Photographer's Guide to the Sony DSC-HX80 and HX90V Alexander S.

White,2017-03-23 This book is a complete guide to the Sony Cyber-shot DSC-HX80 and HX90V cameras, two highly versatile, and pocketable, superzoom models, which offer a 30x optical zoom range from 24mm to 720mm. With this book, author Alexander White provides users of these two very similar models with a manual covering all aspects of the cameras' operation. Using a tutorial-like approach, the book shows beginning and intermediate photographers how to take still images and record video with the HX80 and HX90V, and explains when and why to use the cameras' many features. The book provides details about the cameras' automatic and advanced shooting modes as well as their menu options for shooting, playback, setup, and using Wi-Fi connections with in-camera apps. The book has more than 400 color photographs that illustrate the cameras' controls, display screens, and menus. The images also provide examples of photographs taken using the cameras' Scene mode, with settings optimized for subjects such as landscapes, sunsets, portraits, and action shots; and the Creative Style and Picture Effect menu options, with settings that alter the appearance of images. The book also provides introductions to topics such as street photography, macro photography, and getting the most benefit from the superzoom lens. The book includes a full discussion of the video features of the HX80 and HX90V, which can shoot HD movies, and which offer manual control of exposure during movie recording. In three appendices, the book discusses accessories for both models, including cases, power sources, and remote controls, and includes a list of websites and other resources for further information. The book includes

an appendix with “quick tips” on how to take advantage of the cameras’ features in the most efficient ways possible.

British and Commonwealth Merchant Ship Losses to Axis Submarines, 1939-1945 Alan J. Tennent,2001 In this reference volume, the author has consulted a variety of primary sources to provide full details for each of these ships - including the sinking of the vessel, the U-boat and commander responsible, and survivors, if any. Operation 'Deadlight', the disposal of submarines by the Royal Navy at the end of the war, is also covered. Complete with illustrations, this book is a groundbreaking piece of nautical research and will become a standard work of reference on the subject.--BOOK JACKET.

Convoy John Winton,1983 Som titlen udsiger, indeholder bogen en historisk gennemgang af konvojtjenesten i nævnte periode med et naturligt og særligt henblik på de to verdenskrige, i hvilke især ubådskrigen udgjorde den største fare for de transatlantiske transporter.

The Canadian Naval Chronicle, 1939-1945 Robert A. Darlington,Fraser McKee,1998 In World War II the Canadian Navy embarked on a five-year anti-submarine offensive with a tiny fleet of six destroyers and a navy largely untrained in submarine warfare. This chronicle of ship successes and losses charts the increase in fighting capability of the Canadian naval forces and their growing success against enemy submarines and surface warships. From the dreadful loss of sixteen ships out of a single convoy in 1941, to the painstaking teamwork of hunting down and destroying an asdic contact a few years later, the authors have managed to capture the drama of these events in considerable detail. The information provided in each account represents

comprehensive research into the incident from available records and from personal recollections and interviews collected by the authors. Each includes the ships and crews involved on both sides, their movements just prior to the event, the action itself, the casualty lists, and the medals awarded as a result of the action. This book also contains, for the first time, a complete record of all the Canadian owned Merchant ships lost, as well as a table of RCAF Squadron successes against enemy U-boats. --

Underwater Optics Seibert Q Duntley,1966 The irradiance pattern was measured for the propagation of a collimated beam of light underwater. A neodymium-doubled green laser was transmitted horizontally at a six foot depth in Lake Winnepesaukee, N.H. The irradiance was measured at distances from 0 to 100 feet and for off-axis angles from 0 to 58 degrees. The water had an attenuation length of 4.54 ft/ln and an absorption coefficient of 0.0446 ln/ft. The ratio of attenuation coefficient to absorption coefficient was 4.94. The fractional power contained within a cone of various angles was computed. At 20 attenuation lengths only 10% of the total power is contained within a cone of 4 degrees whereas at 4 attenuation lengths this same cone contains 50% of the power. (Author).
