

Das Armenische Tempus Und Modussystem Synchronie U

Berthold Delbrück

Das armenische Tempus- und Modusystem Gohar Gasparyan, 2000 Ziel dieser Arbeit ist die vergleichende synchrone Darstellung des alt- und neuarmenischen Tempus-Aspekt-Modusystems und seine diachrone Analyse. Bei der Beurteilung der Vorgeschichte des altarmenischen Verbalsystems ist die dialektgeographische Position des Armenischen im Verhältnis zum Griechischen, Phrygischen und Arischen in der sogenannten sudostindogermanischen Gruppe ebenso von Belang wie die Frage nach dem relativen Alter des durch diese Gruppe repräsentierten Tempus-Aspekt-Modusystems im Vergleich zu den anderen indogermanischen Sprachen (Latein, Slawisch, Baltisch, Tocharisch und vor allem dem früh ausgegliederten Anatolischen). Ein Schwerpunkt der Untersuchung ist die Analyse des Verhältnisses der Kategorie Modus zu Aspekt und Tempus im Armenischen einerseits und der Vergleich des armenischen Aspektsystems mit dem durch das Griechische repräsentierten aspect flexionnel (point vs. ligne) und dem durch das Slawische repräsentierten aspect syntagmatique andererseits (vollendet vs. unvollendet bzw. abgeschlossen vs. nicht abgeschlossen). Im Zentrum der Untersuchung steht die Modusverwendung. Der Aufbau des Verbalsystems machte jedoch die zusätzliche Berücksichtigung des Tempus nötig. Auch die Aspektkategorie war zu berücksichtigen, da die modalen Kategorien oft nur durch ihren aspektuellen Charakter kontrastieren. Die Textquellen der vorliegenden Arbeit stammen aus dem 5. Jahrhundert. Die altarmenische Literatur des 5. Jahrhunderts hat unmittelbar nach der Erfindung des armenischen Alphabets im Jahr 407 eine hohe und klassische Stufe erreicht. Diese Epoche wird wegen der klassischen und reinen Sprache goldenes Zeitalter genannt. Ausser der Bibelübersetzung gibt es aus dieser Zeit zahlreiche weitere Originalschriften verschiedener Autoren mit historischen und theologischen Inhalten.

Quantitative Historical Linguistics Gard B. Jensen, Barbara McGillivray, 2017-09-22 This book is an innovative guide to quantitative, corpus-based research in historical and diachronic linguistics. Gard B. Jensen and Barbara McGillivray argue that, although historical linguistics has been successful in using the comparative method, the field lags behind other branches of linguistics with respect to adopting quantitative methods. Here they provide a theoretically agnostic description of a new framework for quantitatively assessing models and hypotheses in historical linguistics, based on corpus data and using case studies to illustrate how this framework can answer research questions in historical linguistics. The authors offer an in-depth explanation and discussion of the benefits of working with quantitative methods, corpus data, and corpus annotation, and the advantages of open and reproducible research. The book will be a valuable resource for graduate students and researchers in historical linguistics, as well as for all those working with linguistic corpora.

Evidence for laryngeals Werner Winter, 2018-03-19

Dictionary of Khotan Saka Harold Walter Bailey, 2010-06-10 The Cambridge University Press published (1945-1967) in six volumes Professor Bailey's transcriptions of Saka manuscripts found in Sin Kiang and Kansu (of the ancient kingdom of Khotan). They are central to any study of Old Iranian and the Iranian dialects; and they are also important for further understanding of the religious tradition in the sacred Avesta of the Zoroastrians, and for the history of the peoples of Central Asia generally. This 1979 dictionary represents the fulfilment of a plan formed in 1934 which required first the editing and transcription of the manuscripts, and then the slow elucidation of the whole corpus of texts. It contains a linguistic analysis and translation of all the Iranian words used in the texts. It is the necessary key to the understanding of the texts, to the mastery of the language itself, and to the linking of Khotan Saka into the Indo-European linguistic tradition.

Mír Curad Lisi Oliver, Jay H. Jasanoff, Harold Craig Melchert, 1998

Vergleichende Syntax der indogermanischen Sprachen Berthold Delbrück, 2009-11-26 Karl Brugmann originally intended to include a volume on syntax in his comparative grammar of Indo-European, but as that ambitious project expanded, he and his publisher enlisted Berthold Delbrück (1842-1922) to take on the treatment of syntax. Delbrück's three volumes on inflection and phrase and sentence structure appeared between 1893 and 1900 and remain the fullest treatment of Indo-European syntax to this day. In this, his first volume, Delbrück gives an overview of the prevailing academic positions in the field of Indo-European comparative syntax of his day. He applies the Neogrammarian methodology used by Brugmann, and meticulously presents data relating to nouns, the case system, adjectives, pronouns, numerals, adverbs and prepositions, giving particular attention to the ablative and the dative in a number of Indo-European languages.

African Languages Bernd Heine, Derek Nurse, 2000-08-03 An accessible introduction to African languages and linguistics, covering language typology, linguistic structures and sociolinguistics.

Grammatical theory Stefan Müller, 2018 This book introduces formal grammar theories that play a role in current linguistic theorizing (Phrase Structure Grammar, Transformational Grammar/Government & Binding, Generalized Phrase Structure Grammar, Lexical Functional Grammar, Categorical Grammar, Head-Driven Phrase Structure Grammar, Construction Grammar, Tree Adjoining Grammar). The key assumptions are explained and it is shown how the respective theory treats arguments and adjuncts, the active/passive alternation, local reorderings, verb placement, and fronting of constituents over long distances. The analyses are explained with German as the object language. The second part of the book compares these approaches with respect to their predictions regarding language acquisition and psycholinguistic plausibility. The nativism hypothesis, which assumes that humans possess genetically determined innate language-specific knowledge, is critically examined and alternative models of language acquisition are discussed. The second part then addresses controversial issues of current theory building such as the question of flat or binary branching structures being more appropriate, the question whether constructions should be treated on the phrasal or the lexical level, and the question whether abstract, non-visible entities should play a role in syntactic analyses. It is shown that the analyses suggested in the respective frameworks are often translatable into each other. The book closes with a chapter showing how properties common to all languages or to certain classes of languages can be captured.

Polysemy in Cognitive Linguistics H. Cuyckens, Britta Zawada, 2001-01-01 In Cognitive Linguistics, polysemy is regarded as a categorizing phenomenon; i.e., related meanings of words form categories centering around a prototype and bearing family

resemblance relations to one another. Under this polysemy = categorization view, the scope of investigation has been gradually broadened from categories in the lexical and lexico-grammatical domain to morphological, syntactic, and phonological categories. The papers in this volume illustrate the importance of polysemy in describing these various categories. A first set of papers analyzes the polysemy of such lexical categories as prepositions and scalar particles, and looks at the import of polysemy in frame-based dictionary definitions. A second set shows that noun classes, case, and locative prefixes constitute meaningful and polysemous categories. Three papers, then, pay attention to polysemy from a psychological perspective, looking for psychological evidence of polysemy in lexical categories.

A History of Reading in the West Guglielmo Cavallo, Roger Chartier, 1999 Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

Anaphora and Definite Descriptions Jaakko Hintikka, J. Kulas, 1985-08-31 In order to appreciate properly what we are doing in this book it is necessary to realize that our approach to linguistic theorizing differs from the prevailing views. Our approach can be described by indicating what distinguishes it from the methodological ideas current in theoretical linguistics, which I consider seriously misguided. Linguists typically construe their task in these days as that of making exceptionless generalizations from particular examples. This explanatory strategy is wrong in several different ways. It presupposes that we can have intuitions about particular examples, usually examples invented by the linguist himself or herself, reliable and sharp enough to serve as a basis of sharp generalizations. It also presupposes that we cannot have equally reliable direct access to general linguistic regularities. Both assumptions appear to me extremely dubious, and the first of them has in effect been challenged by linguists like Dwight Bolinger. There is also some evidence that the degree of unanimity among linguists is fairly low when it comes to less clear cases, even in connection with such relatively simple questions as grammaticality (acceptability). For this reason we have tried to rely more on quotations from contemporary fiction, newspapers and magazines than on linguists' and philosophers' ad hoc examples. I also find it strange that some of the same linguists as believe that we all possess innate ideas about general characteristics of humanly possible grammars assume that we can have access to them only via their particular consequences.

Not Like a Native Speaker Rey Chow, 2014-09-23 Although the era of European colonialism has long passed, misgivings about the inequality of the encounters between European and non-European languages persist in many parts of the postcolonial world. This unfinished state of affairs, this lingering historical experience of being caught among unequal languages, is the subject of Rey Chow's book. A diverse group of personae, never before assembled in a similar manner, make their appearances in the various chapters: the young mulatto happening upon a photograph about skin color in a popular magazine; the man from Martinique hearing himself named Negro in public in France; call center agents in India trained to Americanize their accents while speaking with customers; the Algerian Jewish philosopher reflecting on his relation to the French language; African intellectuals debating the pros and cons of using English for purposes of creative writing; the translator acting by turns as a traitor and as a mourner in the course of cross-cultural exchange; Cantonese-speaking writers of Chinese contemplating the politics of food consumption; radio drama workers straddling the forms of traditional storytelling and mediated sound broadcast. In these riveting scenes of speaking and writing imbricated with race, pigmentation, and class demarcations, Chow suggests, postcolonial languaging becomes, de facto, an order of biopolitics. The native speaker, the fulcrum figure often accorded a transcendent status, is realigned here as the repository of illusory linguistic origins and unities. By inserting British and post-British Hong Kong (the city where she grew up) into the languaging controversies that tend to be pursued in Francophone (and occasionally Anglophone) deliberations, and by sketching the fraught situations faced by those coping with the specifics of using Chinese while negotiating with English, Chow not only redefines the geopolitical boundaries of postcolonial inquiry but also demonstrates how such inquiry must articulate historical experience to the habits, practices, affects, and imaginaries based in sounds and scripts.

Adopting the Song of Appearance: An Psychological Symphony within **Das Armenische Tempus Und Modussystem Synchrones U**

In a world used by monitors and the ceaseless chatter of quick connection, the melodic elegance and psychological symphony developed by the written term often diminish into the background, eclipsed by the relentless sound and disruptions that permeate our lives. But, set within the pages of **Das Armenische Tempus Und Modussystem Synchrones U** a charming fictional prize filled with natural thoughts, lies an immersive symphony waiting to be embraced. Constructed by a wonderful composer of language, that interesting masterpiece conducts visitors on a mental trip, skillfully unraveling the concealed melodies and profound impact resonating within each cautiously constructed phrase. Within the depths with this emotional evaluation, we can investigate the book's central harmonies, analyze their enthralling publishing model, and surrender ourselves to the profound resonance that echoes in the depths of readers' souls.
