Names and Monuments in the University of Ibadan, Ibadan, Nigeria Victor Osaro Edo,2015

Ibadan at Fifty, 1948-1998 B. A. Mojuetan,2000 This volume presents fifty years of the University of Ibadan, Nigeria's oldest and pre-eminent university, from its inception as a college of the University of London. The contributors are various existing and retired faculty professors, heads of the university's libraries, publishing house and printing press; from the university's administration, and former students. The essays are diverse and specific in their handling of the university's history; but all broadly document the common experience of the university's decline, and the enormous gulf between the present state of the university and the kind of institution its creators and ambassadors believe it should be. They reflect upon the earlier role of the university as an institutional of international renown and influential in shaping Nigeria's history; and the present state of depleted academic departments and inadequate libraries; and they describe how the university is suffering from the Africa-wide brain-drain and a chronic lack of funding. The essays further demonstrate how the historical development of the university has largely rested upon the mostly detrimental and at times disastrous attitude and actions of the Nigerian State; and that the history of the university is inseparable from the history of the country; the university having become the intellectual equivalent of a marginalised Third World economy. The overall picture is not wholly one of gloom however. The contributors also propose directions the university may pursue to reverse the decline; and this publication itself represents a spirited rear-guard action.

Nigeria's University Age Tim Livsey,2017-11-13 This book explores the world of Nigerian universities to offer an innovative perspective on the history of development and decolonisation from the 1930s to the 1960s. Using political, cultural and spatial approaches, the book shows that Nigerians and foreign donors alike saw the nation's new universities as vital institutions: a means to educate future national leaders, drive economic growth, and make a modern Nigeria. Universities were vibrant places, centres of nightlife, dance, and the construction of spectacular buildings, as well as teaching and research. At universities, students, scholars, visionaries, and rebels considered and contested colonialism, the global Cold War, and the future of Nigeria. University life was shaped by, and formative to, experiences of development and decolonisation. The book will be of interest to historians of Africa, empire, education, architecture, and the Cold War.

Entrepreneurial Orientation of Graduate Students in the University of Ibadan, South-West, Nigeria Ajibola Omoarebun,2014-11-06 Academic Paper from the year 2014 in the subject Sociology - Work, Profession, Education, Organisation, grade: 5.0 (A), University of Ibadan, language: English, abstract: Graduate unemployment in Nigeria is a chief cause of many social problems such as fraud, armed robbery and so on. Among the several reasons social researchers have listed as contributing factors to graduate unemployment, a lack of comprehensive curricula in the higher institutions has been pin-pointed to be crucial to the malaise of graduate unemployment. Entrepreneurship education if imbibed in the curricula of tertiary institutions would instill entrepreneurial behavior in students and graduates, which would further encourage graduates to become self-reliant and employers of labor. This study examined the levels of entrepreneurship orientation among graduate students in the University of Ibadan. The study made use of theories of planned behaviour and creativity and innovation theories. The sample was made up of 270 graduate students randomly drawn from six faculties of the University of Ibadan. Qualitative and quantitative data for the study were collected through the use of questionnaires and in-depth oral interviews. The result showed that majority of the respondents (78%) had never been exposed to entrepreneurship education upon the completion of their first degree. More than half of the respondents (55.6%) rated their level of entrepreneurial orientation as high, 31.4% rated it as moderate and the remaining 13.0% rated it as low. The paper asserts that graduate students are willing to become entrepreneurs if exposed to active entrepreneurship education - as they are cognizant of the benefits of being self-reliant and independent of the labor market.
