Oscar Krisen Buros

Leadership Behavior Analysis II

Blanchard, 1998-06 Give your managers a 360-degree view of their leadership capabilities. This questionnaire will assist your managers in discovering their own perception of their leadership style. It presents 20 real-life situations along with four possible responses for each. Managers' responses to these situations reveal their: Leadership style flexibility Primary and secondary styles Effectiveness in diagnosing a situation and matching their choice of a leadership style to the situation Overall tendencies to misuse or over-use various styles. This questionnaire presents the same 20 situations from the Self to a manager's boss, associates, and/or team members. Participants are asked to choose the response that best depicts the action he or she believes the manager being evaluated would take in each situation. These results coupled with results from the Self will give the manager a true-to-life picture of their leadership style and help them identify areas for improvement. This scoring instrument provides an easy way to tabulate and review the results of the Self and Other questionnaires. You will need one Scoring form for each person completing the Self and Other instruments. Leadership Style Profile; This profile will help your managers contrast their perception of their leadership style with those of their boss, associates, and team members. Use this tool to effectively combine results of the LBAII Self and Other forms. Managers will be able to

answer these questions about their leadership style: Do I see myself as other see me? Am I flexible? Do I manage people differently? Do I diagnose situations well? These four tools are the only resources you need to evaluate and analyze leadership style!

Feedback to Managers Jean Brittain Leslie, 2013-09-15 Feedback is a rare commodity in day-to-day organizational life, but it is a key to ongoing effectiveness. One popular vehicle for

getting feedback from one's boss, peers, subordinates, and customers is the multiple-perspective or 360-degree-feedback instrument. Whether part of a management-development course or used alone, this kind of instrument can enhance self-awareness by highlighting a leader's strengths and areas in need of further development. Selecting the right multirater instrument from among the dozens that are available can be difficult. This new edition of *Feedback to Managers*, the fourth, updates and expands the popular 1998 edition. It guides the selection process with an in-depth analysis of 32 publicly available instruments. Each of the instrument reports includes descriptive information, a look at the research behind the instrument, and descriptions of support materials.
