Imagined Globalization Néstor García Canclini, 2014-03-07 A leading figure in cultural studies worldwide, Néstor García Canclini is a Latin American thinker who has consistently sought to understand the impact of globalization on the relations between Latin America, Europe, and the United States, and among Latin American countries. In this book, newly available in English, he considers how globalization is imagined by artists, academics, migrants, and entrepreneurs, all of whom traverse boundaries and, at times, engage in conflicted or negotiated multicultural interactions. García Canclini contrasts the imaginaries of previous migrants to the Americas with those who live in transnational circuits today. He integrates metaphor and narrative, working through philosophical, anthropological, and socioeconomically grounded interpretations of art, literature, crafts, media, and other forms of expression toward his conclusion that globalization is, in important ways, a collection of heterogeneous narratives. García Canclini advocates global imaginaries that generate new strategies for dealing with contingency and produce new forms of citizenship oriented toward multiple social configurations rather than homogenization. This edition of *Imagined Globalization* includes a significant new introduction by George Yúdice and an interview in which the cultural theorist Toby Miller and García Canclini touch on events including the Arab Spring and Occupy Wall Street.

Transnationalism from Below Michael Peter Smith, Luis Eduardo Guarnizo, 1998-01-01 Expansion of transnational capital and mass media to even the remotest of places has provoked a spate of discourse on transnationalism. A core theme in this debate is the penetration of national cultures and political systems by global and local driving forces. The nation-state is seen as weakened by transnational capital, global media, and emergent supranational political institutions. It also faces the decentering local resistances of the informal economy, ethnic nationalism, and grass-roots activism. *Transnationalism From Below* brings together a rich combination of theoretical and grounded studies of transnational processes and practices, discussing both their positive and negative aspects. The editors examine the scope and limits of transnationalism. The volume is divided into four parts: Theorizing Transnationalism; Transnational Economic and Political Agency; Constructing Transnational Localities; and Transnational Practices and Cultural Reinscription. Contributors include Andre C. Drainville, Josephine Smart, Alan Smart, Minna Nyberg Sørensen, George Fouron, Nina Glick Schiller, Luin Goldring, Sarah J. Mahler, Linda Miller Matthei, Louisa Schein, David A. Smith, and Robert C. Smith. Moving easily between micro and macro analyses, this book expands the boundaries of the current scholarship on transnationalism, locates new forms of transnational agency, and poses provocative questions that challenge prevailing interpretations of globalization. *Transnationalism From Below* is a pioneering collection that will make a significant addition to the libraries of anthropologists, sociologists, international relations specialists, urban planners, political scientists, and policymakers.

Communities in Globalization Juan Pablo Pérez Sáinz, Katharine Andrade-Eekhoff, 2003 There is a silent globalization being carried out far below the action of multinational firms, international organizations, and state policies. It is the work of societies--communities of determined and creative people. *Communities in Globalization* richly illustrates the experiences of three Central American communities connected with global markets. The unique perspective of each is developed to show the economic, political-institutional, and social effects of its connection with world trade. Ultimately, this book seeks to identify the resources that allow a community to face globalization while minimizing risks and maximizing opportunities.

Technopoles of the World Manuel Castells, Peter Hall, 1994 This book is the first systematic survey of technopoles in all its manifestations: science parks, science cities, national technopolis and technobelt programmes. Detailed case studies, ranging from Silicon Valley to Siberia and from the M4 Corridor to Taiwan, relate how global technopoles have developed, what each is striving to achieve and how well it is succeeding.--Back cover.

Democracy, Education, and Multiculturalism Carlos Alberto Torres, 1998-10-29 This important book looks at developments that are changing our understanding of the role of education in citizenship and the possibilities of democratic participation. The chapters cover theories of citizenship and education and the transition from the welfare state to the neoliberal state, and draw on Hobbes, Locke, Jefferson, Kant, Hegel, Marx and other writers such as C. Mouffe and C. Pateman to outline contemporary approaches to multiculturalism in education and citizenship.

States Against Markets Robert Boyer, Daniel Drache, 2005-08-15 This work challenges the popular view that globalization threatens the role of the nation-state in determining national policy. It examines the fundamental issue of competitiveness and market power in an increasingly borderless and co-dependent world. Despite this increased threat to the nation-state as an effective manager of the national economy, the authors argue that there are a number of options and alternatives open to governments to protect themselves from the global business cycle.

Education, Power, and Personal Biography Carlos Alberto Torres, 1997-12-03 In dialogues with key thinkers in the area of critical education, this book documents how a tradition of study grew in the United States.

Through in-depth interviews, the author asks each of these thinkers to talk about the relationship between their personal experiences and their academic work. The reader will learn, through listening to these int

Globalisation and Trade Oliver Morrissey,Igor Filatotchev,2001 The papers collected in this volume report the results of research on issues dealing with the failure of globalization to benefit poor countries. They explain how exports could be improved for these countries and reveal the role that UK supermarkets play in African poverty.

Global Climate Policy Urs Luterbacher,Detlef F. Sprinz,2018-08-14 Analyses of the international climate change regime consider the challenges of maintaining current structures and the possibilities for creating new forms of international cooperation. The current international climate change regime has a long history, and it is likely that its evolution will continue, despite such recent setbacks as the decision by President Donald Trump to withdraw the United States from the Paris Agreement of 2015. Indeed, the U.S. withdrawal may spur efforts by other members of the international community to strengthen the Paris accord on their own. This volume offers an original contribution to the study of the international political context of climate change over the last three decades, with fresh analyses of the current international climate change regime that consider both the challenges of maintaining current structures and the possibilities for creating new forms of international cooperation. The contributors are leading experts with both academic and policy experience; some are advisors to governments and the Climate Secretariat itself. Their contributions combine substantive evidence with methodological rigor. They discuss such topics as the evolution of the architecture of the climate change regime; different theoretical perspectives; game-theoretical and computer simulation approaches to modeling outcomes and assessing agreements; coordination with other legal regimes; non-state actors; developing and emerging countries; implementation, compliance, and effectiveness of agreements; and the challenges of climate change mitigation after the Paris Agreement. Contributors Michaël Aklin, Guri Bang, Daniel Bodansky, Thierry Bréchet, Lars Brückner, Frank Grundig, Jon Hovi, Yasuko Kameyama, Urs Luterbacher, Axel Michaelowa, Katharina Michaelowa, Carla Norrlof, Matthew Paterson, Lavanya Rajamani, Tora Skodvin, Detlef F. Black Costa Rica Paola Ravasio,2020-08-24 The book you hold in your hands is an interdisciplinary study on diaspora literacy in Afro-Central America. An exploration through various imaginings of times past, this study is concerned with how oxymoron, metonymy, and multilingualism deploy pluricentric belonging. By exploring the interlocking of multiple roots that have developed on account of routes, rhizomatic historical imaginations are unearthed here so as to imagine an other Costa Rica. A Black Costa Rica.

End of Millennium Manuel Castells,1998-02-11 The final volume in Manuel Castells' trilogy is devoted to processes of global social change induced by interaction between networks and identity.

Upside Down Eduardo Galeano,2014-05-13 From the winner of the first Lannan Prize for Cultural Freedom, a biting funny, kaleidoscopic vision of the first world through the eyes of the third Eduardo Galeano, author of the incomparable Memory of Fire Trilogy, combines a novelist's intensity, a poet's lyricism, a journalist's fearlessness, and the strong judgments of an engaged historian. Now his talents are richly displayed in Upside Down, an eloquent, passionate, sometimes hilarious exposé of our first-world privileges and assumptions. In a series of lesson plans and a program of study about our beleaguered planet, Galeano takes the reader on a wild trip through the global looking glass. From a master class in The Impunity of Power to a seminar on The Sacred Car--with tips along the way on How to Resist Useless Vices and a declaration of The Right to Rave--he surveys a world unevenly divided between abundance and deprivation, carnival and torture, power and helplessness. We have accepted a reality we should reject, Galeano teaches us, one where machines are more precious than humans, people are hungry, poverty kills, and children toil from dark to dark. A work of fire and charm, Upside Down makes us see the world anew and even glimpse how it might be set right. Galeano's outrage is tempered by intelligence, an ineradicable sense of humor, and hope. -Los Angeles Times, front page

Scar Sara Mesa,2017-08-25 Sonia meets Knut in an online literary forum and begins a long-distance relationship with him that gradually turns to obsession. Though Sonia needs to create distance when Knut becomes too absorbing, she also yearns for a less predictable existence. Alternately attracted to and repulsed by Knut, Sonia begins a secret double life of theft and betrayal in which she will ultimately be trapped for years.

Pigmentocracies Edward Telles,2014-10-22 Pigmentocracies--the fruit of the multiyear Project on Ethnicity and Race in Latin America (PERLA)--is a richly revealing analysis of contemporary attitudes toward ethnicity and race in Brazil, Colombia, Mexico, and Peru, four of Latin America's most populous nations. Based on extensive, original sociological and anthropological data generated by PERLA, this landmark study analyzes ethnoracial classification, inequality, and discrimination, as well as public opinion about Afro-descended and indigenous social movements and policies that foster greater social inclusiveness, all set within an ethnoracial

history of each country. A once-in-a-generation examination of contemporary ethnicity, this book promises to contribute in significant ways to policymaking and public opinion in Latin America. Edward Telles, PERLA's principal investigator, explains that profound historical and political forces, including multiculturalism, have helped to shape the formation of ethnic identities and the nature of social relations within and across nations. One of Pigmentocracies's many important conclusions is that unequal social and economic status is at least as much a function of skin color as of ethnoracial identification. Investigators also found high rates of discrimination by color and ethnicity widely reported by both targets and witnesses. Still, substantial support across countries was found for multicultural-affirmative policies--a notable result given that in much of modern Latin America race and ethnicity have been downplayed or ignored as key factors despite their importance for earlier nation-building.

Guidelines on Occupational Safety and Health Management Systems International Labour Office,2001 These guidelines have been prepared by the International Labour Office in order to assist employers and national organisations with practical advice on implementing and improving occupational safety and health (OSH) management systems, in order to reduce work-related injuries, occupational ill health and diseases and unsafe working conditions. The guidelines may be applied on two levels: they provide a national OSH framework for legal and voluntary regulatory standards; and encourage the integration of OSH management principles with overall policy management at the organisational level.

Economic Sociology Alejandro Portes,2010-04-19 The sociological study of economic activity has witnessed a significant resurgence. Recent texts have chronicled economic sociology's nineteenth-century origins while pointing to the importance of context and power in economic life, yet the field lacks a clear understanding of the role that concepts at different levels of abstraction play in its organization. Economic Sociology fills this critical gap by surveying the current state of the field while advancing a framework for further theoretical development. Alejandro Portes examines economic sociology's principal assumptions, key explanatory concepts, and selected research sites. He argues that economic activity is embedded in social and cultural relations, but also that power and the unintended consequences of rational purposive action must be factored in when seeking to explain or predict economic behavior. Drawing upon a wealth of examples, Portes identifies three strategic sites of research--the informal economy, ethnic enclaves, and transnational communities--and he eschews grand narratives in favor of mid-range theories that help us understand specific kinds of social action. The book shows how the meta-assumptions of economic sociology can be transformed, under certain conditions, into testable propositions, and puts forward a theoretical agenda aimed at moving the field out of its present impasse.

Collective Imaginings Moira Gatens,Genevieve Lloyd,2002-01-22 Why would the work of the 17th century philosopher Benedict de Spinoza concern us today? How can Spinoza shed any light on contemporary thought? In this intriguing book, Moira Gatens and Genevieve Lloyd show us that in spite of or rather because of Spinoza's apparent strangeness, his philosophy can be a rich resource for cultural self-understanding in the present. *Collective Imaginings* draws on recent re-assessments of the philosophy of Spinoza to develop new ways of conceptualising issues of freedom and difference. This ground-breaking study will be invaluable reading to anyone wishing to gain a fresh perspective on Spinoza's thought.
