

Ecd Diploma At Unisa

Educational Technology

Education Management in Early Childhood Development ,2007 This title presents the management of Early Childhood Development (ECD) centres for children from birth to nine years old.

Education for sustainable development in BRICS Ewelina K. Niemczyk,2023-03-01 In the past ten years, the concept of education for sustainable development has become one of UNESCO's key educational initiatives to address current global challenges. However, the attention was mainly devoted to primary and secondary education, and higher education was somewhat neglected. The primary focus on basic education has also diverted academic attention from the research exploring the relationship between higher education and sustainable development. Only recently has the academic discourse on this topic begun to gain ground. On that note, this book is meant to place higher education at the core of the necessary transformations to create awareness of more sustainable practices and policies.

Unisa Latin American Report ,1993

South African Directory of Black Managers ,1997

Empowering Students and Maximising Inclusiveness and Equality through ICT ,2021-04-06 This book deals with access to participation in education as a potential to construct inclusiveness and equality.

Interim Policy for Early Childhood Development South Africa. Department of Education,1996

Critical Issues in South African Education Charl C. Wolhuter,2020-12-31 The main thesis of this book is that, given that South African education faces major challenges, the BRICS (Brazil, Russia, India, China and South Africa) constellation of states offers – thus far overlooked – a valuable tertium comparationis, a source of international comparative perspectives, to inform the domestic scholarly discourse on education. This book first investigates the national contexts and development of education in the BRICS countries, arguing that this grouping represents a valuable but yet overlooked field for illuminating South African education issues with international perspectives. The book consists of chapters arguing for and illustrating this thesis from a variety of angles. Common to all chapters is

that authors used the comparative method in education, that is comparing the national education system, in their education societal context interrelationships, of the BRICS countries. The chapters focus on a number of critical issues in South African education, including the language of learning and teaching issue, the alignment of the world of education with the world of work, early childhood education, and the development of world-class universities. Regarding the last, for example, China has been the terrain of the most intensive national projects of establishing world-class universities, with Project 985, Project 211, and the “Double First Class University” project. The chapters demonstrate what South Africa, in approaching her education issues, can learn from the experience of the BRICS countries.

An Introduction to Communication Studies Sheila Steinberg, 2007 In this introductory textbook, the author contextualises approaches and theories on communication studies by making use of local examples from the mass media, as well as relevant political and social experiences. The book is divided into two parts. The first provides students with a strong foundation in communication while the

second focuses on the areas of specialisation within communication studies. Each chapter starts with the learning Outcomes and a short overview of the chapter. Students can monitor their learning by using the summaries and 'test yourself' questions at the end of every chapter. Scenarios provide examples of how the theory can be applied in practice. This makes for a learner-friendly and accessible book which will prove invaluable to Students and professionals alike. Beginner students majoring in Communication Studies, as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful.

Drawing for Civil Engineering Jan A. Van Der Westhuizen,2000 Commencing with the fundamentals of drawing and continuing with draughting practice and conventions, this textbook emphasizes detailing, rather than the calculations or design of the components.

Educational Documentation, Research and Decision-making Unesco,1999 This collection of national case studies is an attempt to obtain a clearer picture of the relationship between research, information and policy making in the conception of educational policies throughout the world.

Sociology of Education ,1979

Scaling up SDGs Implementation Godwell Nhamo,Gbadebo O. A. Odularu,Vuyo

Mjimba,2020-01-14 This volume challenges global leaders and citizenry to do more in order to resource the implementation of the 2030 Agenda for Sustainable Development (AfSD) and its 17 interwoven Sustainable Development Goals (SDGs). Starting from the concept ‘we cannot manage what we cannot measure’, the book presents some cases showing how to draw national level baselines for the domestication and localisation of the SDGs seeking to provide a clear roadmap towards achieving the 2030 AfSD. Scaling up SDGs Implementation is targeted at the United Nations, national and state governments, sub-national governments, the corporate sector and civil society, including higher education institutes, labour groups, non-governmental organisations and youth movements. The book is cognizant of these institutions’ common, but differentiated responsibilities and

capabilities within their socio-political, environmental and economic conditions. The book presents case studies of how the corporate sector has been scaling up SDGs implementation, from the tourism sector, insurance, to the aviation and agricultural sectors. To make sure that no one is left behind, the volume includes cases on solutions for pressing environmental and socio-economic problems ranging from cooperatives in Brazil to the conservation of springs in Zimbabwe. The matter of finding synergies between the climate SDG and the Paris Agreement's Nationally Determined Contributions (NDCs) is elaborated at length. Lastly, the book discusses how institutions of higher education remain critical pillars in SDGs scaling up, with cases of curriculum re-orientation in South Africa to the rolling out of the Women's University in Africa. In this context, this volume challenges every global citizen and organization to invest every effort into making the implementation of the SDGs a success as we welcome the second four to five year segment down the road to the year 2030.

Full-Service Schools Joy Dryfoos, 1998-03-16 **Full-Service Schools** describes the movement to create an array of integrated support services in schools. It examines the declining welfare of many

American families and prescribes solutions for the problems of increased sex, drugs, violence, and stress among youth.

Construction Materials for Civil Engineering Errol Van Amsterdam,2002-07-11 This publication establishes a basic understanding of materials used in civil engineering construction as taught in tertiary institutions across South Africa. It uses the objectives of the NQF in promoting independent learning and is the only book pertaining to Civil Engineering that covers all the necessary topics under one roof.

Creating Effective Teaching and Learning Spaces Eunice Ndeto Ivala,Zilungile Lungi Sosibo,2021-06-09 Higher education in post-apartheid South Africa was always likely to attract academic interest, and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds. Using examples from higher education institutions across the Southern African Developing Community (SADC) region, this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher

education in these regions, and provides concrete recommendations for the future. The book is sure to appeal to academics from a variety of disciplines - from African, African American and ethnic studies to education and sociology. It will be of particular interest to teacher trainers, administrators and policy-makers working in higher education, and anyone else with a stake in managing cultural diversity in education.

Comparative and International Education C. C. Wolhuter,2019-08-26 This book explores the evolution and current state of the scholarly field of comparative and international education over 200 years of development. Experts in the field explore comparative and international education in each of the major world regions.

Introduction to Development Studies Frik De Beer,Hennie Swanepoel,2000 Written by Hennie Swanepoel and Frik de Beer(both based in South Africa) this development studies text, first published in 1997, is suitable for all introductory-level courses.

Autism DIKELEDI. MAHLO,Michel Clasquin-Johnson, Edd,Mary G Clasquin-Johnson,

PhD,2021-08-20 This is the first scholarly book on Autism in Africa.
