Students: Within this textbook, you will find all the necessary formulas for
all math & physics courses you will take in college as a STEM major. I have
gone through over 20 textbooks and extracted every equation and formula
needed for you to quickly reference so you are not scouring the internet or
flipping pages. I hope it is helpful for you. I also have created thousands
of lessons covering the common questions asked in any of the following
courses via <https://youtube.com/codinghumans>. College Algebra, Trigonometry,
PreCalculus, Differential Calculus, Integral Calculus, Several Variable
Calculus, Multivariable Calculus, Business Calculus, Linear Algebra, Matrix
Algebra, Differential Equations, Physics, and more. I have also included tips
& tricks that many students overlook during lectures. Have a great semester!
Try not to get stressed or overwhelmed; remember, we all get stressed and
overwhelmed. (Also- the one answering all the questions in the front of the
class is the one retaking the course.) The biggest mistake students make when
attempting to solve a physics problem is reading the question. Author
