Italy's Contemporary Politics James L. Newell,2020-12-17 In early 2020 Italy was a country whose political parties stood as significant obstacles in the way of resolution of its social and economic problems. The purpose of this book is to help the reader to understand how Italian politics had reached this point. It does this by tracing the most significant processes of political, economic and social change to have marked Italian history in recent years back to their roots in the Italian political system as it emerged at the end of the Second World War. Starting with the restoration of democracy, the volume discusses the post-war party system and how it came under increasing pressure from the mid-1970s. From there it discusses the political upheavals of the early 1990s and the transformations they led to, the rise and fall of Silvio Berlusconi, and the watershed election of 2018. In short, the book provides a narrative. Narratives tell us who we are, where we have come from, where we are now and where we are going. Without them, we cannot make sense of the world. At the end of this narrative, if it has done its job properly, Italian politics and current affairs should 'make sense' if before they seemed confusing.

Afroasiatic Studies in Memory of Robert Hetzron Charles G. Häberl,2009-05-27 Robert Hetzron first organized the North American Conference on Afroasiatic Linguistics (NACAL) at the University of California, Santa Barbara in 1973 and passed away only six months after it had completed a quarter century of annual meetings. He would undoubtedly have been pleased to know that NACAL is still going strong, and that ten years after his passing it attracted no fewer than thirty-six scholars from the United States, Canada, and eight other countries, who presented on topics near and dear to his heart such as phonology, morphology, syntax, language contact, classification, subgrouping, and the history of scholarship, in languages such as Amharic, Arabic, Aramaic, Egyptian, Hebrew, Omotic, and others, as well as the groups to which they pertain. Since he established it, NACAL has served a unique role among the meetings of learned societies in North America. Only a handful of organizations worldwide hold annual meetings dedicated to Afroasiatic linguistics, and NACAL is one of a very small number of venues where linguists from all sub-disciplines and schools of thought meet to share their research. NACAL is also an academic nexus, a unique node at which graduate students at the beginning of their careers rub shoulders with the native speakers of the languages which they study and with the titans of their fields, men and women of an almost legendary stature such as Hetzron himself. This volume contains sixteen contributions from these scholars, on a broad cross-section of topics within the field of Afroasiatic linguistics.

Patterns and Processes in Forest Landscapes Raffaele Laforzezza,Jiquan Chen,Giovanni Sanesi,Thomas R. Crow,2008-08-30 Increasing evidence suggests that the composition and spatial configuration – the pattern – of forest landscapes affect many ecological processes, including the movement and persistence of particular species, the susceptibility and spread of disturbances such as fires or pest outbreaks, and the redistribution of matter and nutrients. Understanding these issues is key to the successful management of complex, multifunctional forest landscapes, and landscape ecology, based on a foundation of island bio-geography and meta-population dynamic theories, provides the rationale to deal with this pattern-to-process interaction at different spatial and temporal scales. This carefully edited volume represents a stimulating addition to the international literature on landscape ecology and resource management. It provides key insights into some of the applicable landscape ecological theories that underlie forest management, with a specific focus on how forest management can benefit from landscape ecology, and how landscape ecology can be advanced by tackling challenging problems in forest (landscape) management. It also presents a series of case studies from Europe, Asia, North America, Africa and Australia exploring the issues of disturbance, diversity, management, and scale, and with a specific focus on how human intervention affects forest landscapes and, in turn, how landscapes influence humans and their culture. An important reference for advanced students and researchers in landscape ecology, conservation biology, forest ecology, natural resource management and ecology across multiple scales, the book will also appeal to researchers and practitioners in reserve design, ecological restoration, forest management, landscape planning and landscape architecture.

Zen and the Art of Subration Ashoka Annamaya Ishaya,2019-04-15 Zen and the Art of Subration is a three-part masterwork arising from the author's thirty-five-year journey to overcome cultural conditioning and achieve the ultimate transformation: living on light and oxygen. Ashoka Annamaya Ishaya shares an intimate look into how she discovered tantric and Taoist practices for cultivating immortality and integrated them into her life. She follows up this first-person account with a teaching guide distilling knowledge and practices aimed at readers on their own transformative path toward achieving your immortal jing cycle. Ishaya believes that if a critical mass of humans commit to the process of sustainable immortality, we can affect the evolution of our entire species. Ishaya pursues an illuminating range of questions: • Are we as a species destined to be enlightened? • Can we apply mindfulness skills to evolve our physiology? • How can our health-care system better support the maturation of our species? • Can we become an immortal species? The treatise concludes with a scholarly overview of noted prophets from varied traditions and times who have taught and fostered transformation of consciousness and sustainability of culture.

The Wrong World Bertram Brooker,Gregory Betts,2009-09-19 Bertram Brooker won the country's first Governor General's Award for literature in 1936 for his novel Think of the Earth, and his explosive, experimental paintings hang in every major gallery in the country. He was Canada's first multidisciplinary avantgardist, successfully experimenting in literature, visual arts, film, and theatre. Brooker brought all of his experimental ambitions to his short

fiction and prose. The Wrong World presents a rich sampling of his prose work, much of it previously unpublished, which adds new insight into his aesthetic ambitions. Working during an incredible period of transition in Canadian society, Brooker's stories document Canada's evolution from a provincial colony into a modern, urban country. His essays participated in that evolution by advocating a passionate awakening of the arts, the end of prudish sentiment and censorship, and a radical rethinking of the nature of war. They capture the limitations and hypocrisies of the Canadian social contract and argue for a more just and spiritual society. His stories humanize his social vision by dramatizing the psychological and emotional cost of Canada's transition into a modern civilization. In turn devastating, penetrating and poignant, Brooker's prose works offer a sharply focussed window into the turbulent interwar years in Canada.

ELECTRONICS - I K. Shashidhar,2012-05-25 'Electronics-I' is intended to be used as a text book for II Semester Diploma in Electrical and Electronics Engineering. The motivation for writing this book came when I felt the absence of a suitable text for Polytechnic students. This book is meant to fill the void. It is designed for comprehensively covering all topics relevant to the subject. Each and every topic has been explained in a very simple language as per the syllabus prescribed by the Board of Technical Education. To enhance the utility of the book, important points and review questions (Fill in the blank and descriptive type) have been included at the end of each chapter. Model question papers have been provided to help students prepare better for the semester examinations. It is hoped that this book will be of immense use to teachers and students of Polytechnics. Any constructive suggestions from teachers and students for improving the contents will be warmly appreciated.

MSIEID 2022 Haocun Wu,Zhisheng Wang,Sikandar Ali Qalati,2023-03-14 The Management Science Informatization and Economic Innovation Development Conference is a leading conference held annually. Microsoft Virtualization Thomas Olzak,James Sabovik,Jason Boomer,Robert M Keefer,2010-06-04 Microsoft Virtualization: Master Microsoft Server, Desktop, Application, and Presentation Virtualization serves a thorough reference for those considering a migration into the virtualized world. It provides the tools and explanations needed to create a fresh virtualization environment. Readers walk through step-by-step instructions on everything from building a Windows 2008 server to installing and configuring Hyper-V and App-V. The book begins with the basics of virtualization, including the role of virtualization in the changing landscape of the traditional data center and its benefits, and the strategies of virtualization. It presents the step-by-step process used to build a Windows 2008 server and the process of configuring and managing a Hyper-V infrastructure. Microsoft's approach to high availability and the combination of Microsoft tools to provide a very reliable and highly available virtualization infrastructure are discussed. The chapters also cover the migration of physical servers to virtual servers; the Dynamic Data Center concept; creating and publishing a virtual application within App-V; and desktop virtualization. This book was intended for seasoned system administrators and engineers who grew up in and still manage primarily a hardware-based server environment containing a large assortment of both newer and legacy applications. Covers Microsoft virtualization products completely, including Hyper-V Includes a special section on securing virtual infrastructure Gives hands-on instructions to help understand and implement Microsoft solutions

Mastering Microsoft Virtualization Tim Cerling,Jeffrey L. Applications of Remote Sensing Data in Mapping of Forest Growing Stock and Biomass José Aranha,2021-09-01 This Special Issue (SI), entitled Applications of Remote Sensing Data in Mapping of Forest Growing Stock and Biomass", resulted from 13 peer-reviewed papers dedicated to Forestry and Biomass mapping, characterization and accounting. The papers' authors presented improvements in Remote Sensing processing techniques on satellite images, drone-acquired images and LiDAR images, both aerial and terrestrial. Regarding the images' classification models, all authors presented supervised methods, such as Random Forest, complemented by GIS routines and biophysical variables measured on the field, which were properly georeferenced. The achieved results enable the statement that remote imagery could be successfully used as a data source for regression analysis and formulation and, in this way, used in forestry actions such as canopy structure analysis and mapping, or to estimate biomass. This collection of papers, presented in the form of a book, brings together 13 articles covering various forest issues and issues in forest biomass calculation, constituting an important work manual for those who use mixed GIS and RS techniques.

Divided We Stand Linda Rizzo,2007 The history of German rearmament and the launch of the European integration process are fascinating as well as challenging. In the early Fifties, the fears about the rise of a new Wehrmacht (TM) and the need to defend the nation-state clashed with the ambition to build an effective Western European defence system and the desire to achieve economic and political integration. These were deeply divisive issues and produced one of the most passionate political debates in post-WWII European history. There were fierce clashes in the various parliaments and in the streets of the main European towns rallies and demonstrations often degenerated into street fights with the police. Going beyond the traditional history of diplomatic relations, Rizzo's (TM)s book offers a comparative examination of the role of non-state actors, such as pressure groups and political parties, and of political actors, such as the military, in France and Italy. Rizzo's (TM)s detailed study of how the main political groupings responded to the question of German rearmament, and of their frequent internal debates is based on a wide range of new primary sources from numerous European archives. This book therefore offers an innovative and stimulating examination of the impact that such debates had on society and on the French and Italian political systems as a whole.
