Transcultural Nursing Theory and Models Priscilla Limbo Sagar, EdD, RN, ACNS-BC, CTN-A, 2011-08-09 *Transcultural Nursing Theory and Models: Application in Nursing Education, Practice, and Administration* is a must read for the nurse currently practicing. National and global changes in demographics, a changing global economy, have further dramatized the need for culturally competent nurses. I found this book to be what I had hoped for and more related to my understanding of the concept of transcultural nursing (TCN)....I would highly recommend this book to any nurse who is looking to deepen her understanding of the many diverse cultures she encounters at the bedside, or out in the community using components of the theory, models and

assessment guide presented in this book.--Advance for Nurses This book makes a worthwhile contribution to the field of transcultural nursing by complementing texts that introduce theory and models or delve into them individually and more deeply. Sagar contributes her expertise as a Transcultural Nursing Scholar by focusing on how to use the models and guide. She explains and shows the reader how transcultural nursing theory can be disseminated and implemented.--Online Journal of Cultural Competence in Nursing and Healthcare This volume is the first to examine and promote the application of current, major transcultural nursing (TCN) theory and models and assessment tools in nursing education, practice, and administration. As a comprehensive text for master's and bachelor's level nursing students, it features case studies, care plans, initial role playing exercises, and implications of TCN concepts when planning, implementing and evaluating client care. This new updated edition discusses individual competences and evidence-based practices as well as international standards, organizational cultural competence, and perspectives on health care in a global context. The individual chapters present selected populations, offering a balance of collectivistic and individualistic cultures. Featuring a uniquely comprehensive assessment guide, it is the only book that provides a complete profile of a population group across clinical practice settings. Further, it includes a personal understanding of the traditions and customs of society, offering all health professionals a unique perspective on the implications for patient care.

Anthropology and Nursing Pat Holden, Jenny Littlewood, 2015-07-03 Nursing has been described as the most 'natural' female occupation of all, embodying the so-called feminine ideals of tenderness and caring. Yet these ideals are juxtaposed with images of nurses as sex objects, or as ruthlessly efficient harridans. How have these very different images been constructed? And how do they relate to the reality of nursing - the close contact with blood, urine and faeces, and the involvement with the rites of birth, illness and death? This book, first published in 1991, explores the alternative ways different societies have developed to reconcile these contradictions. Using contemporary, historical and cross-cultural case material, the contributors trace the historical development of the role, and investigate the expected qualities of nurses within different cultural settings, such as India, Uganda and Japan. They look closely at 'the nurse' as a social construct, and demonstrate how the stereotypes relate to a particular society's notions of gender. Designed primarily for anthropologists and sociologists interested in health, illness and systems of health care, this book challenges some of the myths of traditional nursing studies and provides an original perspective on doctor/nurse/patient relationships.

The Influence of Psychological Trauma in Nursing Karen J. Foli, John R.

Thompson,2019-06-17 As nurses know firsthand, the impact of psychological trauma is not limited to those who experience it. Others—including nurses and caregivers—are indirectly affected. In healthcare, patients' psychological trauma may manifest in odd, uncomfortable, or confusing behaviors. Nurses and healthcare workers must recognize that patients may be feeling unsafe or struggling with low self-esteem, anxiety, grief, loneliness, or depression born from trauma. As nurses listen to, empathize with, and sometimes grieve with the people they care for, they need to comprehend the "why" behind these feelings and actions. The Influence of Psychological Trauma in Nursing helps nurses gain awareness and knowledge about trauma and recovery so they can heal and bring holistic healing to others. Authors Karen J. Foli and John R. Thompson provide a primer on psychological trauma, helping readers identify and understand the common forms of trauma in society. Filled with examples, tools, assessments, and learning objectives, this book helps nurses move forward as trauma-informed caregivers.

Care Madeleine M. Leininger,1988 Die Beiträge der Aufsatzsammlung versuchen auf theoretischer und auch auf praktischer Ebene das Konzept des caring (Care = umfassende oder auch ganzheitliche Pflege im Gegensatz zur medizinischen Assistenz) als notwendigen Bestandteil der Krankenpflege zu etablieren. Im Vordergrund stehen dabei kulturell differente Ansätze der umfassenden Pflege.

Maternal & Child Health Nursing Adele Pillitteri,2010 Growing research shows that many children from immigrant and refugee families are not doing

well in school, due in part to linguistic and cultural disadvantages. Teaching dual-language learners requires cultural sensitivity, an understanding of language acquisition, and intentional teaching strategies. Combining research and techniques, this resource helps early childhood educators support dual-language learners as they develop the skills necessary for school readiness and success.

Global Education Monitoring Report 2020 UNESCO,2020-07-07 This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.
