Casio Fx-991EX Classwiz for High School Students David Getling,2017-06-20 As exam boards abandon the archaic practice of handing out printed statistical tables, the Casio fx-991EX Classwiz has become the baseline calculator for students who are too mean or too poor to invest in a good graphics display calculator. However, for the price, this is a truly excellent calculator that offers a multitude of features. But, to get the best out of it, you need to learn how to use it effectively. It's very unlikely that your school will teach you how to do this, which is why this book has been written. With over 400 screen shots, and all the accompanying keystrokes, you won't be left guessing how to do something. Because, learning how to use this calculator well will definitely improve your exam grades.

Casio Fx-991ES PLUS for High School Students David Getling,2016-03-22 The Casio fx-991ES PLUS is a very widely used scientific calculator, and it's not hard to see why. For a very low price it delivers exceptional functionality. In fact, in this price range, you would either have to be unaware of its capabilities, or exceedingly stupid, to use anything else. In most cases it's almost certainly the former, because most students who do own this calculator have no idea of most of the features that it offers them: features that might help them get a better exam grade. This book aims to remedy that situation. With over 250 screen shots, accompanied by all the key strokes, you won't be left guessing how to do something. If you read this book, and try out the examples, you will come away with a thorough understanding of how to get the best out of this very powerful calculator.

Is God a Mathematician? Mario Livio,2011-02-22 Bestselling author and astrophysicist Mario Livio examines the lives and theories of history's greatest mathematicians to ask how—if mathematics is an abstract construction of the human mind—it can so perfectly explain the physical world. Nobel Laureate Eugene Wigner once wondered about “the unreasonable effectiveness of mathematics” in the formulation of the laws of nature. *Is God a Mathematician?* investigates why mathematics is as powerful as it is. From ancient times to the present, scientists and philosophers have marveled at how such a seemingly abstract discipline could so perfectly explain the natural world. More than that—mathematics has often made predictions, for example, about subatomic particles or cosmic phenomena that were unknown at the time, but later were proven to be true. Is mathematics ultimately invented or discovered? If, as Einstein insisted, mathematics is “a product of human thought that is independent of experience,” how can it so accurately describe and even predict the world around us? Physicist and author Mario Livio brilliantly explores mathematical ideas from Pythagoras to the present day as he shows us how intriguing questions and ingenious answers have led to ever deeper insights into our world. This fascinating book will interest anyone curious about the human mind, the scientific world, and the relationship between them.
