Energy Transitions in Latin America Lira Luz Benites Lazaro, Esteban Serrani, 2023-11-01 This book comprehensively analyzes the challenges and opportunities associated with transitioning to sustainable energy systems in Latin America. Recognizing that energy transition goes beyond mere changes in energy systems, it is also essential to address the imperative of ensuring a just transition and equitable benefits for all, particularly for vulnerable populations. This recognition emphasizes prioritizing social equity and inclusivity throughout the energy transition process. By adopting a critical perspective grounded in multidisciplinary approaches from the social sciences, the book delves into the complex energy transition issues, exploring the broader social, economic, and political dimensions involved. The book is divided into four parts. Part I highlights the changing energy mix in Latin America and the geopolitical implications of the increasing reliance on renewable sources. Part II examines the dilemmas faced by countries that rely on oil and gas revenues and the obstacles they face in transitioning to a low-carbon economy. Part III analyzes the production, technology, and costs as limits and opportunities for energy transition and adoption of renewable energies. Finally, part IV explores energy access and the democratization of energy generation in Latin America, including efforts to address energy poverty, the growth of distributed energy, and prosumers. *Energy Transitions in Latin America: The Tough Route to Sustainable*

Development is a valuable resource that will benefit researchers in energy studies and policymakers alike. It serves as a comprehensive guide for those seeking to navigate the complexities of energy transitions. It is an essential source for fostering informed decision-making and driving sustainable development in the region.

Regional Energy Initiatives Carlo Cambini,Alessandro Rubino,2014-06-13 This book focuses on the two intra-regional initiatives created for the development and integration of energy markets: the Energy Community and MedReg. The Energy Community and MedReg, apart from their common strategic role in providing a much-needed stable regulatory environment for energy markets in their respective reference countries, represent examples of a diverse development of regional energy initiatives. The former is initiated by external factors and is an example of a top-down approach, whereas the latter is a voluntary bottom-up initiative of the countries involved. The way the institutional framework is built is not without consequences on the functioning and organization of the two regional initiatives. The book assesses these different approaches and their consequences in

the framework of the development of the Energy Community and MedReg, with particular reference to their impact on regional integration, energy policy and institutional change. The analysis is enriched with several case studies on the role of independent regulatory agencies, the promotion of renewable energy sources, infrastructure and interconnection development across the Mediterranean basin and the implications of exporting the EU institutional model. This book is aimed at policy makers, institutions, energy companies and academics to provide a better understanding of the economic and institutional eco-system that characterize the Mediterranean area.
