Provence Jerome Coignard,2003 Proud villas, farms surrounded by cultivated land, simple stone buildings in the middle of vineyards, and fields of lavender: that's Provence, and these homes, photographed by Maisons Côte Sud magazine, showcase the region's beauty and style. On display are brick tiles that stay cool in the summer, big clay pots displayed on either side of a door, mosaic stone paving, sunny kitchens full of yellow and green earthenware, comfortable bedrooms with cotton furnishings, wrought-iron banisters, gates, and window grills, and courtyards bathed in dappled light. It all adds up to a combination of heritage and stylishness unlike any other.

Women in Science: Aging and Public Health 2022 Marcia G. Ory,Colette Joy Browning,2023-10-16 The demographics of aging—whether differences in life expectancy or shouldering the burden of care for our aging populations—reflect that aging is indeed a women's issue. In the field of Aging and Public Health, there are many highly influential and successful women who are contributing to the field and tackling important questions about risk factors for successful aging as well intervention strategies for promoting health and quality of life across the life-course.

Paediatric Audiological Medicine Valerie E. Newton,2008-12-30 Professionals will find a wide range of topics relevant to their work with hearing impaired children or those suspected of having an impairment in this book. A chapter on epidemiology includes the prevalence of hearing impairment and several additional chapters are devoted to the various causative factors. Detection of a hearing loss, measurement of the degree of hearing loss and identification of the site of lesion are covered together with management of any hearing loss found. Individual chapters give coverage to balance disorders, tinnitus, progressive hearing loss, auditory neuropathy, central auditory processing disorders and unilateral hearing impairment. Methods of communication, communication disorders and the psychological effects of a hearing impairment are included together with consideration of education and employment issues.

Contemporary Living in Provence & Cote D'Azur ,2008

The Populist Challenge Jens Rydgren,2004 During the last decade and a half a new political party family, the extreme Right-wing populist (ERP) parties, has established itself in a variety of West European democracies. These parties represent a monist politics based on ethnic nationalism and xenophobia as well as an opposition against the 'political establishment'. Being the prototypic ERP party, the French Front National (FN) has been a model for ERP parties emerging elsewhere in Western Europe. This study presents a theoretically based explanation that combines the macro and the micro-level, as well as the political supply and the demand-side. More specifically, this study shows that it is necessary to consider both opportunity structures, created by demand and supply-side factors, as well as the ability of the FN to take advantage of the available opportunities. Of particular interest is the author's analysis of the sociology and attitudes of the FN-voters.

Chinese in France amid the Covid-19 Pandemic ,2023-10-30 The day after the epidemic broke out in Wuhan, Chinese people in France are already busy sending masks across borders and sharing media information; at the same time, a significant number of Chinese people are victims of racist attacks, insults and discrimination in France. Based on both quantitative and qualitative empirical data, this book reveals the new dynamics and interactions generated by the Covid-19 pandemic not only between different sub-groups of Chinese in France, but also between ethnic Chinese and their both countries: China and France. Mutual aid, local or transnational solidarity, inclusion initiatives, like any act of exclusion and hostility, invite you to question the essence of humanity in transnational settings, beyond the racialization of the Covid-19 virus.

Speaking in a Second Language Rosa Alonso Alonso,2018-04-15 For millions of individuals all over the world, speaking in a second language is a daily activity. It is therefore important that research in applied linguistics should contribute empirically to the study of second language spoken interaction. The aim of this volume is to make such a contribution by providing research-based insights into current approaches to the teaching and learning of this skill. Two key dimensions define the papers included here—their novelty and scope. First, the book provides a novel approach to the study of speaking in a second language by combining recent findings in usage-based linguistics with current issues in teaching. Second, the chapters cover a range of theoretical perspectives, including sociolinguistic and interactional competence, gestures, dynamic systems theory and code-switching. The volume offers a contemporary analysis of research in second language speaking that will be of interest to researchers, graduate students, teachers and other professionals working in the fields of communication and applied linguistics.

Categorical Data Analysis for the Behavioral and Social Sciences Razia Azen,Cindy M. Walker,2021-05-26 Featuring a practical approach with numerous examples, the second edition of Categorical Data Analysis for the Behavioral and Social Sciences focuses on helping the reader develop a conceptual understanding of categorical methods, making it a much more accessible text than others on the market. The authors cover common categorical analysis methods and emphasize specific research questions that can be addressed by each analytic procedure, including how

to obtain results using SPSS, SAS, and R, so that readers are able to address the research questions they wish to answer. Each chapter begins with a Look Ahead section to highlight key content. This is followed by an in-depth focus and explanation of the relationship between the initial research question, the use of software to perform the analyses, and how to interpret the output substantively. Included at the end of each chapter are a range of software examples and questions to test knowledge. New to the second edition: The addition of R syntax for all analyses and an update of SPSS and SAS syntax. The addition of a new chapter on GLMMs. Clarification of concepts and ideas that graduate students found confusing, including revised problems at the end of the chapters. Written for those without an extensive mathematical background, this book is ideal for a graduate course in categorical data analysis taught in departments of psychology, educational psychology, human development and family studies, sociology, public health, and business. Researchers in these disciplines interested in applying these procedures will also appreciate this book's accessible approach.

La Vie en Rose Suzanne Lowry, Tim Clinch, 2003 *La Vie En Rose* invites readers into 20 of the most gorgeous French homes, from a rustic Provencal house surrounded by vineyards to a stunningly elegant Parisian apartment. France still sets the standard for beautiful living. Whether it is the bohemian lifestyle of the Parisian artist or the grandeur of a medieval chateau, there is a romance and elegance associated with the French that people the world over seek to emulate. *LA VIE EN ROSE* takes readers on a grand tour of homes that perfectly capture the essence of French living. Gerard Depardieu escapes the rigors of his busy celebrity life by retiring to his country retreat in Anjou; Parisian decorator Agnes Comar inhabits a spectacular apartment surrounding a wild garden courtyard; and the Comte Jacques de Crussol d'Uzes and his wife open the doors of their ancestral home--a castle in the South of France. Lavishly illustrated with 180 color photographs, *LA VIE EN ROSE* is sure to inspire readers to recreate a piece of France in their own homes.

Living & Working in France Geneviève Brame, 2004 Praise and Reviews An unusual and refreshing expatriate guide, written by a local. Beautifully illustrated and with many quotations, this will even appeal to the absent francophile. *WOMAN ABROAD* An easy and enjoyable read, the book is a good introduction to living and working in France. *FT Expat* If you are interested in France, this book is for you. Informal and original, it welcomes you like a friend. Whether you are going to France for work, study or pleasure, *Living and Working in France: Chez vous en France* will be your companion. Geneviève Brame's book shines a practical, political and cultural spotlight on French values and customs. The author gives you the keys to unlock the mysteries of the country she knows best - her own. She introduces you to your new surroundings and helps you find your way through the labyrinth of administrative and immigration procedures. Sections on the socio-economic environment, the European Union, language, travel, health, home, education and the French lifestyle will provide answers to all your questions. Since 1993, *Living and Working in France: Chez vous en France* has been read by many people around the world. Their advice about France and the French will assist you, as will the opinions of private and public companies. *Living & Working in France: Chez vous en France* offers an attractive and realistic image of the country. It contains all the essential information you will need, plus the little details that reveal the diversity of the French experience and take you beyond the hackneyed clichés. This book is aimed first and foremost at welcoming newcomers, but it is also for those who have been there for a while, to help them prepare for their naturalization interviews. It will guide you but will not do the work for you. So browse at your leisure, then come and be *chez vous en France!*

Causal Models : How People Think about the World and Its Alternatives Steven Sloman Professor of Psychology Brown University, 2005-07-02 Human beings are active agents who can think. To understand how thought serves action requires understanding how people conceive of the relation between cause and effect, between action and outcome. In cognitive terms, how do people construct and reason with the causal models we use to represent our world? A revolution is occurring in how statisticians, philosophers, and computer scientists answer this question. Those fields have ushered in new insights about causal models by thinking about how to represent causal structure mathematically, in a framework that uses graphs and probability theory to develop what are called causal Bayesian networks. The framework starts with the idea that the purpose of causal structure is to understand and predict the effects of intervention. How does intervening on one thing affect other things? This is not a question merely about probability (or logic), but about action. The framework offers a new understanding of mind: Thought is about the effects of intervention and cognition is thus intimately tied to actions that take place either in the actual physical world or in imagination, in counterfactual worlds. The book offers a conceptual introduction to the key mathematical ideas, presenting them in a non-technical way, focusing on the intuitions rather than the theorems. It tries to show why the ideas are important to understanding how people explain things and why thinking not only about the world as it is but the world as it could be is so central to human action. The book reviews the role of causality, causal models, and intervention in the basic human cognitive functions: decision making, reasoning, judgment, categorization, inductive inference, language, and learning. In short, the book offers a discussion about how people think, talk, learn, and explain things in causal terms, in terms of action and manipulation.
