Management of Scarce Water Resources Hazim El-Naser,2009 The aim of this book is to provide a practical approach to a wide variety of water related topics. These explore the problems that arid and semi-arid countries face in relation to water resources and water management, using recent case studies as a result of recent and past experience to explore the possible solutions, as well to provide a framework/guideline to assist the practitioner in resolving these problems. The book contains case studies and practical guidelines developed from many years of project management, private sector participation and Ministerial level government appointment in both Water and Irrigated Agriculture. Many solutions were developed for specific problems/tasks, in particular, lessons learned from Management Contracts of water utilities.

Building the Cold War Consensus Benjamin Fordham,2010-05-25 In 1950, the U.S. military budget more than tripled while plans for a national health care system and other new social welfare programs disappeared from the agenda. At the same time, the official campaign against the influence of radicals in American life reached new heights. Benjamin Fordham suggests that these domestic and foreign policy outcomes are closely related. The Truman administration's efforts to fund its ambitious and expensive foreign policy required it to sacrifice much of its domestic agenda and acquiesce to conservative demands for a campaign against radicals in the labor movement and elsewhere. Using a statistical analysis of the economic sources of support and opposition to the Truman Administration's foreign policy, and a historical account of the crucial period between the summer of 1949 and the winter of 1951, Fordham integrates the political struggle over NSC 68, the decision to intervene in the Korean War, and congressional debates over the Fair Deal, McCarthyism and military spending. The Truman Administration's policy was politically successful not only because it appealed to internationally oriented sectors of the U.S. economy, but also because it was linked to domestic policies favored by domestically oriented, labor-sensitive sectors that would otherwise have opposed it. This interpretation of Cold War foreign policy will interest political scientists and historians concerned with the origins of the Cold War, American social welfare policy, McCarthyism, and the Korean War, and the theoretical argument it advances will be of interest broadly to scholars of U.S. foreign policy, American politics, and international relations theory. Benjamin O. Fordham is Assistant Professor of Political Science, State University of New York at Albany.
