The Zohar Michael Laitman, 2009-01-01 The wisdom of Kabbalah teaches us how to perceive and live in the reality that spreads before us. It is a systematic method that has evolved over thousands of years, nurtured by individuals whose task was to ensure that the true wisdom would be given to those ready to receive it. The Book of Zohar (The Book of Radiance) is an ageless source of wisdom and the basis for all Kabbalistic literature. Since its appearance nearly 2,000 years ago, it has been the primary, and often only, source used by Kabbalists. Written in a unique and metaphorical language. The Book of Zohar enriches our understanding of reality and expands our worldview. However, this text should not be read in an ordinary fashion. We should patiently and repeatedly read and think about each sentence as we try to penetrate the author's feelings. We should read it slowly and try to extract the nuances of the text. Although the text deals with one subject only-how to relate to the Creator-it approaches it from different angles. This allows each of us to find the particular phrase or word that will carry us into the depths of this profound and timeless wisdom.

Kant and the Problem of Metaphysics Martin Heidegger, A new 2024 translation of Heidegger's early work Kant and the Problem of Metaphysics, originally published in 1910. This edition contains a new afterword by the translator, a timeline of Heidegger's life and works, a philosophic index of core Heideggerian concepts and a guide for Existentialist terminology across 19th and 20th century Existentialists. This translation is designed for readability and accessibility to Heidegger's enigmatic and dense philosophy. Complex and specific philosophic terms are translated as literally as possible and academic footnotes have been removed to ensure easy reading. Heidegger's analysis of Kant's Epistemology (specifically his three critiques) is rooted in the Heideggerian concept of fundamental ontology, which he defines as the ontological analysis of finite human existence that prepares the ground for metaphysics. This idea is distinct from all forms of anthropology, including philosophical anthropology. Heidegger's aim is to show that the identified ontological analysis of Dasein (a term he famously uses to refer to human existence or being-there) is a necessary condition for understanding the fundamental question: What is man? Heidegger emphasizes the role of transcendental imagination in Kant's philosophy, which he sees as crucial for linking the categories of metaphysics with the phenomenon of time. This connection, according to Heidegger, is central to understanding Kant's approach to metaphysics. He argues that Kant's Critique of Pure Reason should be interpreted as a foundational text for metaphysics, suggesting that it presents the problem of metaphysics as that of a fundamental ontology. Heidegger emphasizes the importance of understanding what foundation means in this context, likening it to the design of a building plan that includes instructions on how and on what the building should be founded. In this analogy, metaphysics is not an existing building, but is inherent in all human beings as a natural disposition. As with all of Heidegger's works, the concept of time and its relation to human cognition and understanding is the crux of his metaphysical project, and his criticism and praise of Kant. He proposes that Kant's work represents a shift in the traditional approach to metaphysics, from a focus on what is to a

focus on how human beings understand and interact with the world. This shift, according to Heidegger, is indicative of a deeper, more fundamental level of inquiry into the nature of being and existence, which he believes is essential for a true understanding of metaphysics. In this sense, Kant is a critical nexus point in the history of Philosophy, representing a seismic shift.

The Unity of the Nations Pope Benedict XVI,Joseph Ratzinger,2015-03-20 What did ancient Christians and pagans believe makes the unity of the nations? Just as he began serving as a major adviser at the Second Vatican Council in 1962, Joseph Ratzinger (the future Pope Benedict XVI) studied this question in lectures delivered at Austria's University of Salzburg. These lectures, originally published in German, are now made available in English in this volume.

The Script of Humanism James Wardrop,1963

Orthodoxy Paul Evdokimov,2011 Originally published in 1965, Evdokimov's *Orthodoxy* presents a synthesis of the essential elements of Orthodox traditions as they appear throughout Church history - revealing the fruit born from the Russian diaspora in Western Europe and the interface of Orthodoxy with both the Christian and atheist West. Evdokimov quotes the 'Father' in order to bring their wisdom to bear on the modern spirit and in modern discourse. Rooting things in the anthropological teaching that 'God became human so that humans might become God,' Evdokimov considers asceticism, mysticism, ecclesiology, the faith of the Church, the prayer of the Church, and Eschaton or 'Last Things.' In his preface to the 1979 edition, Olivier Clément wrote that Evdokimov's descriptions of the Last Things show that the 'eschatological process is already at work' and that 'the Parousia will not be the return of Christ into the world but the passing over of the world into Christ ... Evdokimov appeals to a saintliness that is both kenotic and creative, humble but capable of radiating life into all the complexity of history ... [He speaks] to all who desire not accommodations between churches, whether diplomatic or whatever people are willing to settle for, but the centre where the Lines converge.' Book jacket.

The Religious and the Political Bryan S. Turner,2013-04-18 While the relationships between ethics and religion, and violence and politics, are of enduring interest, the interface between religion and violence is one of the most problematic features of the contemporary world. Following in the tradition of Max Weber's historical and comparative study of religions, this book explores the many ways in which religion and politics are both combined and separated across different world religions and societies. Through a variety of case studies including the monarchy, marriage, law and conversion, Bryan S. Turner explores different manifestations of secularization, and how the separation of church and state is either compromised or abandoned. He considers how different states manage religion in culturally and religiously diverse societies and concludes with a discussion of the contemporary problems facing the liberal theory of freedom of religion. The underlying theoretical issue is the conditions for legitimacy of rule in modern societies experiencing global changes.

New Testament Manuscripts Thomas J Kraus,Tobias Nicklas,2006-05-01 This book comprises twelve essays dealing with manuscripts of the New Testament and/or what we can learn from them today. The Cube and the Face Georges Didi-Huberman,2015 This monograph of French art theorist and philosopher Georges Didi-Huberman centers around a single sculpture: Alberto Giacometti's *Cube* from 1934 (Kunsthaus Zurich), possibly his most peculiar and atypical creation, being his only

abstract sculptural work within a wider oeuvre, which consistently had the exploration of reality as its main objective. By conducting a meticulous formal analysis of the sculpture, and consulting sketches, etchings, other sculptural works and texts of Giacometti originating from 1932 to 1935, the formative years of *Cube*, Didi-Huberman unwinds a net of questions, hypotheses, and historical contextualizations in which he envelops his investigation to unfold for the reader a wide spectrum of new perspectives. *Cube*, as it turns out, marks an exception. It is a self-containing work, barred from any stylistic kinship and functions prismatically at the same time, delineates Giacometti's transition from his surrealist to his realist phase and thus contains in nuce principles which underlie his entire aesthetic understanding: the relation of the body to geometry, the problem of dimensionality, the separation between face and skull, the question of the portrait, which, in regards to this sculpture, prompts Didi-Huberman to develop the new notion of an abstract anthropomorphism. Referencing the works of Freud, Bataille, Leiris and Carl Einstein, which had a lasting influence on Giacometti as well, this study presents the reader with an exuberant plurality of methodological approaches and readings. Out of a newly arising sensibility for a formal analysis, Didi-Huberman develops his very own anthropological perspective on the notion of the image.

Russian Religious Thought Judith Deutsch Kornblatt, Richard F. Gustafson, 1996 Contains 11 essays on four seminal thinkers from the modern Russian tradition: Vladimir Soloviev (1853-1900), Pavel Florensky (1882-1937), Sergei Bulgakov (1871-1944), and Semen Frank (1877-1950). Despite their various approaches they all share the predominant dual focus of most Russian religious thought on the doctrines of Incarnation and Deification, and the attendant stress on moral and social issues, the philosophy of history, and the relation of religion and culture. Mystic Chords of Memory Michael Kammen, 2011-08-17 *Mystic Chords of Memory* Illustrated with hundreds of well-chosen anecdotes and minute observations . . . Kammen is a demon researcher who seems to have mined his nuggets from the entire corpus of American cultural history . . . insightful and sardonic. —Washington Post Book World In this ground-breaking, panoramic work of American cultural history, the Pulitzer Prize-winning author of *A Machine That Would Go of Itself* examines a central paradox of our national identity How did the land of the future acquire a past? And to what extent has our collective memory of that past—as embodied in our traditions—have been distorted, or even manufactured? Ranging from John Adams to Ronald Reagan, from the origins of Independence Day celebrations to the controversies surrounding the Vietnam War Memorial, from the Daughters of the American Revolution to immigrant associations, and filled with incisive analyses of such phenomena as Americana and its collectors, historic villages and Disneyland, *Mystic Chords of Memory* is a brilliant, immensely readable, and enormously important book. Fascinating . . . a subtle and teeming narrative . . . masterly. —Time This is a big, ambitious book, and Kammen pulls it off admirably. . . . [He] brings a prodigious mind and much scholarly rigor to his task . . . an important book—and a revealing look at how Americans look at themselves. —Milwaukee Journal

Five Stages of Greek Religion Gilbert Murray, 2021-12-09 The book *Five Stages of the Greek Religion* follows the establishment development of the religion from the very first Greek beliefs through creating the Olympic Pantheon to the early stages of Christianity. The authors prove the universal truth that the essence of the beliefs remains the same. The contemporary Greeks celebrate the resurrection of Christ with the same emotion as they

celebrated the rebirth of the Greek gods, as a metaphor for the natural cycles of season change. The book is dedicated to finding the universal laws of the development of human beliefs.

Arguments Within English Marxism Perry Anderson, 2016-02-23 The characteristic form taken by English Marxism since the war has been the study of history. No writer exemplifies its achievements better than Edward Thompson, whose *Making of the English Working Class* is probably the most influential single work of historical scholarship by a socialist today. An editor of *The New Reasoner* in 1957–59, a founder of the New Left in 1960, now an eloquent champion of civil rights, Thompson has most recently aroused widespread interest with the appearance of his *Poverty of Theory*, which combines philosophical and political polemic with Louis Althusser, and powerful advocacy of the historian's craft. *Arguments Within English Marxism* is an assessment of its central theses that relates them to Thompson's major historical writings themselves. Thus the role of human agency—the part of the conscious choice and active will—in history is discussed through consideration of its treatment in *The Making of the English Working Class*. The problems of base and superstructure in historical materialism, and of affiliation to values in the past, are reviewed in the light of *Whigs and Hunters*. The claims of utopian imagination are illustrated from the findings of William Morris. Questions of socialist strategy are broached in part through the articles now collected in *Writing by Candlelight*. Exploring at once differences and convergences between *New Left Review* and one of its founders, the essay concludes by suggesting the virtues of diversity within a common socialist culture.

The House of Life Mario Praz, 2009-10-15 In simplest terms, it is a house tour, but Mario Praz's Roman apartment was no ordinary house it was a *wunderkammer*, a house of wonders, rooms replete with objects d'art and sculpture, walls hung with paintings and prints, bureaus overflowing with postcards and ephemera. And Praz is no ordinary guide; he leads you, the reader, through each room discussing the objects therein. What emerge are his passions, his immense erudition, his insatiable curiosity, his undeniable amiability, his infectious enthusiasm. What emerges is a multi-layered disquisition on the nature of art, on the challenge of investigation and discovery, on the way in which art and the objects we choose to surround us tell stories.
