**The History of Hardening** Hans Berns,2013-02-01 The present needs the past to shape the future. As in many areas of life, heat treatments used in the past have to be studied to understand the present. The resulting conclusions can be used to shape the future. But how did heat treatment develop into a key branch of the economy in spite of its initial inadequacies? This question is the subject of this book, written by Professor Emeritus Dr.-Ing. Hans Berns and published by Härterei Gerster AG. It begins with the production of sponge iron in a bloomery hearth during the pre-Christian era and its subsequent carburisation as an essential requirement for hardening. During the Modern Period, in contrast, the high carbon content of the crude iron had to be painstakingly reduced to a level that allowed forging and hardening. The invention of mild steel in 1856 brought alloyed steels that could be hardened with thicker cross-sections, thus laying the foundations for modern hardening techniques. Härterei Gerster AG, a family business, has become the leading Swiss specialist for technical heat treatments mainly due to ongoing development cooperation with a number of academic institutions. Various development projects established a friendly relationship between Härterei Gerster AG and Prof. Hans Berns.

**The Roots of Hinduism** Asko Parpola,2015-07-15 Hinduism has two major roots. The more familiar is the religion brought to South Asia in the second millennium BCE by speakers of Aryan or Indo-Iranian languages, a branch of the Indo-European language family. Another, more enigmatic, root is the Indus civilization of the third millennium BCE, which left behind exquisitely carved seals

and thousands of short inscriptions in a long-forgotten pictographic script. Discovered in the valley of the Indus River in the early 1920s, the Indus civilization had a population estimated at one million people, in more than 1000 settlements, several of which were cities of some 50,000 inhabitants. With an area of nearly a million square kilometers, the Indus civilization was more extensive than the contemporaneous urban cultures of Mesopotamia and Egypt. Yet, after almost a century of excavation and research the Indus civilization remains little understood. How might we decipher the Indus inscriptions? What language did the Indus people speak? What deities did they worship? Asko Parpola has spent fifty years researching the roots of Hinduism to answer these fundamental questions, which have been debated with increasing animosity since the rise of Hindu nationalist politics in the 1980s. In this pioneering book, he traces the archaeological route of the Indo-Iranian languages from the Aryan homeland north of the Black Sea to Central, West, and South Asia. His new ideas on the formation of the Vedic literature and rites and the great Hindu epics hinge on the profound impact that the invention of the horse-drawn chariot had on Indo-Aryan religion. Parpola's comprehensive assessment of the Indus language and religion is based on all available textual, linguistic and archaeological evidence, including West Asian sources and the Indus script. The results affirm cultural and religious continuity to the present day and, among many other things, shed new light on the prehistory of the key Hindu goddess Durga and her Tantric cult.
