Alexandria William La Riche, 1996 Describes how ancient artifacts from the extinct city of Alexandria were found accidentally in 1961, and documents the continued organized efforts in the 1990s to locate and excavate statues, sphinx, and building materials

Egypt's Sunken Treasures Franck Goddio, Manfred

Clauss, 2006 In the shallow waters of Aboukir Bay off the coast of Egypt, the ruins of three ancient cities—Alexandria, Heraklion, and Canopus—lie along with valuable clues to the way their citizens lived and worshipped. The French underwater archaeologist Franck Goddio discovered these relics, which include statuary, jewelry, pediments, stone tablets, and fragments of buildings, all lost for nearly two thousand years. In addition to remarkable photographs of the excavation process, this illuminating volume connects the artifacts to the lives of Helen of Troy, Cleopatra, and Mark Anthony. It discusses the interactions among the three cities, between Egyptians and ancient Greeks, and the influences each civilization had on the other. An exciting volume for anyone interested in ancient history, this richly illustrated book is the most comprehensive examination to date on the excavation of the lost cities below Aboukir Bay. An updated and revised edition, this book features photographs and images from a landmark underwater excavation that changed the maps of history.

AUTHOR: Franck Goddio is founder and president of the European institute for Underwater Archaeology in Paris. He is the author of many books and scientific articles, and has been the subject of numerous television documentaries. ILLUSTRATIONS: 600 colour illustrations

The BP Exhibition Franck Goddio, Aurélie Masson-

Berghoff, 2016 Beneath the waters of Aboukir Bay, at the edge of the northwestern Nile Delta, lie the submerged remains of once-lost ancient Egyptian cities that sank over 1,200 years ago, but

were dramatically rediscovered in the last years of the 20th century. Pioneering underwater excavations, begun in 1999 and still underway, are uncovering an array of ancient buildings and artefacts. Temple ruins and monumental statuary, harbour installations (and no fewer than 69 shipwrecks), exquisite jewellery and delicate ceramics are among the intriguing remains of these cities already lifted from the sea. Through these extraordinary finds, this book tells the story of how two iconic ancient civilizations, Egypt and Greece, interacted in the late first millennium BC, from the founding of Thonis-Heracleion, Naukratis and Canopus as trading and religious centres to the conquest of Egypt by Alexander the Great, through the ensuing centuries of Ptolemaic (Hellenistic) rule, to the suicide of Cleopatra and the ultimate dominance of Rome. Throughout, Greeks and Egyptians lived alongside one another in these lively cities, sharing their politics, religious beliefs, languages and customs. Greek kings adopted the regalia of the pharaoh; ordinary Greek citizens worshipped in Hellenic sanctuaries next to Egyptian temples; and their ancient gods and mythologies became ever more closely intertwined. Published to accompany the blockbuster British Museum exhibition showcasing a spectacular collection of objects, this book retells the history and rediscovery of this vibrant and multi-cultural ancient society.

Alexandria and the Sea Kimberly Williams, 2004

Alexandria Franck Goddio, 1998-01-01 This publication presents the results of the work carried out in Alexandria by the Institut Européen d'Archeologie Sous-Marine. The first topographical surveys made in 1992 through to the archaeological campaigns of 1996 and 1997 are reported and analysed in detail, determining the ancient topography of the Ptolemaic harbour and the city of Cleopatra. Discussed in length are the problems of ancient harbour installations and observations on the enigmas posed by the fields of submerged ruins are made. In particular the epigraphy and study of the pharaonica and comparisons with the

texts of ancient writers together with the study of statuary are found within this work.

The Architecture of Alexandria and Egypt, C. 300 B.C. to A.D. 700 Judith McKenzie, Rhys-Davids Junior Research Fellow in Archaeology, Peter Roger Stuart Moorey, 2007-01-01 This masterful history of the monumental architecture of Alexandria, as well as of the rest of Egypt, encompasses an entire millennium—from the city's founding by Alexander the Great in 331 B.C. to the years just after the Islamic conquest of A.D. 642. Long considered lost beyond recall, the architecture of ancient Alexandria has until now remained mysterious. But here Judith McKenzie shows that it is indeed possible to reconstruct the city and many of its buildings by means of meticulous exploration of archaeological remains, written sources, and an array of other fragmentary evidence. The book approaches its subject at the macro- and the micro-level: from city-planning, building types, and designs to architectural style. It addresses the interaction between the imported Greek and native Egyptian traditions; the relations between the architecture of Alexandria and the other cities and towns of Egypt as well as the wider Mediterranean world; and Alexandria's previously unrecognized role as a major source of architectural innovation and artistic influence. Lavishly illustrated with new plans of the city in the Ptolemaic, Roman, and Byzantine periods; reconstruction drawings; and photographs, the book brings to life the ancient city and uncovers the true extent of its architectural legacy in the Mediterranean world.

Cleopatra's Palace Laura Foreman, 1999 About the underwater discovery of Cleopatra's palace and its artifacts.

The Lost City of Heracleion Charles River Editors, 2019-01-07 *Includes pictures *Includes ancient accounts *Includes online resources and a bibliography for further reading Africa may have given rise to the first human beings, and Egypt probably gave rise to the first great civilizations, which continue to

fascinate modern societies across the globe nearly 5,000 years later. From the Library and Lighthouse of Alexandria to the Great Pyramid at Giza, the Ancient Egyptians produced several wonders of the world, revolutionized architecture and construction, created some of the world's first systems of mathematics and medicine, and established language and art that spread across the known world. With world-famous leaders like King Tut and Cleopatra, it's no wonder that today's world has so many Egyptologists. What makes the accomplishments of the Ancient Egyptians all the more remarkable is that Egypt was historically a place of great political turbulence. Its position made it both valuable and vulnerable to tribes across the Mediterranean and the Middle East, and Ancient Egypt had no shortage of its own internecine warfare. Its most famous conquerors would come from Europe, with Alexander the Great laying the groundwork for the Hellenic Ptolemy line and the Romans extinguishing that line after defeating Cleopatra and driving her to suicide. One of the primary reasons why modern scholars know so much about Egyptian history is due to many monuments found up and down the Nile. Although some of the tombs built on the west bank of the Nile River have suffered a fair amount of wind damage and all of the great monuments have endured the ravages of time, they are amazingly well-preserved, thanks both to Egypt's arid climate and good workmanship. The Egyptian monument builders were truly a class above their contemporaries in terms of their trade, which was helped by the fact that they worked with the more permanent materials of sandstone and limestone, unlike Mesopotamian builders who were forced to primarily work with mud and brick. Of course, even the finest made Egyptian granite statues and limestone temples could do little to stop population explosions and changing weather patterns, which combined to bury most pharaonic era monuments in the Egyptian Delta. Today, the Delta is the most densely populated portion of the already densely populated country and is located on a high water table that is subject to routine flooding,

just as it was in ancient times. Throughout the millennia since the pharaohs ruled Egypt, peasants have routinely used remnants of ancient monuments for new housing structures, implements, and even fertilizer, and the situation is even more pronounced closer to the Mediterranean coast. Cities that once were major ports where the various branches of the Nile River flowed into the Mediterranean are now miles off the coastline, under hundreds of feet of water. The existence of these cities was known thanks to Egyptian and Greek historical sources, but their locations could never be positively identified until the advent of modern marine technology. In 1996, adventurer and scholar Franck Goddio identified what he believed was a major site just off the Mediterranean coastline in the Abu Qir Bay, east of Alexandria. It turned out Goddio had discovered the ancient city of Heracleion, which was part of a larger metropolitan area that included the cities of Canopus and Naucratis. Although there is still much work to be done, the discovery has already yielded vital information about Heracleion's importance as a center of trade and religion from the 7th century BCE until the 8th century CE. *The Lost City of Heracleion: The History of the Ancient Egyptian City Now Underwater in the Mediterranean* examines the history of the city, and what life was like there. Along with pictures depicting important people, places, and events, you will learn about Heracleion like never before.

Cleopatra Zahi A. Hawass, Franck Goddio, 2010 *Secrets unfold* in the official companion book to the new national touring exhibition cosponsored by National Geographic. This richly illustrated book chronicles the life of Cleopatra and the centuries-long quest to learn more about the queen and her tumultuous era.

Cleopatra's palace , This is the first in a series of underwater explorations with the new Jacques Cousteau, Frank Gioddio. In the ancient harbour of Alexandria, Egypt, he discovers the island of Antihorros from where Cleopatra ruled Egypt and died with Mark Antony. Searching for her mausoleum in the shallow waters, his

high- tech mapping has already discovered the ancient cobbled streets of her luxury island, pristine sphinxes, and a statue of Cleopatra as Isis, and Egyptian goddess. This discovery may shed light on this queen who ruled a major part of the ancient world.

Diving to the Pharaohs Jürgen Bischoff,2016 In the spring of 1992, acknowledged pioneer of modern maritime archaeology Franck Goddio set out to locate the port facilities and palace quarter of the ancient Egyptian city of Alexandria, founded in 331 BC. Equipped with cutting-edge sonar and nuclear magnetic resonance technology capable of detecting structures hidden deep in sediment, never before had maritime archaeologists put so much effort and technology into uncovering the mysteries of human history. Years later Goddio extended his search to include the Bay of Aboukir, where he discovered cities that had been swallowed up by the sea more than a thousand years before, along with huge temples, colossal statues and the world's largest ancient ship cemetery to date. *Diving to the Pharaohs* offers a first-hand account of this thrilling journey into the past, following Goddio's divers on their underwater ventures. It depicts life on board a research vessel and provides exciting insights into the scientific findings. What was life like for the people of the pharaonic kingdom more than 2,000 years ago? How did they celebrate their feasts and festivals? Why did their cities vanish? These and more questions are answered in this book in the original text by accomplished science writer Jürgen Bischoff, and photos by one of the world's most respected underwater photographers Christoph Gerigk, many of which appear here for the first time in print.

Ship 17 Alexander Belov,Catherine Grataloup,2019 A study of the construction, structure and identification of Ship 17, a Late Period baris-vessel discovered during underwater excavations at Thonis-Heracleion, a sunken city in Aboukir Bay. Ship 17 is placed within the traditions of naval architecture both in Egypt and the wider Mediterranean.

Ancient Alexandria between Egypt and Greece William V.

Harris, Giovanni Ruffini, 2021-10-01 This volume approaches the history of the great city of Alexandria from a variety of directions: its demography, the interaction between Greek and Egyptian and between Jews and Greeks, the nature of its civil institutions and social relations, and its religious, and intellectual history.

The Lost City of Alexandria George Foster Leal, 2015-03-13 Don Robeson is an ex-Navy Seal and archaeologist with the Egyptian Antiquities Council searching for the Lost City of Alexandria. He hits pay dirt when they discover an ancient diadem that may lead to the tomb of Cleopatra. That's when his troubles begin. Don and his crew become targets of antiquity pirates, the secret police, and even corrupt officials, and these people will stop at nothing to claim the discovery of one of Egypt's greatest treasures. When Don's friend Professor Abdul-Clatta is kidnapped along with the diadem, Don knows he must do whatever it takes to get them both back. His dangerous quest leads him from the depths of the Mediterranean to the Catacombs of Alexandria to the great Western Desert. The locals aren't any help, and Don realizes he can trust no one in this foreign land. Accompanied by his beautiful companion Kathleen Caulder, Don vows to regain the diadem for the Egyptian people--the only ones who deserve ownership of Cleopatra's tomb. But time is running out. In order to save the life of his friend, Don uses his Navy Seal training to outsmart and out muscle his greedy enemies. Now, only he can rescue the professor and a priceless ancient relic.

Under Jerusalem Andrew Lawler, 2023-09-26 A spellbinding history of the hidden world below the Holy City—a saga of biblical treasures, intrepid explorers, and political upheaval “A sweeping tale of archaeological exploits and their cultural and political consequences told with a historian’s penchant for detail and a journalist’s flair for narration.” —Washington Post In 1863, a French senator arrived in Jerusalem hoping to unearth relics dating to biblical times. Digging deep underground, he discovered an

ancient grave that, he claimed, belonged to an Old Testament queen. News of his find ricocheted around the world, evoking awe and envy alike, and inspiring others to explore Jerusalem's storied past. In the century and a half since the Frenchman broke ground, Jerusalem has drawn a global cast of fortune seekers and missionaries, archaeologists and zealots, all of them eager to extract the biblical past from beneath the city's streets and shrines. Their efforts have had profound effects, not only on our understanding of Jerusalem's history, but on its hotly disputed present. The quest to retrieve ancient Jewish heritage has sparked bloody riots and thwarted international peace agreements. It has served as a cudgel, a way to stake a claim to the most contested city on the planet. Today, the earth below Jerusalem remains a battleground in the struggle to control the city above. Under Jerusalem takes readers into the tombs, tunnels, and trenches of the Holy City. It brings to life the indelible characters who have investigated this subterranean landscape. With clarity and verve, acclaimed journalist Andrew Lawler reveals how their pursuit has not only defined the conflict over modern Jerusalem, but could provide a map for two peoples and three faiths to peacefully coexist.

Alexandria Rediscovered Jean-Yves Empereur, Stéphane Compoin, 1998 In this text, the author recounts the methods he has used to unearth his finds and assesses the information they reveal about life in the ancient city of Alexandria.

Underwater Archaeology and Coastal Management Mostafa Hassan Mostafa, Nicolas-Christophe Grimal, Douglas Nakashima, 2000 Like many coastal cities, Alexandria must deal with the problems arising from competition and conflict over limited resources. However, that which sets Alexandria apart is a conflict between Alexandria today and the city that Alexandria has been, i.e. the archaeological remains of its past. Must antiquities conservation give way to urban renewal? 27 contributions from relevant disciplines open the way to a solution allowing Alexandria

to harmonize its past and its present and thus weave a unified vision of its future.

Geophysical Phenomena and the Alexandrian Littoral Niki Evelpidou, Christos Repapis, Harry Tzalas, Costas Synolakis, 2019-07-18 This book presents the geomorphology and recent geoarchaeological history of Alexandria which has been repeatedly struck by natural disasters. The Coastal area offers archaeological evidence (burial sites, quarry activities and ancient building remnants), as well as geomorphological features, all revealing a complex evolution of the coastal zone.

Cracking the Egyptian Code Andrew Robinson, 2012-05-01 In 1799 Napoleon's army uncovered an ancient stele in the Nile delta. Its inscription, recorded in three distinct scripts--ancient Greek, Coptic, and hieroglyphic--would provide scholars with the first clues to unlocking the secrets of Egyptian hieroglyphs, a language lost for nearly two millennia. More than twenty years later a remarkably gifted Frenchman named Jean-Francois Champollion successfully deciphered the hieroglyphs on the stele, now commonly known as the Rosetta Stone, sparking a revolution in our knowledge of ancient Egypt. **Cracking the Egyptian Code** is the first biography in English of Champollion, widely regarded as the founder of Egyptology. Andrew Robinson meticulously reconstructs how Champollion cracked the code of the hieroglyphic script, describing how Champollion started with Egyptian obelisks in Rome and papyri in European collections, sailed the Nile for a year, studied the tombs in the Valley of the Kings (a name he first coined), and carefully compared the three scripts on the Rosetta Stone to penetrate the mystery of the hieroglyphic text. Robinson also brings to life the rivalry between Champollion and the English scientist Thomas Young, who claimed credit for launching the decipherment, which Champollion hotly denied. There is much more to Champollion's life than the Rosetta Stone and Robinson gives equal weight to the many roles he played in his tragically brief life, from a teenage professor in

Revolutionary France to a supporter of Napoleon (whom he met), an exile, and a curator at the Louvre. Extensively illustrated in color and black-and-white pictures, *Cracking the Egyptian Code* will appeal to a wide readership interested in Egypt, decipherment and code-breaking, and Napoleon and the French Revolution.
