

Brandon And The Bipolar Bear A Story For Children

Mary Ann McDonnell, Janet Wozniak

Brandon and the Bipolar Bear Tracy Anglada,2009-05 Fictional story about Brandon, a young boy living with bipolar disorder. Readers learn about his symptoms, fears, and treatment from a child's viewpoint.

Your Child Does Not Have Bipolar Disorder Stuart L. Kaplan M.D.,2011-03-03 An eminent child psychiatrist provides an insider's, whistle-blowing perspective on the promotion of a diagnostic entity that does not exist. *Your Child Does Not Have Bipolar Disorder: How Bad Science and Good Public Relations Created the Diagnosis* examines this diagnostic fad through a variety of lenses. Author Stuart L. Kaplan, MD, draws heavily on his forty years of experience as a clinician, researcher, and professor of child psychiatry to make the argument that bipolar disorder in children and adolescents is incorrectly diagnosed and incorrectly treated. As Dr. Kaplan explains, the dramatic rise in this particular diagnosis is not based on scientific evidence, nor does it reflect any new discovery or insight about the etiology or treatment of the disorder. In fact, the opposite is the case: the scientific evidence against the existence of child bipolar disorder is so strong that it is difficult to imagine how it has gained the endorsement of anyone in the scientific community. *Your Child Does Not Have Bipolar Disorder: How Bad Science and Good Public Relations Created the Diagnosis* explains to parents and professionals the faulty reasoning and bad science behind the misdiagnosis of childhood bipolar disorder. Dr. Kaplan critiques the National Institute of Mental Health, academic child psychiatry, the pharmaceutical industry, and the media for their respective roles in advocating this diagnosis. He describes very clearly what the children and adolescents actually do have, explains how it should be treated, and provides real-life clinical scenarios and approaches to treatment that work.

Parenting Mentally Ill Children Craig Winston LeCroy,2011-03-03 This in-depth exploration uses individual portraits to show what parents face as they love and care for their mentally ill children and cope with how the mental health system has failed them. The Surgeon General has identified children's mental illness as a national problem that creates a burden of suffering so serious as to be considered a health crisis. Yet, what it means to be the parent of a mentally ill child has not been adequately considered—until now. *Parenting Mentally Ill Children: Faith, Caring, Support, and Survival* captures the essence of caring for these youngsters, providing resources and understanding for parents and an instructive lesson for society. Author Craig Winston LeCroy uses in-depth interviews to chronicle the experiences of parents of mentally ill children as they attempt to survive each day, obtain needed help, and reach out for support, and he lets them share their misunderstood emotions of shame, anger, fear, guilt, and powerlessness in the face of stigma from professionals, family, and friends. The book concludes with a critical appraisal of the social policies that must be implemented to help—and the reasons we should feel obligated to initiate them.

Clinical Manual for Management of Bipolar Disorder in Children and Adolescents Robert A. Kowatch,Mary A. Fristad,Robert L. Findling,Robert M. Post,2009-02-20 *Clinical Manual for Management of Bipolar Disorder in Children and Adolescents* was written in response to the growing body of knowledge surrounding pediatric bipolar illness and the underlying biological, environmental, and psychosocial influences that exacerbate symptoms and behavior. Written to provide clinically useful information about

diagnosis and management, this manual is a comprehensive collection of empirical evidence, case studies, and the growing number of evidence-based reports on pediatric bipolar disorder over the past five years. This manual also contains several chapters provided by Dr. Mary Fristad and her team at The Ohio State University -- experts in family and psychosocial aspects of pediatric bipolar disorder. Her contributions, along with vast clinical evidence and the expertise provided by Drs. Kowatch, Findling, and Post, help paint an accurate picture of everything from age onset to the effectiveness of various therapies. In this manual, clinicians can refer to the following tools: A clinical description of childhood and adolescent bipolar disorder Management strategies for the patient including daily mood charting Current medication strategies and tactics Ways to help patients through the educational system Resources for clinicians, parents and patients A review of the future directions for childhood and adolescent bipolar disorder The many new developments in the field of pediatric bipolar disorder are affirming what this manual emphasizes -- that a combination of family and cognitive-behavior therapy can work in tandem with medical treatments to help young bipolar disorder patients achieve a more balanced life and a greater chance of controlling this illness later in life. The manual demonstrates how the medical community has shifted from asking, Does bipolar disorder really exist in children and adolescents to How can we best predict, diagnose and treat this serious medical disorder through a review of 25 years of study and insight.

I know it is not all lollipops and toe socks-believe me! But I find that even today, with my "cub" grown, it is the simple, basic things that will keep you afloat. In addition to "stockpiling" the fruits of your "best you," your family needs to see you putting in the time and effort every day to live a healthy lifestyle. I have been counseled that it is the essentials such as water, water, water, sunshine, exercise, healthy food, impeccable sleep hygiene, and of course a close relationship with a doctor you trust and follow. I am here to tell you that life with Bipolar disorder can be fun and fulfilling. The embarrassing moments you invariably encounter can be lived down by loveable you, who has probably received many gifts that outweigh the challenges. (If you weren't a bipolar bear, you wouldn't be you, right?) This book is for young and old-mother bears, father bears, cubs and anyone in the community who could benefit from being encouraged to tolerate well, and above all, have a bear-sized heart for those that are different. All the Best, Nancy Smith Earley

Philosophical Issues in Psychiatry IV Kenneth S. Kendler, Josef Parnas, 2017-03-24 The revisions of both DSM-IV and ICD-10 have again focused the interest of the field of psychiatry and clinical psychology on the issue of nosology. This interest has been further heightened by a series of controversies associated with the development of DSM-5 including the fate of proposed revisions of the personality disorders, bereavement, and the autism spectrum. Major debate arose within the DSM process about the criteria for changing criteria, leading to the creation of first the Scientific Review Committee and then a series of other oversight committees which weighed in on the final debates on the most controversial proposed additions to DSM-5, providing important influences on the final decisions. Contained within these debates were a range of conceptual and philosophical issues. Some of these - such as the definition of mental disorder or the problems of psychiatric - have been with the field for a long time. Others - the concept of epistemic iteration as a framework for the introduction of nosologic change - are quite new. This book reviews issues within psychiatric nosology from clinical, historical and particularly philosophical perspectives. The book brings together a range of distinguished authors - including major psychiatric researchers, clinicians, historians and especially nosologists - including several leaders of the DSM-5 effort and the DSM Steering Committee. It also includes contributions from psychologists with a special interest in psychiatric nosology and philosophers with a wide range of orientations. The book is organized into four major sections: The first explores the nature of psychiatric illness and the way in which it is defined, including clinical and psychometric perspectives. The second section examines problems in the reification of psychiatric diagnostic criteria, the problem of psychiatric epidemics, and the nature and definition of individual symptoms. The third section explores the concept of epistemic iteration as a possible governing conceptual framework for the revision efforts for official psychiatric nosologies such as DSM and ICD and the problems of validation of psychiatric

diagnoses. The book ends by exploring how we might move from the descriptive to the etiologic in psychiatric diagnoses, the nature of progress in psychiatric research, and the possible benefits of moving to a living document (or continuous improvement) model for psychiatric nosologic systems. The result is a book that captures the dynamic cross-disciplinary interactions that characterize the best work in the philosophy of psychiatry.
