Radio Drama Tim Crook, 2002-01-04 Radio Drama brings together the practical skills needed for radio drama, such as directing, writing and sound design, with media history and communication theory. Challenging the belief that sound drama is a 'blind medium', Radio Drama shows how experimentation in radio narrative has blurred the dividing line between fiction and reality in modern media. Using extracts from scripts and analysing radio broadcasts from America, Britain, Canada and Australia, the book explores the practicalities of producing drama for radio. Tim Crook illustrates how far radio drama has developed since the first 'audiophonic production' and evaluates the future of radio drama in the age of live phone-ins and immediate access to programmes on the Internet.

Hiring the Best Knowledge Workers, Techies & Nerds Johanna Rothman, 2013-07-15 This is the digital version of the printed book (Copyright © 2004). Proven Methods for Attracting, Interviewing, and Hiring Technical Workers Good technical people are the foundation on which successful high technology organizations are built. Establishing a good process for hiring such workers is essential. Unfortunately, the generic methods so often used for hiring skill-based staff, who can apply standardized methods to almost any situation, are of little use to those charged with the task of hiring technical people. Unlike skill-based workers, technical people typically do not have access to cookie-cutter solutions to their problems. They need to adapt to any situation that arises, using their knowledge in new and creative ways to solve the problem at hand. As a result, one developer, tester, or technical manager is not interchangeable with another. This makes hiring technical people one of the most critical and difficult processes a technical manager can undertake. Hiring the Best Knowledge Workers, Techies & Nerds: The Secrets & Science of Hiring Technical People takes the guesswork out of hiring and diminishes the risk of costly hiring mistakes. With the aid of step-by-step descriptions and detailed examples, you'll learn how to write a concise, targeted job description source candidates develop ads for mixed media review résumés quickly to determine Yes, No, or Maybe candidates develop intelligent, nondiscriminatory, interview techniques create fool-proof phone-screens check references with a view to reading between the lines extend an offer that will attract a win-win acceptance or tender a gentle-but-decisive rejection and more An effective hiring process is crucial to saving an organization the costs and consequences of a bad hiring decision. Not only is a bad hire costly in terms of recruiting expenses and the time spent hiring, it can also bog down or derail projects that may already be running late. You, your team, and your organization will live with the long-term consequences of your hiring decision. Investing time in developing a hiring strategy will shorten your decision time and the ramp-up time needed for each new hire. Technical leaders, project and program managers, and anyone putting together a team of technical workers will greatly benefit from this book.

Radiation Nation Natasha Zaretsky, 2018-02-13 On March 28, 1979, the worst nuclear reactor accident in U.S. history occurred at the Three Mile Island power plant in

Central Pennsylvania. Radiation Nation tells the story of what happened that day and in the months and years that followed, as local residents tried to make sense of the emergency. The near-meltdown occurred at a pivotal moment when the New Deal coalition was unraveling, trust in government was eroding, conservatives were consolidating their power, and the political left was becoming marginalized. Using the accident to explore this turning point, Natasha Zaretsky provides a fresh interpretation of the era by disclosing how atomic and ecological imaginaries shaped the conservative ascendancy. Drawing on the testimony of the men and women who lived in the shadow of the reactor, Radiation Nation shows that the region's citizens, especially its mothers, grew convinced that they had sustained radiological injuries that threatened their reproductive futures. Taking inspiration from the antiwar, environmental, and feminist movements, women at Three Mile Island crafted a homegrown ecological politics that wove together concerns over radiological threats to the body, the struggle over abortion and reproductive rights, and eroding trust in authority. This politics was shaped above all by what Zaretsky calls biotic nationalism, a new body-centered nationalism that imagined the nation as a living, mortal being and portrayed sickened Americans as evidence of betrayal. The first cultural history of the accident, Radiation Nation reveals the surprising ecological dimensions of post-Vietnam conservatism while showing how growing anxieties surrounding bodily illness infused the political realignment of the 1970s in ways that blurred any easy distinction between left and right.
