From Person to Person Gabi Steiner,2006

This Is Gabriel Making Sense of School Hartley Steiner,2010-03 The author takes a look at some of the challenges that children with SPD (sensory processing disorder) face at school, using her own son Gabriel as an example.

The Earth Shook Donna Jo Napoli,2009-08-18 Little Parisa—Farsi for like an angel—goes to bed one night only to be shaken from sleep by an earthquake that rocks her home of Bam, Iran. Frightened and alone—the earthquake has left her town deserted—Parisa knocks on the doors of various animals, only to be rebuffed again and again. Boar accuses her of being a hunter; Owl blames her for taking his food and leaving him hungry. Lion just gives a ferocious roar. Left with nothing but her resolve, Parisa turns to the most natural of human instincts: She walked as a human child under the sun. She dances. She laughs. She waters neglected flowers. She shares. And one by one, her generous spirit inspires the animals around her to put aside their differences and revel in the simple delights that unite them. Donna Jo Napoli's accomplished storytelling is beautifully complemented by Gabi Swiatkowska's dramatic oil paintings to celebrate the courage and fortitude of the human spirit.

Thrivers Michele Borba, Ed. D.,2022-03-08 The bestselling author of *UnSelfie* offers 7 teachable traits that will safeguard our kids for the future. We think we have to push our kids to do more, achieve more, BE more. But we're modeling the wrong traits—like rule-following and caution—and research shows it's NOT working. This kind of "Striver" mindset isn't just making kids unhappier, says Dr. Michele Borba...it's actually the opposite of what it takes to thrive in the uncertain world ahead. Thrivers are different: they flourish in our fast-paced, digital-driven, often uncertain world. Why? Through her in-depth research, Dr. Borba discovered that the difference comes down not to grades or test scores, but to seven character traits that set Thrivers apart—confidence, empathy, self-control, integrity, curiosity, perseverance, and optimism. The even better news: these traits can be taught to children at any age...in fact, parents and educators must do so. In *Thrivers*, Dr. Borba offers practical, actionable ways to develop these traits in children from preschool through high school, showing how to teach kids how to cope today so they can thrive tomorrow.

After Cancer Care Gerald Lemole,Pallav Mehta,Dwight Mckee,2015-08-25 After the intense experience and range of emotion that comes with surgery, radiation, or chemotherapy (or all three), cancer patients often find themselves with little or no guidance when it comes to their health post-treatment. *After Cancer Care* is the much-needed authoritative, approachable guide that fills this gap. It includes information on how to maintain physical health—with chapters on epigenetics, nutrition, and exercise—as well as emotional health through stress management techniques. The cutting-edge and growingly popular science of Epigenetics has shown that you are not stuck with your genetic history: your choices in diet, exercise, and even relationships can help determine whether or not your genes promote cancer, and therefore determine your propensity for relapse. Your lifestyle has an effect on the most common types of cancer including breast cancer, prostate cancer, melanoma, endometrial cancer, colon cancer, bladder cancer, and lymphoma. The doctors present easy-to-incorporate lifestyle changes to help you "turn on" hundreds of genes that fight cancer, and "turn off" the ones that encourage cancer, while recommending lifestyle plans to address each type. In addition, they share 34 healthy recipes and tips on staying active and exercising, detoxifying your house and environment, and taking supplements to help prevent relapse. With more than three decades of post-cancer-care experience, Drs. Lemole, Mehta, and McKee break down the science into palatable, practical takeaways so that you can drastically improve your quality of life and enjoy many years of cancer-free serenity.

Lila Robert Pirsig,2013-11-06 In this bestselling new book, his first in seventeen years, Robert M. Pirsig, author of Zen and the Art of Motorcycle Maintenance, takes us on a poignant and passionate journey as mysterious and compelling as his first life-changing work. Instead of a motorcycle, a sailboat carries his philosopher-narrator Phaedrus down the Hudson River as winter closes in. Along the way he picks up a most unlikely traveling companion: a woman named Lila who in her desperate sexuality, hostility, and oncoming madness threatens to disrupt his life. In Lila Robert M. Pirsig has crafted a unique work of adventure and ideas that examines the essential issues of the nineties as his previous classic did the seventies.

Inside Asylum Bureaucracy: Organizing Refugee Status Determination in Austria Julia Dahlvik,2018-04-03 This open access monograph provides sociological insight into governmental action on the administration of asylum in the European context. It offers an in-depth understanding of how decision-making officials encounter and respond to structural contradictions in the asylum procedure produced by diverging legal, political, and administrative objectives. The study focuses on structural aspects on the one hand, such as legal and organisational elements, and aspects of agency on the other hand, examining the social practices and processes going on at the frontside and the backside of the administrative asylum system. Coverage is based on a case study using ethnographic methods, including qualitative interviews, participant observation, as well as artefact analysis.

This case study is positioned within a broader context and allows for comparison within and beyond the European system, building a bridge to the international scientific community. In addition, the author links the empirical findings to sociological theory. She explains the identified patterns of social practice in asylum administration along the theories of social practices, social construction and structuration. This helps to contribute to the often missing theoretical development in this particular field of research. Overall, this book provides a sociological contribution to a key issue in today's debate on immigration in Europe and beyond. It will appeal to researchers, policy makers, administrators, and practitioners as well as students and readers interested in immigration and asylum.

Mouseling's Words Shutta Crum,2017 A young mouse ventures out of the family nest to find the greatest adventure of all: reading--Provided by publisher.

88 Names Matt Ruff,2020-03-17 The critically acclaimed author of Lovecraft Country returns with a thrilling and immersive virtual reality epic—part cyberthriller, part twisted romantic comedy—that transports you to a world where identity is fluid and nothing can be taken at face value. John Chu is a “sherpa”—a paid guide to online role-playing games like the popular Call to Wizardry. For a fee, he and his crew will provide you with a top-flight character equipped with the best weapons and armor, and take you dragon-slaying in the Realms of Asgarth, hunting rogue starships in the Alpha Sector, or battling hordes of undead in the zombie apocalypse. Chu’s new client, the pseudonymous Mr. Jones, claims to be a “wealthy, famous person” with powerful enemies, and he’s offering a ridiculous amount of money for a comprehensive tour of the world of virtual-reality gaming. For Chu, this is a dream assignment, but as the tour gets underway, he begins to suspect that Mr. Jones is really North Korean dictator Kim Jong-un, whose interest in VR gaming has more to do with power than entertainment. As if that weren’t enough to deal with, Chu also has to worry about “Ms. Pang,” who may or may not be an agent of the People’s Republic of China, and his angry ex-girlfriend, Darla Jean Covington, who isn’t the type to let an international intrigue get in the way of her own plans for revenge. What begins as a whirlwind online adventure soon spills over into the real world. Now Chu must use every trick and resource at his disposal to stay one step ahead—because in real life, there is no reset button.

Everybody's Favorite Book Mike Allegra,2018-10-30 A slyly fun picture book for kids and adults alike! Anyone who says, “You can’t please everybody,” isn’t trying hard enough. At least, that’s what the cheeky narrator of this meta picture book thinks! A good book may have a spaceman or a ninja or a cowboy, but Everybody’s Favorite Book has something better: a Space Ninja Cow. And that’s only the beginning. You like princesses? We got ‘em. Prefer a mystery? No sweat. Want the definition of gallimaufry? A good poop joke? A giant, carnivorous guinea pig? Check, check and check. And there's more! Much more! This book has everything, for everybody! Here’s hoping things don’t go awry. (Spoiler, they do.) An Imprint Book

The Role of Topology in Materials Sanju Gupta, Avadh Saxena, 2018-04-21 This book presents the most important advances in the class of topological materials and discusses the topological characterization, modeling and metrology of materials. Further, it addresses currently emerging characterization techniques such as optical and acoustic, vibrational spectroscopy (Brillouin, infrared, Raman), electronic, magnetic, fluorescence correlation imaging, laser lithography, small angle X-ray and neutron scattering and other techniques, including site-selective nanoprobe. The book analyzes the topological aspects to identify and quantify these effects in terms of topology metrics. The topological materials are ubiquitous and range from (i) de novo nanoscale allotropes of carbons in various forms such as nanotubes, nanorings, nanohorns, nanowalls, peapods, graphene, etc. to (ii) metallo-organic frameworks, (iii) helical gold nanotubes, (iv) Möbius conjugated polymers, (v) block co-polymers, (vi) supramolecular assemblies, to (vii) a variety of biological and soft-matter systems, e.g. foams and cellular materials, vesicles of different shapes and genera, biomimetic membranes, and filaments, (viii) topological insulators and topological superconductors, (ix) a variety of Dirac materials including Dirac and Weyl semimetals, as well as (x) knots and network structures. Topological databases and algorithms to model such materials have been also established in this book. In order to understand and properly characterize these important emergent materials, it is necessary to go far beyond the traditional paradigm of microscopic structure-property-function relationships to a paradigm that explicitly incorporates topological aspects from the outset to characterize and/or predict the physical properties and currently untapped functionalities of these advanced materials. Simulation and modeling tools including quantum chemistry, molecular dynamics, 3D visualization and tomography are also indispensable. These concepts have found applications in condensed matter physics, materials science and engineering, physical chemistry and biophysics, and the various topics covered in the book have potential applications in connection with novel synthesis techniques, sensing and catalysis. As such, the book offers a unique resource for graduate students and researchers alike.

Fragile Lives in Fragile Ecosystems International Rice Research Institute, 1995 Fragile lives in fragile ecosystems: Feeding the world's poor from neglected rice ecosystems was the theme of the 1995 International Rice Research Conference. During the February meeting, participants assessed progress in rice research and identified new research approaches for reducing constraints and improving productivity and sustainability of less favored and fragile rice producing areas - these are the upland, rainfed lowland, and flood-prone ecosystems.

Combat Motivation A. Kellett, 2013-11-11 What men will fight for seems to be worth looking into, H. L. Mencken noted shortly after the close of

the First World War. Prior to that war, although many military commanders and theorists had throughout history shown an aptitude for devising maxims concerning esprit de corps, fighting spirit, morale, and the like, military organizations had rarely sought either to understand or to promote combat motivation. For example, an officer who graduated from the Royal Military College (Sandhurst) at the end of the nineteenth century later commented that the art of leadership was utterly neglected (Charlton 1931, p. 48), while General Wavell recalled that during his course at the British Staff College at Camberley (1909-10) insufficient stress was laid on the factor of morale, or how to induce it and maintain it" (quoted in Connell 1964, p. 63). The First World War forced commanders and staffs to take account of psychological factors and to anticipate widely varied responses to the combat environment because, unlike most previous wars, it was not fought by relatively small and homogeneous armies of regulars and trained reservists. The mobilization by the belligerents of about 65 million men (many of whom were enrolled under duress), the evidence of fairly widespread psychiatric breakdown, and the postwar disillusion (- xiii xiv PREFACE amplified in books like C. E. Montague's Disenchantment, published in 1922) all tended to dispel assumptions and to provoke questions about motivation and morale.
