**Mystifying the Monarch** Jeroen Deploige, Gita Deneckere, 2006 The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority. In *Mystifying the Monarch*, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages to the present day. They demonstrate that, rather than a linear progression where perceptions of rulers moved inexorably from the sacred to the banal, in reality the history of monarchy has been one of constant tension between mystification and demystification.

**Gut Feeling and Digestive Health in Nineteenth-Century Literature, History and Culture** Manon Mathias, Alison M. Moore, 2018-11-17 This book considers the historical and cultural origins of the gut-brain relationship now evidenced in numerous scientific research fields. Bringing together eleven scholars with wide interdisciplinary expertise, the volume examines literal and metaphorical digestion in different spheres of nineteenth-century life. Digestive health is examined in three sections in relation to science, politics and literature during the period, focusing on Northern America, Europe and Australia. Using diverse methodologies, the essays demonstrate that the long nineteenth century was an important moment in the Western understanding and perception of the gastroenterological system and its relation to the mind in the sense of cognition, mental wellbeing, and the emotions. This collection explores how medical breakthroughs are often historically preceded by intuitive models imagined throughout a range of cultural productions.

**Invisible Weapons** M. Cecilia Gaposchkin, 2017-01-17 Throughout the history of the Crusades, liturgical prayer,

masses, and alms were all marshaled in the fight against Muslim armies. In *Invisible Weapons*, M. Cecilia Gaposchkin focuses on the ways in which Latin Christians communicated their ideas and aspirations for crusade to God through liturgy, how public worship was deployed, and how prayers and masses absorbed the ideals and priorities of crusading. Placing religious texts and practices within the larger narrative of crusading, Gaposchkin offers a new understanding of a crucial facet in the culture of holy war.

Passovers of Blood Ariel Toaff,2020-04-25 For centuries, Jews have been accused of something called blood libel or ritual murder: the killing of non-Jews, often children, to use their blood in bizarre religious ceremonies or to make food. For centuries, this has been denied by Jews. But in fact there may be some truth to such claims after all.

**Paths of Integration** Leo Lucassen,David Feldman,Jochen Oltmer,2006 Why do some migrants integrate quickly, while others become long-term minorities? What is the role of the state in the settlement process? To what extent are experiences in the past different from the present? Are the recent migrants really integrating in another way than those in the past? Is Islam indeed an obstacle to integration? These are some of the

burning questions, which dominate the current politicized debate on immigration in Western Europe. In this book, leading historians and social scientists analyze and compare a variety of settlement processes in past and present migration to Western Europe. Identifying general factors in the process of adaptation of new immigrants, the contributors trace social changes effected by recent European immigration, and the parallels with the great American migration of the 1880s-1920s. The history of migration to Western Europe and the way these migrants found their place in the receiving societies, is not only essential to understand the way nations deal with newcomers in the present, but also constitutes a highly interesting laboratory for different paths of integration now and then. By analyzing and comparing a wealth of settlement processes both in the past and in the present this book is both a bold interdisciplinary endeavor, and at the same time the first attempt to identify general factors underlying the way migrants adapt to their new surroundings, as well as how societies change under the influence of immigration. The chapters in the book both look at specific groups in various periods, but also analyses the structure of the state, churches unions and other important organized actors in Western European nation states. Moreover, the results are embedded in the more theoretical American literature on the comparison of old and new migrants. All chapters have an explicit comparative perspective, either by comparing different groups or different periods, whereas the general conclusion ties together the various outcomes in a systematic way, highlighting the main answers to the central questions about the various outcomes of settlement processes. -- Publisher.

The Sainte-Chapelle and the Construction of Sacral Monarchy Meredith Cohen,2015 This book offers a novel perspective on one of the most important monuments of French Gothic architecture, the Sainte-Chapelle, constructed in Paris by King Louis IX of France between 1239 and 1248 especially to hold and to celebrate Christ's Crown of Thorns. Meredith Cohen argues that the chapel's architecture, decoration, and use conveyed the notion of sacral kingship to its audience in Paris and in greater Europe, thereby implicitly elevating the French king to the level of suzerain, and establishing an early visual precedent for the political theories of royal sovereignty and French absolutism. By setting the chapel within its broader urban and royal contexts, this book offers new insight into royal representation and the rise of Paris as a political and cultural capital in the thirteenth century.

**The Crusades** Alan V. Murray,2006-08-30 The first multivolume encyclopedia to document the history of one of the most influential religious movements of the Middle Ages—the Crusades. The Crusades: An Encyclopedia surveys all aspects of the crusading movement from its origins in the 11th century to its decline in the 16th century. Unlike other works, which focus on the eastern Mediterranean region, this expansive four-volume encyclopedia also includes the struggle of Christendom against its enemies in Iberia, Eastern Europe, and the Baltic region, and also covers the military orders, crusades

against fellow Christians, heretics, and more. This work includes comprehensive entries on personalities such as Godfrey of Bouillon, who refused the title King of Jerusalem, and St. Bernard of Clairvaux, who tore up his own clothing to make symbols of the cross for crusaders, as well as key events, countries, places, and themes that shed light on everything from the propaganda that inspired crusading warriors to the ways in which they fought. Special coverage of topics such as taxation, pilgrimage, warfare, chivalry, and religious orders give readers an appreciation of the multifaceted nature of these holy wars.

Sourcebook of Paleolithic Transitions Marta Camps, Parth Chauhan, 2009-09-01 As the study of Palaeolithic technologies moves towards a more analytical approach, it is necessary to determine a consistent procedural framework. The contributions to this timely and comprehensive volume do just that. This volume incorporates a broad chronological and geographical range of Palaeolithic material from the Lower to Upper Palaeolithic. The focus of this volume is to provide an analysis of Palaeolithic technologies from a quantitative, empirical perspective. As new techniques, particularly quantitative methods, for analyzing Palaeolithic

technologies gain popularity, this work provides case studies particularly showcasing these new techniques. Employing diverse case studies, and utilizing multivariate approaches, morphometrics, model-based approaches, phylogenetics, cultural transmission studies, and experimentation, this volume provides insights from international contributors at the forefront of recent methodological advances.

**The Juggler of Notre Dame and the Medievalizing of Modernity.** Jan M. Ziolkowski,2018-10-04 This ambitious and vivid study in six volumes explores the journey of a single, electrifying story, from its first incarnation in a medieval French poem through its prolific rebirth in the nineteenth and twentieth centuries. The Juggler of Notre Dame tells how an entertainer abandons the world to join a monastery, but is suspected of blasphemy after dancing his devotion before a statue of the Madonna in the crypt; he is saved when the statue, delighted by his skill, miraculously comes to life. Jan Ziolkowski tracks the poem from its medieval roots to its rediscovery in late nineteenth-century Paris, before its translation into English in Britain and the United States. The visual influence of the tale on Gothic revivalism and vice versa in America is carefully documented with lavish and inventive illustrations, and Ziolkowski concludes with an examination of the explosion of interest in The Juggler of Notre Dame in the twentieth

century and its place in mass culture today. Volume 4 examines the famous *Le jongleur de Notre Dame* by the French composer Jules Massenet, which took Europe by storm after premiering in 1902 and then crossed the Atlantic to the impresario Oscar Hammerstein and the diva Mary Garden, who gave the opera new legs as a female juggler. Presented with great clarity and simplicity, Ziolkowski's work is accessible to the general reader, while its many new discoveries will be valuable to academics in such fields and disciplines as medieval studies, medievalism, philology, literary history, art history, folklore, performance studies, and reception studies.
