80/20 Triathlon Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In *80/20 Triathlon*, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.

Training and Racing with a Power Meter, 2nd Ed. Hunter Allen, Andrew Coggan, 2012-11-27 Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a

power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.

Train Your Mind for Athletic Success Jim

Taylor, 2017-10-06 Much too often, the mental aspect of sport performance is overlooked. While all top athletes are in outstanding physical condition and technically exceptional, mental preparation is often what separates the best from the rest. This is just as true for young athletes as it is for pros and Olympians. And even though relatively few athletes will ever reach the top of their sport, the attitudes and life lessons learned from mental training—such as motivation, confidence, focus, perseverance, and resilience—will serve them well in all aspects of

their lives. In *Train Your Mind for Athletic Success: Mental Preparation to Achieve Your Sports Goals*, Dr. Jim Taylor uses his own elite athletic experience and decades of working with some of the world's best athletes to provide competitors of every ability with insights, practical exercises, and tools they can use to be mentally prepared when it really counts. His *Prime Sport System* explores the attitudes that lay the foundation for athletic success, the mental obstacles that can hold athletes back, the preparations they must take, the mental muscles they should strengthen, and the mental tools they need to fine tune their competitive performances. Most importantly, Dr. Taylor shows athletes practical strategies they can use to become mentally strong so they can perform their best when it matters most. *Train Your Mind for Athletic Success* goes well beyond the typical mental skills that are discussed in other mental training books. Readers will not only learn why mental preparation is so important to athletic success, but also where they personally are in each area thanks to brief mental assessments in each section of the book. In addition, each chapter includes exercises to show athletes how to incorporate mental training directly into their overall sport training regimen. The most comprehensive and in-depth book on mental preparation for athletes available, *Train Your Mind for Athletic Success* is an essential read for athletes, coaches, and parents.

In a spectacular duel that became known as the Iron War, the world's two strongest athletes raced side by side at world-record pace for a grueling 139 miles. Driven by one of the fiercest rivalries in triathlon, Dave Scott and Mark Allen raced shoulder to shoulder through Ironman's 2.4-mile swim, 112-mile bike race, and 26.2-mile marathon. After 8 punishing hours, both men would demolish the previous record--and cross the finish line a mere 58 seconds apart. In Iron War, sports journalist Matt Fitzgerald writes a riveting epic about how Allen and Scott drove themselves and each other through the most awe-inspiring race in sports history. Iron War goes beyond the pulse-pounding race story to offer a fascinating exploration of the lives of the world's two toughest men and their unquenchable desire to succeed. Weaving an

examination of mental resolve into a gripping tale of athletic adventure, Iron War is a soaring narrative of two champions and the paths that led to their stunning final showdown.
