Participatory Visual Approaches to Adult and Continuing Education: Practical Insights Kyung-Hwa Yang,Randee Lipson Lawrence,2017-06-20 Gain useful practical knowledge of participatory visual methods in adult and continuing education. Bringing together relevant theories and imaginative practices from formal and non-formal adult education contexts, this volume discusses: photo-story, digital storytelling, photovoice, filmmaking, and painting. Also discussed are ways to use fabric, fashion shows as political messages, and engaging adult learners at museums in participatory ways. This sourcebook bridges the theory and practice and seeks ways to provide adult education practitioners with practical insights into the methods of participatory visual approaches. This is the 154th volume of the Jossey Bass series *New Directions for Adult and Continuing Education*. Noted for its depth of coverage, it explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

Using the Decoding The Disciplines Framework for Learning Across the Disciplines Janice Miller-Young,Jennifer Boman,2017-06-22 *Decoding the Disciplines*, a program designed to help instructors increase learning in their courses, provides a framework for identifying and remedying course elements that are most problematic for students. Decoding is a seven-step process in which instructors: 1. identify a bottleneck of learning, 2. make explicit the mental operations required to overcome the obstacle, 3. model the required steps for students, 4. give them practice at these skills, 5. deal with emotional bottlenecks that interfere with learning, 6. assess the success of their efforts, and 7. share the results. Providing detailed information so that readers may develop effective models of practice, this volume provides examples and evidence of the ways the framework has been applied across disciplines and used to inform teaching, curriculum, and pedagogical research initiatives. It outlines how various communities of practice got started, describes the analyses of three different collections of *Decoding* interviews, extends the *Decoding* framework using different theoretical lenses, and connects the learning to practical applications for teachers and scholars in higher education. This is the 150th volume of this Jossey-Bass higher education series. It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.
