**Sprinkle and Trickle Irrigation** Jack Keller,2012-11-05 The design text, Sprinkle and Trickle Irrigation, opens up a new and clear window through which to view the physics, economics, design, and management of pressurized irrigation systems. A broad array of system types and applications have been covered in detail to provide for complete understanding of systems design. Topics include soil-water-plant relations, general planning concepts, hydraulics, economics, sizing, operation, maintenance, and special uses. Pressurized irrigation system types covered include hand-line, wheel-line, solid set, traveler, center-pivot, linear-moving and big-gun-sprinkler systems, pumping systems, and a broad array of trickle system components. The work in this text culminates earlier major works by Jack Keller on the W. R. Ames Company Irrigation Handbook (1967), Rain Bird Sprinkler Manufacturing Corp. 's Trickle Irrigation Design (1975), and the USDA-Soil Conservation Service's National Engineering Handbook, Section 15: Irrigation Chapter 11: Sprinkle Irrigation (1983) and Chapter 15: Trickle Irrigation (1984). These earlier works form the foundation upon which the majority of currently used design texts are based. The years of design and troubleshooting experiences of the authors and wide ranges of environments and design applications in which they have worked have resulted in the substance and robustness of this text in stated relationships and procedures.
