The Old Bold Pilot Capt. Shakti Lumba, Capt. Priyanka Arora, 2021-11-17
Capt. Lumba has been a pilot, union leader and airline executive. He is one of Indian aviation's legends. His memoir will take you through the by-lanes of Indian Civil Aviation in all its glory. The book explains the Pilot Strike of 1992, the creation and success of Alliance Air (possibly India's first low-cost carrier), the operational start-up of IndiGo, India's premier and most successful low-cost carrier. Finally, it covers the safe landing at Laksh Farms, a place termed as a piece of heaven on earth! Readers will find this book more than just a memoir. There are valuable lessons of personal behaviour and integrity that are invaluable to ruminate about. In addition, the historically accurate perspectives of starting and running an airline provide valuable tips for students studying aviation management or even for executives operating in that space today.

The Colour Encyclopedia of Incredible Aeroplanes Philip Jarrett, 2011-06
Spiffing gift book for aviation fanatics everywhere. Hello chaps! You know, I've spent the best years of my life in dogfights flying some of the world's finest aeroplanes - now I find all my favourites are in this jolly old book, *The Colour Encyclopedia of Incredible Aeroplanes*. From my old chariot the Spitfire right through to the Aircanad BD-19 RGS, you'll find everything you ever wanted to know. Pick up technical bits and bobs from the specification of every plane, to country of origin, type, performance and climb rate (I know you'll be interested in that!) as well as nerve-tingling quotes from many of my old muckers. See the whites of pilots eyes in jolly aeroplane shots from every angle - watch them zooming through the sky and from every enticing angle. A proper, old-fashioned book with hundreds of handsome pictures, it's a damned attractive package. Chocs away!

The Turbine Pilot's Flight Manual Gregory N. Brown, Mark J. Holt, 2001-10-25

The book is perfect for not only those involved in pure jet operations; but for those involved in turboprop, multipilot operations, and transition training. It is a key tool for a successful turbine aviation career.

The Lunar Atmosphere and Dust Environment Explorer Mission (LADEE) Richard C. Elphic, Christopher T. Russell, 2015-06-15 This volume contains five articles describing the mission and its instruments. The first paper, by the project scientist Richard C. Elphic and his colleagues, describes the mission objectives, the launch vehicle, spacecraft and the mission itself. This is followed by a description of LADEE's Neutral Mass Spectrometer by Paul Mahaffy and company. This paper describes the investigation that directly targets the lunar exosphere, which can also be explored optically in the ultraviolet. In the following article Anthony Colaprete describes LADEE's Ultraviolet and Visible Spectrometer that operated from 230 nm to 810 nm scanning the atmosphere just above the surface. Not only is there atmosphere but there is also dust that putatively can be levitated above the surface, possibly by electric fields on the Moon's surface. Mihaly Horanyi leads this investigation, called the Lunar Dust Experiment, aimed at understanding the purported observations of levitated dust. This experiment was also very successful, but in this case their discovery was not the electrostatic levitation of dust, but that the dust was raised by meteoroid impacts. This is not what had been expected but clearly is the explanation that best fits the data. Originally published in Space Science Reviews, Volume 185, Issue 1-4, 2014.
