new areas. Therefore it is essential that we develop precautions in order to avoid epidemics or even pandemics in overcrowded megacities or at the large-scale farm animal confinements that are needed to secure a steady flow of food in the crowded regions of the world. Of course intensive research in the field of chemotherapy since 1900 has produced unbelievable breakthroughs in therapies for formerly untreatable and thus deadly diseases. However, a large number of untreatable diseases remain, as well as a constantly growing number of agents of disease that have developed resistances to standard chemical compounds. As such, it is not only worthwhile but also vital to consider the enormous amounts of information that have been obtained by human “high cultures” in the past. Examples from the past (like quinine) or present (like artemisinin, a modern antimalarial drug) show that plant extracts may hold tremendous potential in the fight against parasites and/or against vector-transmitted agents of diseases.

**Medical Parasitology** Abhay R. Satoskar, 2009-11-23 Infections caused by parasites are still a major global health problem. Although parasitic infections are responsible for a significant morbidity and mortality in the developing countries, they are also prevalent in the developed countries. Early diagnosis and treatment of a parasitic infection is not only critical for preventing morbidity and mortality individually but also for reducing the risk of spread of infection in the community. This concise book gives an overview of critical facts for clinical and laboratory diagnosis, treatment and prevention of parasitic diseases which are common in humans and which are most likely to be encountered in a clinical practice. This book is a perfect companion for primary care physicians, residents, nurse practitioners, medical students, paramedics, other public health care personnel and as well as travelers.
