Constitutionalism, Legitimacy, and Power Kelly L Grotke, Markus J Prutsch, 2014-09-25 If one counts the production of constitutional documents alone, the nineteenth century can lay claim to being a 'constitutional age'; one in which the generation and reception of constitutional texts served as a centre of gravity around which law and politics consistently revolved. This volume critically re-examines the role of constitutionalism in that period, in order to counter established teleological narratives that imply a consistent development from absolutism towards inclusive, participatory democracy. Various aspects of constitutional histories within and outside of Europe are examined from a comparative, transnational, and multidisciplinary historical perspective, organized around five key themes. The first part looks at constitutions as anti-revolutionary devices, and addresses state building, monarchical constitutionalism, and restorations. The second part takes up constitutions and the justification of new social inequalities, focusing on women's suffrage, human rights, and property. The third part uses individual country studies to take on questions of how constitutions served to promote nationalism. The use of constitutions as instruments of imperialism is covered in the fourth part, and the final part examines the ways that constitutions function simultaneously as legal and political texts. These themes reflect a certain scepticism regarding any easy relationship between stated constitutional ideals and enacted constitutional practices. Taken together, they also function as a general working hypothesis about the role of constitutions in the establishment and maintenance of a domestically and internationally imbalanced status quo, of which we are the present-day inheritors. More particularly, this volume addresses the question of the extent to which nineteenth-century constitutionalism may have set the stage for new forms of domination and discrimination, rather than inaugurating a period of 'progress' and increasing equality.

Dicey, 1985-09-30 A starting point for the study of the English Constitution and comparative constitutional law, *The Law of the Constitution* elucidates the guiding principles of the modern constitution of England: the legislative sovereignty of Parliament, the rule of law, and the binding force of unwritten conventions.

Literary Theory Terry Eagleton,2011-11-30 A quarter of a century on from its original publication,Literary Theory: An Introduction still conjures the subversion, excitement and exoticism that characterized theory through the 1960s and 70s, when it posed an unprecedented challenge to the literary establishment. Eagleton has added a new preface to this anniversary edition to address more recent developments in literary studies, including what he describes as “the growth of a kind of anti-theory”, and the idea that literary theory has been institutionalized. Insightful and enlightening,Literary Theory: An Introduction remains the essential guide to the field. 25th Anniversary Edition of Terry Eagleton’s classic introduction to literary theory First published in 1983, and revised in 1996 to include material on developments in feminist and cultural theory Has served as an inspiration to generations of students and teachers Continues to function as arguably the definitive undergraduate textbook on literary theory Reissue includes a new foreword by Eagleton himself, reflecting on the impact and enduring success of the book, and on developments in literary theory since it was first published

Allegories of America Frederick M. Dolan,2018-03-15 Allegories of America offers a bold idea of what, in terms of political theory, it means to be American. Beginning with the question What do we want from a theory of politics? Dolan explores the metaphysics of American-ness and stops along the way to reflect on John Winthrop, the Constitution, 1950s behaviorist social science, James Merrill, and William Burroughs. The pressing problem, in Dolan's view, is how to find a vocabulary for politics in the absence of European metaphysics. American political thinkers, he suggests, might respond by approaching their own theories as allegories. The postmodern dilemma of the loss of traditional absolutes would thus assume the status of a national mythology—America's perennial identity crisis in the absence of a tradition establishing the legitimacy of its founding. After examining the mid-Atlantic sermons of John Winthrop, the spiritual founding father, Dolan reflects on the authority of the

Constitution and the Federalist. He then takes on questions of representation in Cold War ideology, focusing on the language of David Easton and other liberal political behaviorists, as well as on cold War cinema and the coverage of international affairs by American journalists. Additional discussions are inspired by Hannah Arendt's recasting of political theory in a narrative framework. here Dolan considers two starkly contrasting postwar literary figures—William S. Burroughs and James Merrill—both of whom have a troubled relationship to politics but nonetheless register an urgent need to articulate its dangers and opportunities. Alongside Merrill's unraveling of the distinction between the serious and the fictive, Dolan assesses the attempt in Arendt's On Revolution to reclaim fictional devices for political reflection.
