Each sentence structure is not only descriptively analyzed, but also formulated in a pedagogical pattern with examples. Exercises are provided in each unit.

The Acquisition of Relative Clauses Evan Kidd,2011

Explaining the acquisition and processing of relative clauses has long challenged psycholinguistics researchers. The current volume presents a collection of chapters that consider the acquisition of relative clauses with a particular focus on function, typology, and language processing. A diverse range of theoretical approaches and languages are brought to bear on the acquisition of this construction type, making the volume unique in its coverage. The

volume will appeal to students and scholars whose interest lies in the acquisition and processing of syntax with a particular focus on complex sentences in crosslinguistic and functionalist perspective.

The Syntax of Relative Clauses Guglielmo Cinque,2020-09-24

Relative clauses play a hugely important role in analysing the structure of sentences. This book provides the first evidence that a unified analysis of the different types of relative clauses is possible - a step forward in our understanding. Using careful analyses of a wide range of languages, Cinque argues that the relative clause types can all be derived from a single, double-headed, structure. He also presents evidence that restrictive, maximalizing,

('integrated') non-restrictive, kind-defining, infinitival and participial RCs merge at different heights of the nominal extended projection. This book provides an elegant generalization about the structure of all relatives. Theoretically profound and empirically rich, it promises to radically alter the way we think about this subject for years to come.

Mandarin Chinese Charles N. Li, Sandra A.

Thompson, 1989-04-20 This reference grammar provides, for the first time, a description of the grammar of Mandarin Chinese, the official spoken language of China and Taiwan, in functional terms, focusing on the role and meanings of word-level and sentence-level structures in actual conversations.

Chinese Grammar at Work Shuanfan Huang, 2013-12-15

Chinese Grammar at Work adopts a cognitive-functional approach and uses a corpus-based methodology to examine how Chinese syntax emerges from natural discourse context and what the evolving grammar at work looks like. In this volume the author weaves together an array of fresh perspectives on clause structure, constructions, interactional linguistics, cognitive science and complex dynamic systems to construct a grammar of spoken Chinese. The volume contains discussions of a large number of topics: contiguity relation, the roles of repair strategies in the shaping of constituent structure, non-canonical word order constructions, pragmatics of referring expressions, classifier constructions, noun-modifying constructions, verb complementation, ethnotheory of the person and constructions specific to the language of emotion, sequential sensitivity of linguistic materials, meaning potential in interaction, the nature of variability and stability in Chinese syntax from the perspective of complexity theory. The result is a volume that highlights the connections between language structure, situated and embodied nature of cognition and language use, and affords a true entrée to the exciting realm of Chinese grammar.

Grammaticalization and Language Change in Chinese

Xiu-Zhi Zoe Wu, 2004-08-02 Grammaticalization and Language Change in Chinese illuminates how studies of language development and change provide special insights into the understanding of current, synchronic systems of language.

A Grammar of Southern Min Weirong Chen, 2020-02-10 Southern Min (also known as Hokkien or Minnan) is a major branch of Chinese spoken mainly in Fujian and Taiwan, but also in Guangdong, Hainan and Hong Kong, as well as in many countries of Southeast Asia. Highly conservative in its linguistic profile, it is considered by many scholars to be a living language fossil due to the preservation of many archaic features that reflect its long-lasting history and culture. Yet to date there has been no comprehensive study of Southern Min using a typological framework, as the tendency is to base analyses on the model of Mandarin Chinese, the standard language. This grammar aims to present a systematic description of the Hui'an variety of Southern Min, mainly based on data collected via naturally occurring conversation. The volume includes four parts: nominal structure, predicate structure, clause structure and complex sentences, as well as a brief overview of phonology. It will have great appeal for heritage speakers, graduate students and scholars in both Chinese linguistics and typology.

Understanding English Grammar Hung Tony T.N., 2005-01-01 This book aims at helping learners of English (particularly those whose first language is Chinese) to improve their understanding of, and their competence in, English grammar. It directly addresses the needs of Chinese learners and takes full account of their first language in helping them understand how English works by systematically requiring them to think about grammar, and to come up with their own hypotheses about how it works on the basis of the given data. The book is designed for students' learning on their own as well as in a classroom. Each chapter is accompanied by a separate 'students' notes', which the students

can consult after working through all the data and exercises in each chapter, to check their own answers and to read further explanations on the grammatical points in question. This book therefore appeals to the growing number of students learning through self-access, as well as promotes independent learning among those enrolled in educational institutions. Key features: - Directly addresses the needs of Chinese learners of English - Concise, user-friendly grammar presentations followed by examples of correct use - Innovative exercises offering learners in-depth practice of key grammar points - Detailed students' notes section and a full answer key for easy reference - Suitable for use in class, or for self-study

A Reference Grammar of Mandarin Chinese for English Speakers Chauncey Cheng-hsi Chu, 1984 This reference grammar provides a description of Mandarin Chinese in familiar terms and enables the English-speaking reader to transfer his/her knowledge of English to the study of Chinese. Many of the unique features of the language are treated through a comparison with semantically corresponding, though syntactically different, features in English. Aside from the conventional types of sentences, special constructions are amply explained and illustrated for the reader. Understanding the specific meaning of each of these constructions is one of the central themes of the grammar. This book contains a number of original analyses, such as that of the -shi--de- construction and the notion of continuum for the indiscrete nature of linguistic structure, which should serve as a valuable reference

source for both the language teacher and the profession of Chinese linguistics.

Processing and Producing Head-final Structures Hiroko Yamashita, Yuki Hirose, Jerome L. Packard, 2010-11-05 This book is the first collection of studies on an important yet under-investigated linguistic phenomenon, the processing and production of head-final syntactic structures. Until now, the remarkable progress made in the field of human sentence processing had been achieved largely by investigating head-initial languages such as English. The goal of the present volume is to deepen our understanding by examining head-final languages and offering a comparison of those results to findings from head-initial languages. This book brings together cross-linguistic investigations of languages with prominent head-final structures such as Basque, Chinese, German, Japanese, Korean, and Hindi. It will inform readers of linguistics with both theoretical and experimental backgrounds, as it provides accounts of previous studies, offers experimentally-based theoretical discussions, and includes experimental stimuli in the original languages.
