L'agronomie aujourd'hui Thierry Doré, Philippe Martin, Marianne Le Bail, Bertrand Ney, Jean Roger-Estrade, 2006-08-31 L'agronomie a évolué au cours des trente dernières années, en élargissant ses échelles d'approche, en modernisant ses outils de travail et en renouvelant ses objets d'étude. S'appuyant sur une abondante bibliographie, l'ouvrage s'attache à montrer cette évolution en balayant l'ensemble du champ de connaissances que l'agronomie couvre aujourd'hui. L'ouvrage est destiné aux étudiants, aux professionnels et aux chercheurs non spécialistes de l'agronomie, intéressés par une vision panoramique et documentée des évolutions de la discipline. Il est accompagné d'un cd-rom reproduisant une centaine d'articles de référence en agronomie.

Landscape Agronomy Davide Rizzo, Elisa Marraccini, Sylvie Lardon, 2022-09-09 The landscape is widely identified as a relevant target both by integrative policies and across the disciplines dealing with resource management and territorial planning. Landscape agronomy promotes a greater involvement of agricultural sciences into this arena by increasing the attention on the dynamics relating the farming practices to the natural resources and the temporal and spatial patterns of land covers. This book covers the background that improved the transdisciplinary interface of agronomy with spatially-explicit disciplines like landscape ecology and geography both in research

and in training programs, in addition to some experiences of participative landscape management. On these bases, the state of art on cutting-edge data availability and methodological issues is used to select and discuss some worldwide case studies. This selection of research topic examples underpins the concluding discussions about challenges ahead. Researchers as well as policy and decision makers are the main target of this book that seeks to provide a toolbox of concepts, examples and ideas to improve the understanding of agricultural landscapes. Agricultural activities manage the greatest share of land surface on Earth with fast-paced changes compared to any other human land use. With this book we aim at providing a stronger interface between agricultural science and landscape design processes.

Sustainable Agriculture Volume 2 Eric Lichtfouse, Marjolaine Hamelin, Mireille Navarrete, Philippe Debaeke, 2011-02-09 This book gathers review articles that analyze current agricultural issues and knowledge, then propose alternative solutions. It will therefore help all scientists, decision-makers, professors, farmers and politicians who wish to build a safe agriculture, energy and food system for future generations.

Conference PanEuropeenne a Haut Niveau Sur L'agriculture Et la Biodiversite Biologique Et Paysagere, Pour Une Agriculture Durable en Europe : Actes Council of Europe, 2003-01-01

Sustainable Agriculture Eric Lichtfouse, Mireille Navarrete, Philippe Debaeke, Souchere Véronique, Caroline Alberola, 2009-11-11

Sustainability rests on the principle that we must meet the needs of the present without compromising the ability of future generations to meet their own needs. Starving people in poor nations, obesity in rich nations, increasing food prices, on-going climate changes, increasing fuel and transportation costs, flaws of the global market, worldwide pesticide pollution, pest adaptation and resistance, loss of soil fertility and organic carbon, soil erosion, decreasing biodiversity, desertification, and so on. Despite unprecedented advances in sciences allowing to visit planets and disclose subatomic particles, serious terrestrial issues about food show clearly that conventional agriculture is not suited any longer to feed humans and to preserve ecosystems. Sustainable agriculture is an alternative for solving fundamental and applied issues related to food production in an ecological way. While conventional agriculture is driven almost solely by productivity and profit, sustainable agriculture integrates biological, chemical, physical, ecological, economic and social sciences in a comprehensive way to develop new farming practices that are safe and do not degrade our environment. In that respect, sustainable agriculture is not a classical and narrow science. Instead of solving problems using the classical painkiller approach that treats only negative impacts, sustainable agriculture treats problem sources. As most actual society issues are now intertwined, global, and fast-developing, sustainable agriculture will bring solutions to build a safer world. This book gathers review

articles that analyze current agricultural issues and knowledge, then propose alternative solutions. It will therefore help all scientists, decision-makers, professors, farmers and politicians who wish to build a safe agriculture, energy and food system for future generations.

Une agronomie pour le XXI^e siècle, 2018-12-21

L'enjeu des agricultures est aujourd'hui de produire en réduisant drastiquement les émissions de gaz à effet de serre, sur des espaces agricoles limités où doivent être préservés la biodiversité, la qualité des ressources, les sols, les eaux, l'air... Cet ouvrage collectif, publié à l'occasion des vingt années d'existence du département Environnement et Agronomie de l'Inra, fait le point sur les avancées réalisées dans ce sens.

Agroecological Practices For Sustainable Agriculture: Principles, Applications, And Making The Transition Wezel Alexander, 2017-06-19 Good agroecological practices are indispensable for the development of sustainable agriculture. In this book, principles, diversity and applications of agroecological practices for a range of systems are presented, transforming scientific research and participatory knowledge of production into practical application. It illustrates a broad range of research and teaching being used within the farming community to demonstrate best practice and current state-of-play within the field. Agroecological methods used in crop farming, grass-based livestock farming, fish production, and other complex farming systems are discussed. Conclusions are drawn from studies to provide an outlook on future trends of agroecological

practices and on policies supporting implementation. Due to emphasis on real-life application, it is relevant not only to students of the agricultural sciences and public policy, but also to researchers, stakeholders and policy makers involved in the development of sustainable agriculture.

Agroecological Crop Protection Jean-Philippe Deguine, Caroline Gloanec, Philippe Laurent, Alain Ratnadass, Jean-Noël Aubertot, 2017-12-22 This book is devoted to Agroecological Crop Protection, which is the declension of the principles of agroecology to crop protection. It presents the concepts of this innovative approach, case studies and lessons and generic keys for agroecological transition. The book is intended for a wide audience, including scientists, experimenters, teachers, farmers, students. It represents a new tool, proposing concrete keys of action on the basis of feedbacks validated scientifically. Beyond the examples presented, it is therefore of general scope and proposes recommendations for all temperate and tropical cropping systems. It contributes to the training and teaching modules in this field and it is an updated information support for professionals and a teaching aid for students (agronomy, crop protection, biodiversity management, agroecology).

New trends for innovation in the Mediterranean animal production R. Bouche, A. Derkimba, F.

Casabianca, 2012-03-26 The Mediterranean area shows a great diversity of livestock systems, depending

on local resources and traditions, but also on the networking space where informational resources are available for producers. During the last decades, a lot of innovations have been conceived or introduced in the Mediterranean area, allowing livestock systems to remain competitive. The book looks at two main issues: firstly, it gives an updated review on the main innovations that significantly changed the activities of livestock production in the Mediterranean area in the recent past. Secondly, the focus lies on the extent to which these innovations improve the efficiency, ensure the socio-cultural basis or reduce the environmental impact of livestock systems. One major finding is a new vision of innovating systems based on the distinction between regulated innovation (when aims are fixed) and innovative design (when aims are questioned). Innovations reported in the book are dealing with a set of concerns. They concern the production techniques, the work organization, the equipment and infrastructures, the collective features for selection, reproduction, feeding or sanitary devices. They also concern the local organization such as product labelling, new dynamics around local breeds, collective rules for supply basin or approaches of new products for new markets. More recently, some innovations focus on environmental impacts of livestock production, due to an increasing consciousness of those kinds of problems. In the final part of the book, a round table copes with a crucial question: are traditions in Mediterranean livestock activities to be considered an obstacle or a source of

innovation? This book provides a set of updated information and knowledge useful for researchers, students, extension services and policy-makers in the field of animal science.

Crop Protection Jean-Philippe Deguine, Pierre Ferron, Derek Russell, 2009-01-09 This book is a synthesis and a celebration of a large body of agro-ecological research carried out on the management of the pests of cotton, one of the worlds major crops and one which has historically been a very heavy consumer of inputs of pesticides. It demonstrates how agro-ecological approaches to pest management are at last approaching the mainstream, with an increasing recognition that farmland delivers a wide range of ecosystem services (natures goods and services), including but certainly not solely comprising the production of food.

Agronomy for Development James Sumberg, 2017-07-06 Over the last decade there has been renewed interest in food security and the state of the global food system. Population growth, climate change and food price spikes have combined to focus new attention on the technologies and institutions that underpin the production and consumption of food that is varied, nutritious and safe. Knowledge politics within development-oriented agronomy set the stage for some models of agricultural development to be favoured over others, with very real implications for the food security and wellbeing of many millions of people. Agronomy for Development demonstrates how the analysis of knowledge politics can shed valuable new light on current

debates about agricultural development and food security. Using bio-physical and social sciences perspectives to address the political economy of the production and use of knowledge in development, this edited collection reflects on the changing politics of knowledge within the field of agronomy and the ways in which these politics feed and reflect the interests of a broad set of actors. This book is aimed at professionals working in agricultural research as well as students and practitioners of agricultural, rural and international development.

Entre agronomie et agriculture Jean-Luc Julien, 2017-07-01 Représentative de la recherche agronomique de la première moitié du XXe siècle, la station agronomique de l'Aisne se développe après-guerre d'une manière très atypique : la station agronomique est alors un creuset étonnant pour des chercheurs et des ingénieurs qui génèrent des innovations précieuses pour les agriculteurs de Picardie, de Champagne-Ardenne, voire de la France entière, avec l'appui des politiques et responsables agricoles. Pendant plus d'un siècle, cette chronique agronomique de la recherche-développement illustre la lente progression des connaissances et leur problématique.

Sustainable Development and Tropical Agri-chains Estelle Biénabe, Alain Rival, Denis Loeillet, 2017-02-20 This book links tropical agri-chain dynamics – with which CIRAD and AFD have been involved for decades – to that of sustainable development. Increased environmental and social concerns urge agri-chain actors and development practitioners to design innovations, and public

and private actors to invent regulations in connection with agri-chains to improve sustainability. With a view to contributing towards implementing the Sustainable Development Goals (SDGs), this book examines the different roles of agri-chains: as vectors of development, as spaces of innovation, as objects of evaluation, and as arenas of regulation. It builds upon the findings and experiences of CIRAD and its researchers together with their Southern partners, and of AFD and its officers. Linking agricultural production with the other economic sectors, agri-chains are key spaces where local and global challenges to sustainability meet and where local and global actors experiment interlinked or common solutions.

Peace & food Etienne Fourmont, 2023-02-01 Le plus célèbre des agri-youtubers répond aux idées reçues sur l'agriculture. Les pesticides, le bien-être animal, l'industrie agroalimentaire... Nous pensons tout connaître de ces sujets qui font l'actualité. Mais les informations qui apparaissent dans les médias sont parfois simplistes, souvent déconnectées de la réalité du terrain. Étienne Fourmont, agriculteur dans la Sarthe et youtubeur, le sait mieux que personne : il travaille justement à déconstruire avec humour les idées préconçues sur son métier. Il veut nous montrer une agriculture jeune, dynamique, prête à répondre aux grands enjeux de demain. En faisant dialoguer agriculteurs bio et conventionnels, éleveurs et antispécistes, consommateurs et producteurs, ce livre répond à nos idées reçues les plus courantes sur le quotidien de ceux qui

nourrissent la planète.

Forages and grazing in horse nutrition Markku Saastamoinen, Maria João Fradinho, Ana Sofia Santos, Nicoletta Miraglia, 2012-08-17 Forages should be the basis of all diets in horse feeding. Therefore it is of major importance to determine which parameters will influence their quality. Changes on chemical composition along the vegetative cycle, nutrient losses during harvesting, preservation and storage are factors that could have an effect on nutritive value, as well on digestibility and palatability. A specific grazing and ingesting behaviour, linked to plant preferences and the selection of feeding sites will have an impact on biodiversity. This will determine the options on plant species and varieties and further management of pastures for horses. This book highlights the role of forages and grazing in horse nutrition and also gathers information about related topics, such as the contribution of local breeds for the sustainability and development of rural areas, their impact on landscape and relationships with environmental preservation. This book is the 6th volume in a scientific series conceived through the European Workshop on Equine Nutrition (EWEN) which falls under the umbrella of the Horse Commission of the European Federation of Animal Science (EAAP). All these materials provide an interesting basis for further discussion, not only in specialized forums, but also for those involved in horse production.

 bolesti autori
 u knjizi bolest
 kao put ukazuju
 na to što nam
 govore simptomi
 kao što su
 infekcije
 glavobolja
 nezgode bolovi
 u srcu i zelucu
 ali i velike i
 još uvijek
 tabuizirane
 tegobe kao što
 su rak ili sida
