Non-Chemical Weed Control Khawar Jabran, Bhagirath S. Chauhan, 2018-01-03 Non-Chemical Weed Control is the first book to present an overview of plant crop protection against non-food plants using non-chemical means. Plants growing wild—particularly unwanted plants found in cultivated ground to the exclusion of the desired crop—have been treated with herbicides and chemical treatments in the past. As concern over environmental, food and consumer safety increases, research has turned to alternatives, including the use of cover crops, thermal treatments and biotechnology to reduce and eliminate unwanted plants. This book provides insight into existing and emerging alternative crop protection methods and includes lessons learned from past methodologies. As crop production resources decline while consumer concerns over safety increase, the effective control of weeds is imperative to insure the maximum possible levels of soil, sunlight and nutrients reach the crop plants. Allows reader to identify the most appropriate solution based on their individual use or case Provides researchers, students and growers with current concepts regarding the use of modern,

environment-friendly weed control techniques Presents methods of weed management—an important part of integrated weed management in the future Exploits the knowledge gained from past sustainable weed management efforts

**Motorized Obsessions** Paul R. Josephson,2007-09-02 2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson

discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

*Twelve Years a Slave* Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a

'Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

*The Resilient Farm and Homestead* Ben Falk, 2013 *The Resilient Farm and Homestead* is a manual for developing durable, beautiful, and highly functional human habitat systems fit to handle an age of rapid transition. Ben Falk is a land designer and site developer whose permaculture-research farm has drawn national attention. The site is a terraced paradise on a hillside in Vermont that would otherwise be overlooked by conventional farmers as unworthy farmland. Falk's wide array of fruit trees, rice paddies (relatively unheard of in the Northeast), ducks, nuts, and earth-inspired buildings is a hopeful image for the future of regenerative agriculture and modern homesteading. The book covers nearly every strategy Falk and his team have been testing at the Whole Systems Research Farm over the past decade, as well as experiments from other sites Falk has designed through his off-farm consulting business. The book includes detailed information on earthworks; gravity-fed water systems;

species composition; the site-design process; site management; fuelwood hedge production and processing; human health and nutrient-dense production strategies; rapid topsoil formation and remineralization; agroforestry/silvopasture/grazing; ecosystem services, especially regarding flood mitigation; fertility management; human labor and social-systems aspects; tools/equipment/appropriate technology; and much more, complete with gorgeous photography and detailed design drawings. The Resilient Farm and Homestead is more than just a book of tricks and techniques for regenerative site development, but offers actual working results in living within complex farm-ecosystems based on research from the great thinkers in permaculture, and presents a viable home-scale model for an intentional food-producing ecosystem in cold climates, and beyond. Inspiring to would-be homesteaders everywhere, but especially for those who find themselves with unlikely farming land, Falk is an inspiration in what can be done by imitating natural systems, and making the most of what we have by re-imagining what's possible. A gorgeous case study for the homestead of the future.

Lev's Violin Helena Attlee,2021-04-01 \*A RADIO 4 BOOK OF THE WEEK\* 'Utterly enthralling - a

beautifully-written voyage of discovery that takes us deep into the heart of music-making' Deborah Moggach From the moment she hears Lev's violin for the first time, Helena Attlee is captivated. She is told that it is an Italian instrument, named after its former Russian owner. Eager to discover all she can about its ancestry and the stories contained within its delicate wooden body, she sets out for Cremona, birthplace of the Italian violin. This is the beginning of a beguiling journey whose end she could never have anticipated. Making its way from dusty workshops, through Alpine forests, cool Venetian churches, glittering Florentine courts, and far-flung Russian flea markets, Lev's Violin takes us from the heart of Italian culture to its very furthest reaches. Its story of luthiers and scientists, princes and orphans, musicians, composers, travellers and raconteurs swells to a poignant meditation on the power of objects, stories and music to shape individual lives and to craft entire cultures.

*Practical Greenkeeping* Jim Arthur,2003 The first edition of Practical Greenkeeping was produced

in 1997 to fill a huge void in practical knowledge in a format that could be easily understood at all levels. Jim Arthur's experience, advising more than 550 golf clubs in Britain and Europe and acting as consultant agronomist to the Championship Committee of the R&A, made him the ideal man for the job. His no-nonsense, down-to-earth approach conveys his message loudly and clearly. Golf courses can flourish by following traditional methods that are the most simple and most effective, both in terms of condition and cost. This second edition contains a large amount of new material in the form of appendices to chapters, bringing the debate right up to the minute in terms of new regulations on pesticides and fertilisers and restrictions on the use of water. Now, more than ever, the sound traditional advice in Practical Greenkeeping is vital to all those involved in the preparation of golf courses. New generations of student and trainee greenkeepers will find the content of this book invaluable and it will also stimulate much debate and provide encouragement for experienced course managers.
