Airline Maps Mark Ovenden,Maxwell Roberts,2019-10-29 A nostalgic and celebratory look back at one hundred years of passenger flight, featuring full-color reproductions of route maps and posters from the world's most iconic airlines, from the author of bestselling cult classic Transit Maps of the World. In this gorgeously illustrated collection of airline route maps, Mark Ovenden and Maxwell Roberts look to the skies and transport readers to another time. Hundreds of images span a century of passenger flight, from the rudimentary trajectory of routes to the most intricately detailed birds-eye views of the land to be flown over. Advertisements for the first scheduled commercial passenger flights featured only a few destinations, with stunning views of the countryside and graphics of biplanes. As aviation took off, speed and mileage were trumpeted on bold posters featuring busy routes. Major airlines produced highly stylized illustrations of their global presence, establishing now-classic brands. With trendy and forward-looking designs, cartographers celebrated the coming together of different cultures and made the earth look ever smaller. Eventually, fleets got bigger and routes multiplied, and graphic designers have found creative new ways to display huge amounts of information. Airline hubs bring their own cultural mark and advertise their plentiful destination options. Innovative maps depict our busy world with webs of overlapping routes and networks of low-cost city-to-city hopping. But though flying has become more commonplace, Ovenden and Roberts remind us that early air travel was a glamorous affair for good reason. Airline Maps is a celebration of graphic design, cartographic skills and clever marketing, and a visual feast that reminds us to enjoy the journey as much as the destination.

Airline Visual Identity, 1945-1975 Matthias C. Hühne,2016-09 Collector's Limited Edition A super stylish journey: The ultimate sourcebook for the best airline graphic design presented in a handcrafted, aluminum covered clamshell case Arguably no other book has been produced with such technical sophistication in recent years and few design books have received such an overwhelming worldwide media resonance. Airline Visual Identity 1945-1975 rounds up the most imaginative, influential and surprising designs of the airlines' commercial art from the golden age of flying. It provides an unprecedented, systematic outline of the development of the visual identities of thirteen pioneering airlines, combining innovative research and

stunning, museum-like presentations of hundreds of spectacular aviation posters, photos and other illustrations. Conceived by some of the world's top creative minds, such as Ivan Chermayeff, Otl Aicher, Massimo Vignelli, Academy Award winner Saul Bass, or advertising titan Mary Wells Lawrence, the designs found in the book's case studies also illustrate the shift from traditional methods of corporate design and advertising to comprehensive modern branding programs which took place in the same period. To reproduce all of the images as precisely as possible, a total of seventeen different colors, five different varnishes, and two different methods of foil printing and embossing were used. The result is a book of exceptional vivacity that pushes the limits of modern art printing technology. The Premium Edition has received glowing reviews in leading media around the world, including The New York Times, Newsweek, CNN, New Republic, Slate, Adweek, and dozens of others in the United States, France, Britain, Germany, China, Japan, Switzerland, Austria, Australia, Spain, Italy, Norway, etc. Created by internationally recognized art book publisher Callisto and designed by distinguished Berlin-based designer Yvonne Quirnbach, *Airline Visual Identity 1945-1975* was produced in a renowned printing facility in northern Italy on deluxe 200g Fedrigoni paper. The clamshell case, also designed by Yvonne Quirnbach and limited to an edition of 999, was handcrafted in Berlin, Germany and features a metal cover similar in appearance to the aluminum alloy used to manufacture jet aircraft in the 1960s.

The History of British European Airways Charles Woodley, 2006-01-01 BEA was formed in 1946 and took over most UK domestic and European routes under the British government's nationalisation policy. It began operations with a fleet of outdated and hopelessly uneconomic passenger aircraft that were derivatives of wartime types such as the DC-3, Avro Viking and Rapide. By the end of 1955 the airline had re-equipped with more modern types such as the jet-prop Viscount and moved into a profit for the first time. From 1960 onwards the airline introduced larger jets such as the Comet, Trident and BAC 1-11. BEA merged with the British Overseas Airways Corporation in 1974 to form British Airways. This book looks at BEA's predecessors, its formation and early operation from Croydon and Northolt and the move to the newly-opened London Heathrow. The evolving

structure is explained with chapters covering engineering bases, terminals, European and domestic services, cargo services and helicopter operations. The aircraft flown are all described in detail and the book includes anecdotes from former crew and ground-staff, a full fleet list and is highly illustrated throughout.

Boat Trains: The English Channel & Ocean Liner Specials Martyn Pring, 2021-01-18 A study of the specialty train, including its history, development, and operation beginning at the end of the nineteenth century. In many ways this title, featuring the evolution of cross-channel boat trains and the many dedicated services responsible for moving international passengers to and from trans-Atlantic steamers, is an extension of luxury railway travel. But that's not the full story as it encapsulates more than 125 years of independent and organised tourism development. At the end of the nineteenth century, faster and more stable twin-screw vessels replaced cross-channel paddlers resulting in a significant expansion in the numbers of day excursionists and short-stay visitors heading to Belgium, France and the Channel Islands. Continental Europe, as it had done since the end of the Napoleonic Wars beckoned, introducing ideas of modern-day mass tourism. Numerous liners bestriding the globe were British domiciled. Major ports became hives of commercial activity involving moving freight and mail, as well as transporting all manner of travellers. Not only was there intense competition for passenger traffic between the Old and New World and Britain's imperial interests, greater numbers of well-heeled tourists headed off to warmer winter climes, and also experimented with the novel idea of using ocean steamers as hotels to visit an array of diverse destinations. Cruise tourism and the itinerary had arrived as 'Ocean Special' boat trains became essential components of railway and port procedures. Whilst some railway operations were dedicated to emigrant traffic, continental and ocean liner boat trains were also synonymous with the most glamorous travel services ever choreographed by shipping lines and railway companies working closely in tandem. This well illustrated book explores the many functions of boat train travel. "This book should appeal to the rail fan, the ship enthusiast, the connoisseur of travel posters and those interested in the business of transportation. I know of nowhere else one can find so much information on boat train operation in one book. . . . Well worth a read by anyone interested in the interconnectivity of different means of public transportation." —Charles H. Bogart, Steamship Historical Society of America

Boeing 737 Wolfgang Borgmann, 2021-04-28 The Boeing 737 is undoubtedly one of the best known of all passenger aircraft and has been built in greater numbers than any other commercial aircraft in the world. There are few airline passengers of the last decade who have not yet flown on one of these aircraft. More than 10,000 examples have been built in all its variants--an unbelievably high number for an airliner. This book describes the aircraft's early development--from the first concept drawings in the early 1960s to construction, testing, and first flights--to the present, with exciting photos, drawings, and information from the Boeing company archives. From the 737-100 through to today's 737MAX, all versions are covered in detail, including its use by many of the world's airlines, including Air France, British Airways, Delta, Easyjet, Lufthansa, SAS, Southwest, and many others.

Arrival Journey 100 Years of British Airways 1919-2019 Innovation on the British Airways Journey Trail Game Errol Baptiste, 2019-02-09 The Innovation on the British Airways Journey Trail Game came to Errol Baptiste as a new novel idea can be added by connecting the DNA of British Airways' past heritage and history on civil aviation during the past 100 years. The introduction of a coming journey trail game occurred, which British Airways can trace its origins back to the birth of civil aviation, the pioneering days that following the end of World War I. It will be 100 years on August 25, 2019, which have passed since the world's first scheduled air service took place in Britain of the first daily flight route from London to Paris on August 25, 1919, air travel has changed beyond recognition throughout the decades. The future aim was to promote the local, regional, national, and international concept on British Airways' past heritage and its history of civil aviation just 100 years ago. Each decade saw new developments and challenges, which shaped the path for the future. There is a huge gap in the market area of a new journey trail also a very important

milestone to remember how British Airways became the airline of 100 years ago. It has prompted Errol Baptiste to bring about the innovation journey trail game on British Airways by exploring the past life of 20th Century and to think about the present issues and the future legacy on the 100th Anniversary Year of British Airways, which are very relevant today as the previous 100 years. Anniversary on British Airways is excellent opportunities for celebrations or commemorations that the first flight, which took off from London's Hounslow Heath, close to today's Heathrow Airport 100 years later, carried a single passenger and cargo that included newspapers, Devonshire cream, jam and grouse to Paris on August 25, 1919. These are the event that belongs to the whole world, but the year of 1919, which the Aircraft Transport and Travel Limited (AT &T), a forerunner of today's British Airways, launched the world's first daily international scheduled air service between London and Paris. Ten weeks later the first Airmail flight took off from London's Hounslow Heath to Paris on November 10, 1919, which will be the 100th Anniversary Year on the first Airmail flight of November 10, 2019. The Innovation on the British Airways Journey Trail Game shall be a world changing reality as a unique milestone by creating good opportunities for the new journey trail game by exploring the past life of 20th Century heritage and history of civil aviation of British Airways and to think about about the present challenges and future issues, which are very relevant of the previous 100 years.

This is Hong Kong Miroslav Sasek, 2007-02-13 Like the other Sasek classics, this is a facsimile edition of the original book. The brilliant, vibrant illustrations have been meticulously preserved, remaining true to his vision more than 40 years later. Facts have been updated for the 21st-century, appearing on a This is . . . Today page at the back of the book. These charming illustrations, coupled with Sasek's witty, playful narrative, make for a perfect souvenir that will delight both children and their parents, many of whom will remember the series from their own childhoods. This is Hong Kong, first published in 1965, captures the enchantment and the contrasts of Hong Kong in the sixties. Roaring jets bring in the tourists; bamboo rickshaws taxi them through exotic streets fragrant with incense, roasting chestnuts, and honey-glazed Peking duck. Sasek shows you the sweeping panorama of gleaming Kowloon Bay framed by misty mountain ridges, then moves in for close-ups of laborers and hawkers, refugees from the mainland, and sailors of flame-red junks, and the strange water people who, it is said, never set foot on dry land.
