Skill-Based reconfiguration of industrial mobile robots Stefanie Angerer,2012-07-23
Caused by a rising mass customisation and the high variety of equipment versions, the flexibility of manufacturing systems in car production has to be increased. In this thesis a skill-based reconfiguration mechanism is presented to enhance functional reconfigurability of industrial mobile robots. A novel reconfiguration mechanism allows to react self-organised to functional process changes. The result of this mechanism is the on-line integration of new robot functionalities into the current manufacturing process while maintaining the productivity of the mobile robot. Applied to an industrial mobile robot that is provided by AUDI AG, the suggested mechanism is validated in a real-world environment including the on-line verification of the reconfigured robot functionality in a Validity Check.

Wireless and Satellite Systems Prashant Pillai, Yim Fun Hu, Ifiok Otung, Giovanni Giambene, 2015-10-08 This book constitutes the proceedings of the 7th International Conference on Wireless and Satellite Services, WiSATS 2015, held in Bradford, UK, in July 2015. The conference was formerly known as the International Conference on Personal Satellite Services (PSATS) mainly covering topics in the satellite domain. As the scope of the conference widened to include wireless systems, the conference was renamed to WiSATS. The 29 revised papers were presented at the conference in three technical sessions and one special session on “Network Coding for Satellites”. WiSATS 2015 also hosted two workshops along with the main conference: The first workshop, Communication Applications in Smart Grid (CASG 2015), focused on the merging area of using communication technology within the electricity power grid for smart monitoring and control. The second workshop, Advanced Next-Generation Broadband Satellite Systems (BSS 2015), focused on the use of satellite systems for providing next-generation broadband services.

The Ultimate Chrome OS Guide For The Dell Latitude 5300 2-in-1 Chromebook Enterprise Keith I Myers, 2023-01-07 There are several books available for Chrome OS users however many of them focus on the limitations of Chrome OS, not teach readers how to unlock the full potential of their Chrome OS powered device. The Ultimate Chrome OS Guide for the Dell Latitude 5300 2-in-1 Chromebook Enterprise will provide a comprehensive overview of the Dell Latitude 5300 2-in-1 Chromebook Enterprise and how to get the most out of your purchase. This book was designed to

appeal to readers from all walks of life, it does not matter if this is your first Chrome OS powered device or you are like me and have a quickly growing collection.

Successfully Choosing Your EMR Arthur Gasch, Betty Gasch, 2010-03-26 The Electronic Medical Record (EMR) - is the essential underpinning of any significant healthcare reform and is the more comprehensive record than the Electronic Health Record (EHR). This book clarifies the crucial decisions that result in successful EMR adoption and avoidance of expensive EMR mistakes. It provides timely insight in leveraging ARRA/HiTech, Meaningful Use, Stark Safe Harbor, CPOE and PQRI incentives and understanding current HITSP, HL7, ASTM, ELINCS and other interoperability standards. This book provides practical guidance on: Evaluating EMR ease-of-use Determining In-office vs. Web-based vs. Blended EMR deployment Deciding which user-interface approach to adopt Understanding structured vs. unstructured charting approaches Assessing EMR developer stability Obtaining legal advice about RFIs, RFPs and contract negotiations The federal government has set aside significant incentives for physicians to adopt and implement electronic medical records systems. As providers across the country seek out various health IT tools and capabilities, this book serves as a remarkably useful, step-by-step guide for successfully deploying an EMR system. This kind of information will be imperative as we bring our health system into the 21st century. —Newt Gingrich, Founder of The Center for Health Transformation, Former Speaker of the House, USA Also endorsed by: Rep. Rush Holt (D NJ), Richard Dick, Ph.D. & Radu Kramer, M.D.

Sustainability of Scholarly Information G. G. Chowdhury, 2014-07-11 This is the first book to discuss the sustainable development of digital scholarly information in three key aspects: economic, social and environmental sustainability. Taking as its starting point the premise that digital information systems and services form the backbone of a knowledge society and digital economy,

this book explores the challenges of ensuring sustainability of information in an evolving digital world. Author Gobinda Chowdhury attempts to find answers to five key questions in the context of scholarly information systems and services: How sustainable are today's information systems and services? How can we ensure the sustainability of information throughout its lifetime? Can today's information systems and services face the new economic challenges while providing easy and equitable access to information for everyone? Can the level and quality of information services be sustained over a long period of time? Can all these activities be performed in an environment-friendly manner? Chowdhury takes the approach of a research monograph based on literature review and meta-analysis of the issues and challenges associated with the various forms of sustainability of digital information systems and services. He proposes new models for study and research based on the critical analysis of developments in related areas. Illustrated with case studies and informed by the latest research, the chapters cover: - Economic sustainability of information - Environmental sustainability of information - Social sustainability of information - Sustainability of digital libraries and information services - Emerging issues and policies - Sustainability of information models - Research issues and challenges. Readership: This cutting-edge text is a must-read for those involved in setting policy and direction for information institutions, digital library managers and developers, researchers and students on LIS and digital information courses.

Cultural Heritage Information Ian Ruthven, G. G. Chowdhury, 2015-02-12 This book provides an overview of various challenges and contemporary research activities in cultural heritage information focusing particularly on the cultural heritage content types, their characteristic and digitization challenges; cultural heritage content organization and access issues; users and usability as well as various policy and sustainability issues associated with digital cultural heritage

information systems and services. Cultural Heritage Information, the first book in the peer-reviewed i-Research series, contains eleven chapters that have been contributed by seventeen leading academics from six countries. The book begins with an introductory chapter that provides a brief overview of the topic of digital cultural heritage information with the subsequent chapters addressing specific issues and research activities in this topic. The ordering of the chapters moves from scene setting on policies and infrastructures, through considerations of interaction, access and objects, through to concrete system implementations. The book concludes by looking forward to issues around sustainability, in the widest sense, that are necessary to think about in order to maximize the availability and longevity of our digital cultural heritage. The key topics covered are: - Managing digital cultural heritage information - Digital humanities and digital cultural heritage (alt-history and future directions) - Management of cultural heritage information: policies and practices - Cultural heritage information: artefacts and digitization technologies - Metadata in cultural contexts - from manga to digital archives in linked open data environment - Managing cultural heritage: information systems architecture - Cultural heritage information users and usability - A framework for classifying and comparing interactions in cultural heritage information systems - Semantic access and exploration in cultural heritage digital libraries - Supporting exploration and use of digital cultural heritage materials: the PATHS perspective - Cultural heritage information services: sustainability issues. Readership: This will be essential reading for researchers in Information Science specifically in the areas of digital libraries, digital humanities and digital culture. It will also be useful for practitioners and students in these areas who want to know the different research issues and challenges and learn how they have been handled in course of various research projects in these areas.

Advances in User Modeling Liliana Ardissono,Tsvi Kuflik,2012-02-23 This book constitutes selected papers from the lectures given at the workshops held in conjunction with the User Modeling, Adaptation and Personalization Conference, UMAP 2011, Girona, Spain, in July 2011. The 40 papers presented were carefully reviewed and selected for inclusion in this book. For each workshop there is an overview paper summarizing the workshop themes, the accepted contributions and the future research trends. In addition the volume presents a selection of the best poster papers of UMAP 2011. The workshops included are: AST, adaptive support for team collaboration; AUM, augmenting user models with real worlds experiences to enhance personalization and adaptation; DEMRA, decision making and recommendation acceptance issues in recommender systems; PALE, personalization approaches in learning environments; SASWeb, semantic adaptive social web; TRUM, trust, reputation and user modeling; UMADR, user modeling and adaptation for daily routines: providing assistance to people with special and specific needs; UMMS, user models for motivational systems: the affective and the rational routes to persuasion.

Foundations of Intelligent Systems Marzena Kryszkiewics,Henryk Rybinski,Andrzej Skowron,Zbigniew W. Raś,2011-06-24 This book constitutes the refereed proceedings of the 19th International Symposium on Methodologies for Intelligent Systems, ISMIS 2011, held in Warsaw, Poland, in June 2011. The 71 revised papers presented together with 3 invited papers were carefully reviewed and selected from 131 submissions. The papers are organized in topical sections on rough sets - in memoriam Zdzisław Pawlik, challenges in knowledge discovery and data mining - in memoriam Jan Žytkov, social networks, multi-agent systems, theoretical backgrounds of AI, machine

learning, data mining, mining in databases and warehouses, text mining, theoretical issues and applications of intelligent web, application of intelligent systems in sound processing, intelligent applications in biology and medicine, fuzzy sets theory and applications, intelligent systems, tools and applications, and contest on music information retrieval.

Sustainable Supply Chains Tonya Boone, Vaidyanathan Jayaraman, Ram Ganeshan, 2012-06-07
A sustainable enterprise is one that contributes to sustainable development by simultaneously delivering economic, social and environmental benefits or what has been termed the triple bottom line. While pursuing profit, socially responsible companies should be sensitive to the environment and uphold the rights of all the firm's stakeholders. This edited volume explores leading-edge ideas — both by academics and forward-thinking companies — to (re)design and market products, source, manufacture, and eventually distribute and recover or dispose of them in an environmentally, ecologically, and socially responsible way. This edited volume is made up of fifteen chapters loosely grouped into clusters. After an introduction, chapter 2 shows the greenhouse emissions at various levels, from countries all the way to individual products. Chapters 3-7 each focus on an industrial sector and address issues specific to that industry, with chapter 7 presenting a case study on LEED certification of Miller Hall, home of the Mason School of Business where two of the authors (Tonya and Ram) work. Chapters 8-10 address product take back in the supply chain. Chapter 8 introduces e-waste and surveys what firms are doing to combat it. Chapter 9 provides an overview of existing take-back legislation and academic papers that have studied various research questions associated with them. Chapter 10 is a tutorial that addresses the problem of product disposition on a closed-loop supply chain: what should a firm do with a product return? Chapters 11-15 address measurement, monitoring, decision-making, and reporting regarding environmental issues in a firm.

Chapter 11 provides an academic survey of eco-labeling and the consumer's willingness to pay for them. Chapter 12 discusses how firms can measure the total carbon footprint in their supply chains and some of the strategies they can use to mitigate carbon emissions. Using the price of call options, chapter 13 illustrates how managers can quantify the savings attributed to sustainability-related investment. Chapter 14 develops a non-linear optimization model that addresses the complex trade-offs involved in making joint operational and environmental decisions. Finally, chapter 15 develops a Data Envelopment Analysis-based method for supplier evaluation incorporating environmental and business factors.

Turbulence Christophe Bailly, Geneviève Comte-Bellot, 2015-03-21 This book covers the major problems of turbulence and turbulent processes, including physical phenomena, their modeling and their simulation. After a general introduction in Chapter 1 illustrating many aspects dealing with turbulent flows, averaged equations and kinetic energy budgets are provided in Chapter 2. The concept of turbulent viscosity as a closure of the Reynolds stress is also introduced. Wall-bounded flows are presented in Chapter 3 and aspects specific to boundary layers and channel or pipe flows are also pointed out. Free shear flows, namely free jets and wakes, are considered in Chapter 4. Chapter 5 deals with vortex dynamics. Homogeneous turbulence, isotropy and dynamics of isotropic turbulence are presented in Chapters 6 and 7. Turbulence is then described both in the physical space and in the wave number space. Time dependent numerical simulations are presented in Chapter 8, where an introduction to large eddy simulation is offered. The last three chapters of the book summarize remarkable digital techniques current and experimental. Many results are presented in a practical way, based on both experiments and numerical simulations. The book is written for a advanced engineering students as well as postgraduate engineers and researchers. For

students, it contains the essential results as well as details and demonstrations whose oral transmission is often tedious. At a more advanced level, the text provides numerous references which allow readers to find quickly further study regarding their work and to acquire a deeper knowledge on topics of interest.

Danger Close William G. Boykin Lieutenant General (Retired),Tom Morrissey,2019-09-10 Barely into his twenties and already a highly decorated military hero, Army Special Forces veteran Blake Kershaw is now going to college, studying while recuperating from wounds received in Afghanistan, and planning to re-enter the Army as an officer after graduation. But life tosses Blake a curve when his country approaches him about using his special skills to avert a terrorist plot to detonate a nuclear device in a major eastern U.S. city. To do that, he would need to become an operative deep within Al-Qaeda's innermost circles—changing his entire identity, even his face. A true patriot, Blake makes the journey into a shadow world that leaves friends, family and, seemingly, even God far behind. But when things go terribly wrong, and his country looks set to destroy him, it is God and God's people who intervene.

Recent Advances in Algorithmic Differentiation Shaun Forth,Paul Hovland,Eric Phipps,Jean Utke,Andrea Walther,2012-07-30 The proceedings represent the state of knowledge in the area of algorithmic differentiation (AD). The 31 contributed papers presented at the AD2012 conference cover the application of AD to many areas in science and engineering as well as aspects of AD theory and its implementation in tools. For all papers the referees, selected from the program committee and the greater community, as well as the editors have emphasized accessibility of the presented ideas also to non-AD experts. In the AD tools arena new implementations are introduced covering, for example, Java and graphical modeling environments or join the set of existing tools for Fortran. New developments in AD algorithms target the efficiency of matrix-operation derivatives, detection and exploitation of sparsity, partial separability, the treatment of nonsmooth functions, and other high-level mathematical aspects of the numerical computations to be differentiated. Applications stem from the Earth sciences, nuclear engineering, fluid dynamics, and chemistry, to name just a few. In many cases the applications in a given area of science or engineering share characteristics that require specific approaches to enable AD capabilities or provide an opportunity for efficiency gains in the derivative computation. The description of these characteristics and of the techniques for successfully using AD should make the proceedings a valuable source of information for users of AD tools.

The Science of Aphasia Rehabilitation Chris Code,Donald B Freed,2016-02-05 This book examines the rehabilitation of language disorders in adults, presenting new research, as well as expert insights and perspectives, into this area. The first chapter presents a study on personalised cueing to enhance word finding. Cynthia K. Thompson and her colleagues contribute a chapter describing The Northwestern Naming Battery and its use in examining for verb and noun deficits in

stroke-induced and primary progressive aphasia. Heather Harris-Wright and Gilson J. Capilouto examine a multi-level approach to understanding the maintenance of global coherence in aphasia. Kathryn M. Yorkston and colleagues provide discussion on the training of healthcare professionals, and what speech and language pathology and medical education can learn from one another. Yorkston also presents a systematic review asking whether principles of motor learning can enhance retention and transfer of speech skills. Connie A. Tompkins present a single-participant experiment examining generalization of a novel treatment for coarse coding deficit in right hemisphere damage. Finally, Chris Code returns to the topic of apportioning time for aphasia treatment. This book was originally published as a special issue of *Aphasiology*.
