Philip Lymbery

Junkyard Planet Adam Minter, 2015-04-14 When you drop your Diet Coke can or yesterday's newspaper in the recycling bin, where does it go? Probably halfway around the world, to people and places that clean up what you don't want and turn it into something you can't wait to buy. In *Junkyard Planet*, Adam Minter--veteran journalist and son of an American junkyard owner--travels deep into a vast, often hidden, five-hundred-billion-dollar industry that's transforming our economy and environment. With unmatched access to and insight on the waste industry, and the explanatory gifts and an eye for detail worthy of a John McPhee or a William Langewiesche, Minter traces the export of America's junk and the massive profits that China and other rising nations earn from it. What emerges is an engaging, colorful, and sometimes troubling tale of how the way we consume and discard stuff fuels a world that recognizes value where Americans don't. *Junkyard Planet* reveals that Americans might need to learn a smarter way to take out the trash.

Garbology Edward Humes, 2012-04-19 A Pulitzer Prize-winning journalist takes readers on a surprising tour of the world of garbage. Take a journey inside the secret world of our biggest export, our most prodigious product, and our greatest legacy: our trash. It's the biggest thing we make: The average American is on track to produce a whopping 102 tons of garbage across a lifetime, \$50 billion in squandered riches rolled to the curb each year, more than that produced by any other people in the world. But that trash doesn't just magically disappear; our bins are merely the starting point for a strange, impressive, mysterious, and costly journey that may also represent the greatest untapped opportunity of the century. In *Garbology*, Pulitzer Prize-winning author Edward Humes investigates the trail of that 102 tons of trash—what's in it; how much we pay for it; how we manage to create so much of it; and how some families, communities, and even nations are finding a way back from waste to discover a new kind of prosperity. Along the way, he introduces a collection of garbage denizens unlike anyone you've ever met: the trash-tracking detectives of MIT, the bulldozer-driving sanitation workers building Los Angeles' immense Garbage Mountain landfill, the artists in residence at San Francisco's dump, and the family whose annual trash output fills not a dumpster or a trash can, but a single mason jar. *Garbology* digs through our epic piles of trash to reveal not just what we throw away, but who we are and where our society is headed. Are we destined to remain the country whose number-one export is scrap—America as China's trash compactor—or will the country that invented the disposable economy pioneer a new and less wasteful path? The real secret at the heart of *Garbology* may well be the potential for a happy ending buried in our landfill. Waste, Humes writes, is the one environmental and economic harm that ordinary working Americans have the power to change—and prosper in the process.

Garbage Land Elizabeth Royte, 2014-05-10 Out of sight, out of mind ... Into our trash cans go dead batteries, dirty diapers, bygone burritos, broken toys, tattered socks, eight-track cassettes, scratched CDs, banana peels... But where do these things go next? In a country that consumes and then casts off more and more, what actually happens to the things we throw away? In *Garbage Land*, acclaimed science writer Elizabeth Royte leads us on the wild adventure that begins once our trash hits the bottom of the can. Along the way, we meet an odor chemist who explains why trash smells so bad; garbage fairies and recycling gurus; neighbors of massive waste dumps; CEOs making fortunes by encouraging waste or encouraging recycling—often both at the same time; scientists trying to revive our most polluted places; fertilizer fanatics and adventurers who kayak amid sewage; paper people, steel people, aluminum people, plastic people, and even a guy who swears by recycling human waste. With a wink and a nod and a tightly clasped nose, Royte takes us on a bizarre cultural tour through slime, stench, and heat—in other words, through the back end of our ever-more supersized lifestyles. By showing us what happens to the things we've disposed of, Royte reminds us that our decisions about consumption and waste have a very real impact—and that unless we undertake radical change, the garbage we create will always be with us: in the air we breathe, the water we drink, and the food we consume. Radiantly written and boldly reported, *Garbage Land* is a brilliant exploration into the soiled heart of the American trash can.

Waste and Want Susan Strasser, 2000-09 An exploration of the importance of trash in American social history describes the virtual nonexistence of trash before the twentieth century during a time when every scrap had a use and discusses the rise of the culture of disposability and its long-term implications. Reprint. 10,000 first printing.

Out Of Control Kevin Kelly, 2009-04-30 *Out of Control* chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable from living things.

The Caesars Palace Coup Sujeet Indap, Max Frumes, 2021-03-16 It was the most brutal corporate restructuring in Wall Street history. The 2015 bankruptcy brawl for the storied casino giant, Caesars Entertainment, pitted brilliant and ruthless private equity legends against the world's most relentless hedge fund wizards. In the tradition of *Barbarians at the Gate* and *The Big Short* comes the riveting, multi-dimensional poker game between private equity firms and distressed debt hedge funds that played out from the Vegas Strip to Manhattan boardrooms to Chicago courthouses and even, for a moment, the halls of the United States Congress. On one side: Apollo Global Management and TPG Capital. On the other: the likes of Elliott Management, Oaktree Capital, and Appaloosa Management. The Caesars bankruptcy put a twist on the old-fashioned casino heist. Through a \$27 billion leveraged buyout and a dizzying string of financial engineering transactions, Apollo and TPG—in the midst of the post-Great Recession slump—had seemingly snatched every prime asset of the company from creditors, with the notable exception of Caesars Palace. But Caesars' hedge fund lenders and bondholders had scooped up the company's paper for nickels and dimes. And with their own armies of lawyers and bankers, they were ready to do everything necessary to take back what they believed was theirs—if they could just stop their own infighting. These modern financiers now dominate the scene in Corporate America as their fight-to-the-death mentality continues to shock workers, politicians, and broader society—and even each other. In *The Caesars Palace Coup*, financial journalists Max Frumes and Sujeet Indap illuminate the brutal tactics of distressed debt mavens—vultures, as they are condemned—in the sale and purchase of even the biggest companies in the world with billions of dollars hanging in the balance.

Junkyard Planet H. Piper, 2007-04 This novel had its genesis in a much shorter story called *Graveyard of Dreams* (Galaxy, 1958) Piper expanded it to book length, and it appeared in 1963 as *Junkyard Planet*. Ace later renamed the book *The Cosmic Computer* for its paperback appearance. This edition returns the book to Piper's original title, *Junkyard Planet*. Conn Maxwell returns from Terra to his home world of Poictesme, dubbed *The Junkyard Planet* because of all the military equipment left behind after the last war. Conn claims he has found the location of Merlin, a military super-computer rumored to have been left behind. But is Merlin real, or just a myth? And will Conn's knowledge of the computer save Poictesme -- or tear his world apart?

The Information James Gleick, 2011-03-01 From the bestselling author of the acclaimed *Chaos* and *Genius* comes a thoughtful and provocative exploration of the big ideas of the modern era: information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa's talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators,

including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live. A New York Times Notable Book A Los Angeles Times and Cleveland Plain Dealer Best Book of the Year Winner of the PEN/E. O. Wilson Literary Science Writing Award

The Martian Andy Weir, 2014-02-11 Nominated as one of America's best-loved novels by PBS's The Great American Read Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive—and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old human error are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills—and a relentless, dogged refusal to quit—he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?

Strange Harvests Edward Posnett, 2019-08-06 [Strange Harvests is] an impressive addition to the modern travelogue, painting some of the world's most remote terrain in visceral and sometimes breathtaking prose . . . an engrossing read. --NPR An original and magical map of our world and its riches, formed of the stories of the small-scale harvests of seven natural objects In this beguiling book, Edward Posnett journeys to some of the most far-flung locales on the planet to bring us seven wonders of the natural world--eiderdown, vicuña fiber, sea silk, vegetable ivory, civet coffee, guano, and edible birds' nests--that promise ways of using nature without damaging it. To the rest of the world these materials are mere commodities, but to their harvesters they are imbued with myth, tradition, folklore, and ritual, and form part of a shared identity and history. Strange Harvests follows the journeys of these uncommon products from some of the most remote areas of the world to its most populated urban centers, drawing on the voices of the people and little-known communities who harvest, process, and trade them. Blending history, travel writing, and interviews, Posnett sets these human stories against our changing economic and ecological landscape. What do they tell us about capitalism, global market forces, and overharvesting? How do local microeconomies survive in a hyperconnected world? Is it possible for us to live together with different species? Strange Harvests makes us see the world with wonder, curiosity, and new concern.

Doctor Sleep Stephen King, 2013-09-24 Now a major motion picture starring Ewan McGregor! From master storyteller Stephen King, his unforgettable and terrifying sequel to *The Shining*—an instant #1 New York Times bestseller that is “[a] vivid frightscape” (*The New York Times*). Years ago, the haunting of the Overlook Hotel nearly broke young Dan Torrance's sanity, as his paranormal gift known as “the shining” opened a door straight into hell. And even though Dan is all grown up, the ghosts of the Overlook—and his father's legacy of alcoholism and violence—kept him drifting aimlessly for most of his life. Now, Dan has finally found some order in the chaos by working in a local hospice, earning the nickname “Doctor Sleep” by secretly using his special abilities to comfort the dying and prepare them for the afterlife. But when he unexpectedly meets twelve-year-old Abra Stone—who possesses an even more powerful manifestation of the shining—the two find their lives in sudden jeopardy at the hands of the ageless and murderous nomadic tribe known as the True Knot, reigniting Dan's own demons and summoning him to battle for this young girl's soul and survival...

Farmageddon Philip Lymbery, 2014-01-30 Farm animals have been disappearing from our fields as the production of food has become a global industry. We no longer know for certain what is entering the food chain and what we are eating. We are reaching a tipping point as the farming revolution threatens our countryside, health and the quality of our food wherever we live in the world. From the antibiotics routinely given to industrially farmed animals to the chemicals that are killing our insect populations, *Farmageddon* is a fascinating and terrifying investigative journey behind the closed doors of a runaway industry across the world - from Europe to the USA, from China to Latin America. It is both a wake-up call to change our current food production and eating practices, and an attempt to find a way to a better farming future.
